

Sunday School Lesson For Sunday

The Scripture Reading, and Comment by Rev. C. G. Smith, Asheboro, N. C.

Golden Text:—Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy strength, and with all thy mind; and thy neighbor as thyself.—Luke 10:27

which as the tree develops should become the trunk. With peaches, an open headed system of pruning is advisable, in which case the tree is trained to not more than four scaffold limbs so selected that no two limbs are directly opposite. This is done to prevent weak crotches.

THE GOOD SAMARITAN And, behold, a certain lawyer stood up, and tempted him, saying, Master, what shall I do to inherit eternal life? He said unto him, What is written in the law? how readest thou?

Mr. Randall states that sunlight is necessary to best color of fruit and if there is not a free circulation of air, danger from plant diseases is greater. He says "Experiments with apple trees made by the North Carolina Station show conclusively that it is best to thin out the small branches rather than to prune severely cutting back the large branches. Because of soil conditions in the Sandhills it is necessary to prune peach trees here rather severely. In all other cases, however, it is not wise to cut out too much wood."

Eliminating Head Lice

Mrs. R. J. S. Writes: 1. What is the best thing to do for head lice? 2. How often should treatments be used? 3. How long does it take to get rid of them? 4. Does treatment kill the eggs, too? 5. How long does it take an egg to hatch? 6. How long after a louse is hatched before it is old enough to lay eggs?

REPLY 1. Kerosene and hot vinegar. 2. If you do it right, one application is enough. If the bugs reappear after one treatment it is because either: (a) They took refuge for the moment in the clothing. (b) The head was reinfected from other in the home or school. (c) The nits were not killed and later hatched. 3. One sitting. 4. Yes. 5. Six days. 6. Eighteen days.

In the public health service method the subject is stripped of clothing. He stands on a newspaper. When a louse smells kerosene he is liable to jump for his life, or hide in the clothing. Wash the scalp and hair with kerosene. Wrap the head. Leave for 10 minutes. Remove the excess with a towel. Be on guard against fire. Heat some vinegar. Wash the hair with it while it is hot. Leave it on for 10 minutes. Remove the excess with a towel. Comb out the nits with a greased fine comb. Wash. Dry. Grease the hair to kill any eggs left behind.

SOUR MILK PROLONGS LIFE OF ALL POULTRY State College Poultry Department Conducts Interesting Experiments With Poultry

Sour milk fed to poultry gives promise of prolonging the life of the birds even a premature senility and auto-intoxication are practically unknown among Bulgarians, due to their habit of drinking sour milk, finds Dr. B. F. Kaupp and Professor R. S. Dearstyne, of the State College poultry department, who have been making some experiments to find out why sour milk is valuable in poultry feeding.

The investigations by Professors Kaupp and Dearstyne were made to study the effect of lactic acid in milk on the harmful bacteria which live in the body of fowls, especially in the intestinal tract. In a paper that has just been prepared and submitted to one of the leading agricultural magazines of the country these two scientists point out that certain harmful bacteria, B. Avisepticus, causing fowl cholera; B. Sanguinarium, causing fowl typhoid, and B. Pullorum, causing white diarrhea, languish in their destructive activities and finally expire when brought in contact with certain percentages of lactic acid in milk.

It was disclosed by investigations that lactic acid milk is low fat and sugar, both of which are contradicted in any type of diarrhea. Milk was also said to be high in protein, which element is desirable because it repairs tissue waste, and when broken down in the intestinal tract the resulting products are alkaline in reaction. Such alkalinity neutralizes the acid condition existing in the intestines in most diarrheal conditions.

Dr. Kaupp found that adding certain degrees of acidity to milk would control chick mortality. In one test he divided a flock of chicks into four groups, feeding the first the milk, the second, normal milk; the third Bulgarian buttermilk; and the fourth lactic acid buttermilk. During the first four weeks 84 per cent of the chicks receiving no milk died; 16 per cent of those receiving the sour milk died; only 10 per cent of those receiving acid milk died. The final conclusion is that the lactic acid milk is valuable to control germs affecting the fertility of young chicks.

Who Is Better Off?

Agriculture is still the foundation of national prosperity. The new year is a good time to take inventory of the price which the city man pays for a place in which to live. It is a good time to consider how much is the net balance of saving accumulated by the laboring man and the small business man. At the end of his productive life, 64 per cent of the net balance of saving accumulated by the laboring man and the small business man is lost to him by the time he reaches the age of 65.

"The Good Old Days"

The year 1922 will be the 300th anniversary of the first use of forks by the British. Before then they ate with their fingers.

