

Asheboro Baptist Church Observes 25th Anniversary

With Fitting Exercises Last Sunday—Dr. John Arch McMillan Delivers Sermon.

History Of Church

Is Prepared And Read By Mrs. Calvin Frazier—Baptists Show Steady Growth.

November 27, 1902, a small band of Baptists met at the home of Mr. and Mrs. G. W. Berry for the purpose of organizing a Baptist Church in Asheboro. There were only seven who became charter members of this organization.

November 27, 1927, a large band of Baptists met in the Asheboro Baptist Church for the purpose of celebrating the twenty-fifth anniversary of the work of the church, which at the organization numbered only seven members, but now has grown to two hundred and fifty. The gifts of the first year were less than two hundred dollars, but now a budget calls for five thousand dollars annually, besides monthly gifts to the Orphanage and collection, at times, of a building fund looking forward to the erection of a new building to meet the growing demands of the congregation, especially of the Sunday School.

At the morning hour Dr. John Arch McMillan, who became pastor of the church in 1910 and served for several years, and who is now Alumni Secretary of Wake Forest College, preached a powerful sermon inspiring the people to go on with the great work which they are now doing. At the close of the sermon the pastor, Dr. O. G. Tillman, on behalf of the Committee of Arrangements, asked the members to give to the Building Fund a minimum of one dollar a year for each year of their membership, and as a result over three hundred dollars was raised, in spite of the fact that no previous notice of the offering had been given and that an offering for the Orphanage had just been made which amounted to more than seventy dollars.

In the afternoon a history of the Church was read by Mrs. C. G. Frazier in which many things of interest were pointed out. At the conclusion of the History, Mr. and Mrs. G. W. Berry, the only remaining charter members of the church, were introduced and the congregation stood for a moment in honor of them. Then Mrs. May Hall and Mrs. Blanche Brooks were introduced as the first ones to be baptized into membership of the church, and next Mrs. C. G. Frazier was recognized as the first to be baptized in the present building. Next, the Board of Deacons, consisting of J. C. Pearce, chairman, H. C. Luther, L. R. Barker, W. A. Gregory, C. G. Frazier, E. C. Garner, and E. S. Millsaps, Jr., were introduced. After this a moment of silence was observed in memory of the members who had departed this life, and then the pastor led in a short prayer. Rev. Herman T. Stevens, pastor of the Green Street Baptist Church, High Point, was introduced and spoke very fittingly of the occasion, and also urged the people on to greater things.

The pastor spoke at the evening hour on the subject, "We would see Jesus", in which he pointed out that the Day's observance had pointed out what men and women had done, and what they could do, for the Master. He then urged them to keep on and pointed out the ways in which we may see Jesus today.

Miss Rufine Ward Bride Of Mr. White

Beautiful Home Ceremony Last Evening At Residence Of Bride's Parents.

A lovely home wedding was solemnized Wednesday evening with only near relatives and intimate friends of the bride and groom present when Miss Rufine Ward and Mr. Francis White were married at the home of the bride's parents on Sunset Avenue. Mr. R. C. Lewallen and Mrs. C. L. Millikan received at the front door and directed the way to the living room where the vows were taken before an altar of ferns, trailing cedar and white chrysanthemums. Cathedral candles shed a soft light over the altar making a lovely setting for the ceremony. Before the ceremony Mrs. I. D. Wagger played a violin solo accompanied by Miss Millicent Ward, a cousin of the bride. To the strains of Lehengrin, the maid of honor and only attendant entered. Miss Wright wore a becoming gown of blue georgette trimmed with velvet. The bride wearing a charming traveling dress of blue velvet and georgette, with silver hat and accessories looked most lovely as she approached the altar on the arm of her father, Mr. W. L. Ward. The groom with his best man, Mr. Harvey Horne, of Burlington, joined the bride at the altar and the vows were spoken with Rev. J. E. Fritchard, of the Asheboro Methodist Protestant church, officiating. An informal reception was held immediately afterwards, and Mr. and Mrs. White left for a week's motor trip.

Institute Suit Against R. C. Rankin For \$12,000

Robert C. Rankin, Greensboro resident, is defendant in a damage suit for \$12,000 instituted in Randolph Superior Court last week. Damages are asked by Bettie Ruth Dameron, by her next friend, V. H. Dameron, for personal injuries as a result of an automobile accident on the highway between Julian and Greensboro on August 29th.

According to the complaint sent here for service on the defendant, Bettie Ruth Dameron, with her father, mother and sister, was riding in an automobile that drew up behind that of Robert C. Rankin. The Dameron car's horn was sounded and the Rankin machine pulled off to the side of the road, apparently to permit the other to pass. As the car in which the girl was riding attempted to pass, the other suddenly and without warning, pulled back into the road and a collision resulted.

It is alleged that the girl received serious and severe injuries as a result of the reckless, careless and negligent driving of the defendant who is further alleged to have been intoxicated at the time of the crash. These factors, it is claimed, were solely the cause of the accident, rendering the defendant liable for the damages the girl sustained.

Poison For Rats

Barium Carbonate Properly Used Will Kill Them.

One of the best poisons for rats is barium carbonate. Herewith are instructions as to its use to rid the farm of these pests:

I. Kind of Bait: Three or more kinds of bait should be used. Each must be mixed separately with barium carbonate. One kind of bait from each of the following classes should be used.

