Randolph Agricultural Department

E. S. MILLSAPS, JR., County Agent

Saturdays Office Days First Mondays

Feed: A reasonable variety, good on quality, supplied in liberal quantities. Growing stock requires a lot of nourishment. Keep a good growing mash before the flock at all times. ing mash before the flock at all times. 190 Give scratch grain once or twice daily.
190 Give scratch grain beef or fish scrap. Some form of an-21 imal food high in protein is very es-93 sential to proper growth and develop-ment. Plenty of good clean fresh water and green feed are also very important. At this season some of the old hens have laid out for the year. Cull them out and get rid of them. They are only boarders and cut down the profit from the flock.

Summer care of Cream: During the 2.72 hot summer months care should be taken to keep the milk as clean as possible. The more care that is taken the longer the cream will keep. This 95 keeps the bacteria down that causes the cream to sour. Feed the cow oos some dry feed along with the pasture grasses. This will give a much bet-ter quality of cream and will make better butter. Do not fall out with the creamery if your test falls off \$8,843.70 during hot weather. The cows are giving more milk and are being fed on green feeds which will cause a lowering of the fat test. However the added amount of cream should make up for this difference. During hot weather the cream is quite apt to beweather the cream is quite apt to bethat the supply is. Last year I had orders for car lots but did not have time to get it located. Now is your opportunity to list yours so that when demand comes your grain. come sour and begin wheying off be-20.00 in this condition. Set your cream 75.00 screw up so as to produce 30 to 40 03.44 per cent cream, as high per cent cream does not sour as quickly as 06.24 possible in cold water and kept there 50.00 until delivered to the creamery. When 68.44 adding more cream to the vessel cool it off first, and stir the cream once or twice per day to keep it from be-23.12 coming lumpy.

Summer Hog Hints: Keep as good supply of fresh water in the lot if there is no running water. Keep mineral mixtures before the hogs at all times. Farmers often ask why their there is no running water as a well bound volume but I do not recollect its title. Perhaps some hogs go down in their backs after suckling pigs. Generally this trouble is from the lack of mineral matter in the ration. A shallow box of sand 00 placed in a shady place and kept well 04 saturated with oil will keep the lice 88 down. Keep the hogs out of old dusty houses. The dust will get into their houses. The dust will get into their lungs and start them to coughing, and later give trouble. Keep the hog strough clean. Feed left in the trough in hot weather will soon become dangerous, causing digestive troubles and often death. Keep small pigs out of tall pasture untit the dew is off as they are easily blistered by the bright sunlight when wet.

Our Land Needs Lime: Talk it over with your neighbors and see if you cannot get up a car of lime for your community this fall. Time is getting short now, so look after this at once.

See the County Agent and the will assist you in getting up the order.

Farmers' Rally Day.

Please remember that the Big Farmers Rally Day comes off Saturday of this week. Every farmer and his family are urged to be present. A good program has been arranged, and good speakers secured, who will have a message for all. will have a message for all.

o-operative marketing will be the
ral theme of the meeting, and I
k that this is the greatest probthat faces the American farmer

Poultry hints: During the hot sum- cue. This will aid greatly to our Poultry hints: During the hot summer months the mites and lice are
bad and do lots of damage. Don't
say, "My chickens are not lousy", and
let them get down before you start to
clean up. Get your broom, shovel
and spray pump and go after them.
Keep the houses and equipment clean.
Look after it regularly.

Look after it regularly.

Facel: A reasonable variety, good

belongs. Keep this day in mind. Bring your family with you and lets enjoy the day together, and get the benefits to be derived.

IMPORTANT—Farmers State Convention, July 23rd to 25th. Every farmer that possibly can should plan to attend this meeting. I expect to attend this meeting and hope that a large delegation of farmers will attend with me. All who can and will go please let me hear from you. I would like for us to get together and drive through the country, stopping along the way to inspect things of interest. Let me hear from you as soon as possible if you intend to attend this meeting.

Seed Wheat: Threshing time is here and every farmer who has good pure seed wheat should make an effore to get it threshed clean. There is a great demand for seed wheat from the eastern part of the State and we should supply that demand. Every farmer who has wheat, oats or rye for seed purposes and wants to sell please mail me the name of the variety and the number of bushels that you will have for sale as soon as that when demand comes your grain fore it reaches the creamery. Good butter fat cannot be made from cream can assist you. I cannot sell your grain unless you all let me have a list of it. Attend to this as soon as

MRS. MOFFITT INQUIRES ABOUT OLD LIBRARY

Editor of The Asheboro Courier: Can you find anyone who recalls a library which was called the Ptolemic Library of Asheboro? This must not recollect its title. Perhaps some book lover of the county may have preserved other books that belonged to that library. The name "Ptolemic" indicated the influence of a Greek astronomer who supposed the earth to be the center of the universe or a fixed point and that the heavenly bodies moved about it. We will suppose that the person who established that Library made Asheboro the fixed point, being the seat of the county court house, and around it the citizenship of the county would respond to the undertaking. Be that

as it may, it was a fine beginning even if it died in its efforts. Asheboro of that day had a very small population and one could hardly expect a Library to succeed in existing. Asheboro is now growing into a city. A public library is one of its greatest needs. You have now a large and increasing population, able to go forward in the newer, wider and more abundant source of helpfullness. Asheboro could be the Mecca, not only for her local citizenship but also for all the county, an intellectual festal board for the scholar, and the thinker, the educator and the statesman, the business man and the publicist, to the farmer and mechanic as well at the tracher and the pupil.

May we not hope that the Randolph ly expect a Library to succeed in ex-