Three centuries seem long ago. It is. But in 1632 when some unknown English progressive brought the first fork over from France, "the good old days" were at their best.

Shakespeare had been dead sixteen years. The immortal Bard never used a fork. He never even saw one. It must have been a queer sight to watch people eat in these "good old days." Refuse and dish water were tossed into the gutters. Small was used to plague people die like flies.

No one had running water in the kitchen and bath, carrying water in buckets a long distance or buying it from water carts—these are not attractive. People bathed so seldom that they had to invent high pressure perfumes in order to get within speaking distance of each other without suspecting that a regiment of skunks was at large.

It was an age of discomfort and inconveniences. No labor-saving devices had been invented for homes. Women worked themselves into their graves prematurely.

Crime was far more prevalent than now. No one could take a short stagecoach trip between towns safely without carrying a brace of pistols.

The "good old days" have been painted in romantic colors by fiction writers. That's why they seem attractive to people today, but if you could turn back the clock a few hundred years and live the life of those times you'd buy a return ticket promptly.

A fiction writer makes an old time dungeon alluring, romantic, adventurous. Truth is, the dungeon was damp, cold, dark, infested with rats, reeking with lice. Guards were brutal. Justice was slow. Penalties were severe. Food was mainly moldy bread and water.

Roman? Good old days? It's a joke! Fine from a distance. The good old days are NOW.—Exchange.

Dr. Peacock Relates Some of Experiences

The Lexington Dispatch in a recent issue publishes a letter from Dr. J. W. Peacock, formerly of Thomasville, written to a friend in Davidson county in which Dr. Peacock tells of his activities since his arrival in Florida following his escape from the insane department of the North Carolina penitentiary up to his present fight against extradition to California.

The letter follows: "We are located in a beautiful little village about fifty miles back from the coast—far enough from the ocean to get away from the fogs, yet not far enough inland to be too warm in summer. Every day is fair and the days are always good, beautiful mountains surround them every side, the country is a car and drive from oranges to snow in one hour. Madame Schumann Heink, Carrie Jacobs Bond and Owen Water live here.

"We have been treated very kindly by the people here, especially since the recent extradition fight.

"Perhaps you would be interested to know about my movements after I left Florida. I did not leave Florida immediately after the contest there, but remained near Lakeland till the following April. I then purchased a Ford and camping equipment and James (my elder son) and I started west, April, 1923. We struck one flood after another in Alabama, Mississippi and Louisiana.

At Jonesville, La., we found the road four feet under water for thirty miles. So, I hired a man to take me by boat up Black river till we came to the foothills. After we got by eastern Texas we got out of the rains and had easy sailing from there on, except crossing some deserts.

"My intention was to go to British Columbia, but upon reaching Sacramento I found my funds were almost exhausted, so I turned east into El Dorado county and took a carpenter job with a large water power company that was working 10,000 men developing a water power in the mountains. Soon the foreman of our gang quit and I undertook to fill his place! My, how I studied blueprints at night and worked my head off to make good! I got by o. k. and saved \$500 in three months.

"As the work was nearing completion, I began to form plans to go into Mexico and find a location to practice my profession. I had met a brother to one of the Mexican generals and he had given me valuable information. I began studying Spanish, and in October I landed in Tepic, Nariagu, Mexico. Tepic has 16,000 inhabitants and one doctor! It is about a thousand miles below the border and is in the most beautiful country I have ever seen.

"As luck would have it, the revolution soon broke out and Tepic was one of the first cities seized by the rebels. They raided the hotel where I was staying and took all their money and motor truck. I was not molested, although I had over \$500 in my pocket. I was advised, however, to go back to the States while getting out was good.

"I went to Bisbee, Arizona, and opened up a small grocery store and put James in school. By the way, they claim to have the finest public schools in the U. S. A.

"I left Bisbee, selling out the store, and came to San Diego the last of March. My wife joined me here, and we selected the beautiful little ranch in El Cajon, later, the rest of the family joined us here.

"In my rambles, I had two miraculous escapes from death. We were placing a heavy concrete mixer on a platform in the side of a mountain. One of the jacks flew out and knocked me off the platform. As I fell I managed to catch the edge of the floor with my left hand. That was all that saved me from a sheer drop of a thousand feet.

"When crossing the Mojave desert, our water bag sprang a leak and we found ourselves out of water. I drove fifty-one miles without a drop of water, and of course, the engine was soon dry too! I would drive till the engine was about red hot, then stop and let it cool; then go again. All day long we kept this up! Just about dark we came to water. And truly, it was the water of life!"

