

CURE FOR SMALLPOX

Said to be as Unfailing as Fate and Conquers in Every Instance.

Mr. A. J. Burrow, of Troy, sent the following clipping which he cut out of The Courier several years ago and saved:

"I herewith append a recipe which has been used to my knowledge in hundreds of cases. It will prevent or cure small pox though the pittings are filling. When Jenner discovered cow pox in England, the world of science hurled an avalanche of fame upon his head, but when the most scientific school of medicine in the world—that of Paris—published this recipe as a solid panacea for smallpox, it passed unheeded. It is as unfailing as fate, and conquers in every instance. It is harmless when taken by a well person. It will also cure scarlet fever. Here is the recipe as I have used it, and it cured my children of scarlet fever; Here it is as I have used it to cure smallpox, when learned physicians said the patient must die, it cured: Sulphate zinc, one grain; fox glove (digitalis) one grain; half a teaspoonful of sugar; mix with two tablespoonfuls of water. When thoroughly mixed add four ounces of water. Take a spoonful every hour. Either disease will disappear in twelve hours. For a child, smaller doses, according to age.

If counties would compel their physicians to use this there would be no need of pest houses. If you value advice and experience, use this for that terrible disease."

Many families in Asheboro have become owners of homes in the same way. charge of both associations. Stock in the Building and Loan Associations is a safe investment.

Bold bandits invaded the down town district of Memphis, Tenn., last Saturday shortly before noon, knocked down two young women employees of the Memphis Linotype company, seized a bag containing \$1,600 which one of the women was carrying and escaped in an automobile. THE COUNTY PLAN

The county-wide plan for schools is being advocated throughout North Carolina. Several counties have already adopted it, while in several others it is to be voted on at an early date. The county-wide school system does away with the small district school districts. It tends to equalize the school advantages of all children within the county, irrespective of local wealth and willingness.

The following are the main features of the county-wide school plan: 1. Only one system of schools for the whole county. 2. One superintendent for the whole county. 3. A principal for each high school. 4. At least an eight-months term for the whole county. 5. The establishment of an adequate number of high schools. 6. Transportation to schools where

necessary. 7. Better schools in every meaning of the term. 8. An equal opportunity to every child in the whole county. 9. All property in the county to bear the same tax rate, for school purposes.—News Letter.
