**RUPTURE EXPERT HERE**

F. H. Seeley, of Chicago and Philadelphia, the noted truss expert, will personally be at the O. Henry hotel, and will remain in Greensboro Thursday only, November 25th. Mr. Seeley says "The Spermathe Shield will not only retain any case of rupture perfectly, but contracts the opening in 10 days no the average case. Being a vast advancement over all former methods—exemplifying instantaneous effects immediately appreciable and withstanding any strain or position no matter the size or location. Large or difficult cases, or incisional ruptures (following operations) specially solicited. This instrument received the only award in England and in Spain, producing results without surgery, injections, medical treatments or prescriptions. Warning—All cases should be cautioned against the use of any elastic or web truss with understraps, as same rest where the lump is and not where the opening is, producing complications necessitating surgical operations. Mr. Seeley has documents from the United States Government, Washington, D. C., for inspection. He will be glad to demonstrate without charge or fit them if desired. Business demands prevent stopping at any other place in this section.

P. S.—Every statement in this notice has been verified before the Federal and State Courts.—F. H. Seeley. Home Office 117 N. Dearborn St. Chicago

# Buick Continues its Leadership

For the seventh consecutive year Buick has first choice of space at the National Automobile Shows. This signal honor is awarded annually by the National Automobile Chamber of Commerce to the manufacturer-member having the largest volume of business for the preceding twelve months.

In winning and in maintaining this enviable position year after year, Buick has demonstrated conclusively that the true value of any automobile is reflected in the consistency with which the public buys it.

Since the introduction of the 1925 Buick models, public patronage has increased to an even greater degree—

A tribute to the Buick engineering skill and manufacturing ability that have provided steeper and better Buick cars without departing in any way from the fundamentals of power, economy and dependability for which all Buicks have been famous.