Montgomery Boy Wins

Ogden Bruton, a young farmer boy of Montgomery county, was accepted by the State Fair Association as the best livestock judge in North Carolina, winning the honor in competition with 30 others. Boy club work is active in Montgomery county as this is the second time a Montgomery county boy has carried off livestock judging honors at the State Fair.

New Way to Stop Night Coughing

Those who have suffered the tortures of sleeplessness due to continual coughing at night, and who as a result often feel utterly worn-out and useless during the day, need no longer permit their systems to be weakened and their vitality sapped by this distressing ailment. For through a very simple treatment the trouble can be stopped almost at once, and people often get their full night's rest undisturbed after the very first trial.

Have in the method. Many get a bottle of the prescription known as Dr. King's New Discovery from any good drug store. Then tonight before retiring take one teaspoonful and hold it in your throat for 15 or 20 seconds before swallowing it. This prescription has a double action. It not only soothes and breaks the cough and irritation, but it quickly soothes and removes the phlegm and mucous which is the real cause of the cough. So you throat is left wonderfully moist and cleared of irritating substances, you can sleep soundly through the night. The cough is usually gone in a very short time.

Dr. King's New Discovery is a remarkable cure for coughs, colds, whooping cough, croup, bronchitis, laryngitis and hoarseness. It is sold in all good drug stores. Ask for

Called Wasteful Destruction

Above is the illustration of a shipwreck. The illustration is a black and white drawing of a large ship, possibly a battleship or a transport, listing heavily and partially submerged in the sea. A large dollar sign is superimposed over the scene, and the text '30,000,000 TO THE BOTTOM OF THE SEA' is written across the image. Below the illustration, there is a small caption in a box.

Rosenburg-Wagner Engagement Announced

The engagement of Israel D. Wagner, of Asheboro, and Miss Rose Rosenberg, of Danville, Va., was announced Sunday evening, November 16th, at a dinner and reception at the home of Miss Rosenberg's parents in Danville, Va.

Mr. Wagner is a prominent and successful merchant, having for several years conducted a large mercantile business in Asheboro.

We clip the following from the Danville Register: Mr. and Mrs. Joseph Rosenberg have just announced the engagement of their daughter, Rose, to Israel D. Wagner, of Asheboro, N. C.

Mr. and Mrs. Rosenberg entertained at their residence on Wilson street, on Sunday evening from 6 until 9 p. m., at a dinner and reception in honor of the betrothed and to the relatives of the bride-groom-elect. The reception followed at 9 p. m.

Those who came to dinner included Mr. and Mrs. Lykie Miller and daughter, Winston-Salem, N. C.; Mr. and Mrs. A. B. Bernard and family, High Point, N. C.; Louis Freed and C. M. Ekerel, Winston-Salem, N. C.; Mr. and Mrs. Robert Wagner and son, Mrs. Sarah Wagner and family, Mrs. Evers and Miss Florence, all of High Point; Mr. and Mrs. Max Lemko and H. Davidson, Greensboro, N. C.; Mr. and Mrs. W. T. Williamson, Ringgold, Va.; Mr. and Mrs. Harry Goodman, Charlottesville, Va.; Mr. and Mrs. Abe Cohen and sons, Mr. and Mrs. Max A. Cohen and family, Miss Gertrude A. Cohen and family, Miss Gertrude Cashner, Rabbi Lyshinsky, Rabbi I. Muskat, Miss Louise Paulsen, Miss Esther Rosenberg, and Miss Saddle Rosenberg.

Those who came for the reception at 9 o'clock, were Misses Rose Shockey, Celia Livingston, Baltimore Md.; Miss Sadie Shingold, New York City; Ida Mandie, Sarah and Anna Berman, Laurie Silverman, Esther and Minnie Goldstein, and Helen Brown; Messdames Robert Goldstein, Leakville, N. C.; Jack Abrams, Louis Berman, Isaac Berman, Sam and Ben Usher, Philip Greenberg, Peter Richter, Jake Budowitz, Harry Goldstein; Joseph Ingoff, David Greenwald, and Mr. and Mrs. Morris Halperin.

The prospective bride is widely known in this city where practically all her life has been spent and is quite as generally esteemed. She is regarded as a young woman of many fine qualities, is an excellent business girl and is educated, notably in music, being a

highly talented violinist. She has unusual poise and amiability and many sterling qualities. Mr. Wagner has long resided in Asheboro where he has attained business success and won many friends. The date of the prospective wedding has not been announced.