(a) Fish meat or other animal substance, such as Hamburg steak, sausage, canned salmon, eggs or oysters. (b) Fresh fruit or vegetable food; such as cantaloupe, tomatoes, green corn, baked sweet potatoes, bananas, etc. (c) Miscellaneous foods, milk or cheese, peanut butter, bread, cake, cereals (raw or cooked).

II. How to Mix: The barium carbonate must be thoroughly mixed with the bait, so that the rats cannot eat the smallest portion of the bait without getting some of the barium carbonate. In the case of such substances as Hamburg Steak, cheese, etc., use one part of barium carbonate to 4 parts of bait. Mix thoroughly with a spoon.

(a) Substances which cannot be thoroughly mixed with the barium carbonate as just described (for example, cantaloupes, tomatoes, etc.) should be cut into small pieces and thoroughly covered with barium carbonate, and then worked with a knife.

III. How to Set Poisons: The three kinds of bait, prepared as above should be divided into small portions, about a teaspoonful each and placed freely about premises, alternating baits 1, 2, 3. It should be set at intervals, not over ten or fifteen feet. Do Not Mix the Different Kind of Bait with Each Other.

IV. General Instruction: The morning after baiting, look for dead rats and remove them. Take up baits. Examine these to see which have attracted most rats. If any kind of bait has not been touched, use a different bait instead of this. Fresh bait must be used each night.

B. Y. P. U. Banquet Enjoyable Affair

Young Baptists From All Parts Of County Attend—Address By Rev. E. C. Dean.

In Asheboro last Friday evening there gathered a happy throng of young people, the occasion being the District B. Y. P. U. banquet planned and looked forward to since the last regular district meeting held on October 30.

This banquet was held in the building formerly occupied by the Brady-Hughes Hardware Company. It was tastefully decorated in green and white, the B. Y. P. U. colors. Two long tables running almost the entire length of the building were hardly sufficient at which to seat the young Baptists who gathered for this evening of fun and frolic.

After finding their places around the tables, the young people remained standing and joined in singing "Onward Christian Soldiers," after which Dr. O. G. Tillman led the invocation. The program, consisting of toasts, readings, stunts and impromptu speeches by some of the guests, was thoroughly enjoyed. The address of the evening was delivered by Rev. E. C. Dean, of Burlington, who brought a message particularly fitted to the occasion and the group of people addressed.

One of the most enjoyable features of the evening's program was the splendid music furnished by the Asheboro Band.

Ten Commandments

J. E. Owens, veteran justice of the peace in Raleigh, and best student of human nature, has compiled "Ten Commandments of Safety," compliance with which would undoubtedly reduce the number of automobile accidents. Here are the commandments: "1. Look out for children. You can never tell what they'll do, and you're always in wrong if you hit one."

"2. Don't pass a standing trolley car. Some day the jury may call it manslaughter."

"3. Don't speed around corners, for it's a straight route to the hospital."

"4. Drive on the right side of the road. It's the only safe side."

"5. The fact that you had the right of way won't bring anybody back to life—least of all yourself. Use discretion."

"6. Do not stop short without giving warning. The other fellow is no mind reader."

"7. Do not back up without looking to the rear."

"8. Do not park or pass on curve or hill. There's plenty of straight road."

"9. Slow down when approaching a crossroad. It is nearly as dangerous as a railroad crossing."

"10. Be courteous to other drivers and traffic officers. Courtesy prevents accidents."

Local Rotarian Hear Dr. Lambert

At Regular Luncheon Last Friday—Talks Of Periodic Health Exam

Tells Of State Work

The feature of the regular weekly Rotary luncheon last Friday in the dining hall of the Asheboro Methodist Protestant church was the address by Dr. W. L. Lambert, who spoke interestingly of health examinations and the progress that had been made in the State in the prevention of disease. Dr. Lambert pointed out the advantages and the necessity for periodic health examination, showing that it was easier to prevent disease and more economical than to cure it.

The doctor told of what the State has been doing for several years past in providing antitoxins to wipe out preventable diseases and of the work that is being done in this field at present. Examination of school children was praised by Dr. Lambert, who stressed the importance of this phase of health work. He also told of the work that was being done by certain life insurance companies in the way of periodic health examinations for their policy holders.

PREPARE THE RADIATOR FOR THE WINTER WEATHER

Raleigh, N. C., Nov. 28.—The careful driver will protect the radiator of his car against winter weather; the man not so careful will let nature teach him a costly lesson.

"Protecting the radiator will protect the motor against freezes and the anti-freezing mixtures are easily obtained and used," says A. T. Holman, agricultural engineer at State College. "Among the various mixtures, that of alcohol and glycerine is most commonly used. In fact, makers of automobiles recommend this combination. It is desirable to clean the radiator before filling with the anti-freezing solution."

Mr. Holman advises draining out all the old water and flushing with a hose allowing the water to run in while the engine is running. If the radiator is clogged or dirty, it may be cleaned by filling with a solution made by using one and one-half cups of washing soda to two gallons of water. Fill the radiator with this solution and run the motor for 15 minutes. Then drain off and wash with clean water until the soda water is all removed. Flush again while the motor is running.

The radiator is now ready to be filled with the anti-freezing solution. For the usual four gallon radiator, a solution made of 3 1/4 quarts of alcohol, 3 1/4 quarts of glycerine and 9 1/2 quarts of water will protect the motor and radiator at zero weather. If glycerine is not readily obtainable, a solution of four parts of alcohol to six parts of water will protect at freezing point. For temperatures ranging between 20 degrees and 32 degrees Fahrenheit a twenty percent solution of alcohol and water made by using two parts of alcohol to eight parts of water will be found sufficient to protect the car.
