If you own your home, you will still be interested in Building and Loan as a savings and investment plan. Returns on your investment are approximately 6 per cent, and there are no taxes to pay. This makes it an exceptional investment.

> Don't trust to luck . . . not even the good old Horse Shoe luck. Make your investments in Building and Loan shares which have a known record for safety for more than 105 vears. For attractive returns,

with safety, no other form of investment equals it. Protected by rigid state laws in combinaion with first mortgages on improved local real estate, it is the one investment that you take no chances with.

# Save With Safety—Hundreds Are

The one feature people are seeking now in choosing a place to invest their savings is Safety-Safety before anything else. In handling the savings of the people of this community over a period of 18 years the first consideration always uppermost in the minds of the directors and officials of this institution has been that of safety. This being realized by the community hundreds have joined this association in saving for various purposes. Some plan to educate their children with the money saved, others plan to build homes, still others plan to remodel the homes which they have, and many are putting aside a certain amount every week or month to be used when old age makes it impossible to earn as much money as they are earning now.