Found Enough

Folks in Thomasville if we are to judge by reports to the newspapers are still arguing over what became of the ballots for and against the Port Terminals bill. It is claimed by those who were for the bill that somebody "swiped" the tickets for the affirmative early election day morning, while the other side says the same thing happened to the tickets for the proposition. One report states that extra tickets were struck off during the day by local printing presses to the amount of 20,000 or more.

At any rate Chaiertown voters found enough of the "against" variety to help Davidson put the quetibus on the Governor's ships and terminals. W. H. Kanoy Injured

W. H. Kanoy, of Climax, brakeman on the A. and Y. railroad, was painfully injured on the A. and Y. yard, near Lee street, Greensboro, Saturday night when he was caught between two cars. Kanoy was on duty on the yards where cars were being shifted. A car on which he was climbing to the roof sideslipped a car standing on a sidetrack throwing him off and painfully spraining his back and severely bruising him.

Last year there were 12,234 books in the school libraries of Guilford county, not including text-books. In 1924 there were only about 3,000 books in the county school libraries. This large increase is due largely, it is said, to the parent-teacher associations. A strict censorship over the kind of books is kept by the county board of education so that only good books are added to the libraries.

Want to Buy a Volcano?

What purports to be a bona fide proposal is an offer to sell or rent a volcano in Bolivia. The advertisement maintains that the volcano will produce steam enough to develop electrical energy of 400 million kilowatt hours in the course of 365 days.

THE CALL OF THE WOODS

The Morcanton News-Herald.

There is no time in the year when the call of nature is so irresistible as when the woods put on their gay autumn colors and tempt one to leave work and get out in the bracing October air and enjoy the beauties that are spread all around us. We do not recall that the trees have ever been prettier or the mountains more alluring than they are right now. If you haven't taken a day off to get out and enjoy "October's bright bliss" which we are blessed in this mountain section, you don't know what "autumn" and the loveliness with which it is blessing.

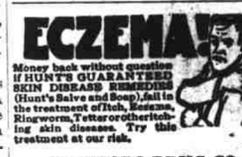

A trip to Mt. Mitchell at this time is one of indescribable beauty. We had that privilege and pleasure last Sunday and if we had planned all year to try to pick the most beautiful time it would surely have been that day or one day this week. A painter might be able to put on canvas the gorgeous colorings that now beset the mountains, but the misty blue haze that enfolds the picture that Nature has painted defies the human hand and brush and leaves in speechless wonder and admiration the beholder of God's handiwork. All the colors that are the joy of the tapestry maker are there woven into a wonderful natural tapestry that when seen against a sky that has been brightened by an autumn sun simply beggars the language to describe.

Pittsboro Gets New Industry

The Pampton Lakes Milling Company, a New Jersey corporation making silk trade mark ribbons and bands, will locate its plant at Pittsboro. A five acre tract of land has been purchased and a plant costing approximately \$150,000 will be constructed. Cheap power was given as one of the reasons for change of location from Pampton Lakes, N. J., to Pittsboro.

Lee County Farmers Interested

Lee county farmers are taking great interest in the news that a large condensed milk manufacturing company is interested in establishing a plant in the county. Statistics show that Lee county has a potential strength of six thousand cows, based on five cows to a farm, there being 1,329 farms in the county.

ASHEBORO DRUG CO.

Asheboro, N. C.

BLOOD POISON

must be feared. It is deadly. Medicine cannot help. It is a battle of blood against germs of destruction. Many times the blood loses. The result is fatal. Play safe. Prevent infection. Treat all cuts, scratches, bruises, burns, insect bites and flesh wounds with LICARBO. This powerful antiseptic and germicide kills the germs at once and heals the affected spot. It is better than iodine, is non-caustic, colorless and powerful.

Don't gamble with your life. Use LICARBO at once and fear blood poison no longer. Get a bottle of LICARBO now from your druggist and keep it handy.

STANDARD DRUG COMPANY

Asheboro, N. C.

Is it worth it?

The desire to make something besides the interest on their money has lured many to loss and poverty.

There is nothing so sure to lead to wealth and comfort as interest regularly earned and saved, with no losses to charge against it.

The safe and proper way to accomplish this end is through the purchase of our 6 Per Cent FIRST MORTGAGE REAL ESTATE BONDS and the regular reinvestment of the interest.

We have these 6 Per Cent FIRST MORTGAGE REAL ESTATE BONDS for sale in denominations of \$100 and up.

Central Loan and Trust Company Capital and Surplus \$500,000.00 W. W. BROWN, Secretary and Manager BURLINGTON, N. C.
