CROP CONTROL LEGISLATION HITS SNAGS

Britain Urges New "Hand-In-Hand" Tie-Up With U.S.

Seeking Strongest Line-Up Since World War; Points To FDR Chicago Talk.

Lauds Far East Act

Says United States Has Set Way For Peace Loving Nations in World.

London, Nov. 10.—(AP)—The British government today was seeking its closest co-operation with the United States since the World War, advocating a "hand-in-hand" policy in the Far East and elsewhere on the troubled world diplomatic front.

The strong move apparently was the outgrowth of President Roosevelt's Chicago address which encouraged the British after close scrutiny to believe the Washington government might rewrite its traditional policy of isolation.

Prime Minister Neville Chamberlain, who in a speech at Birmingham, October 8, had welcomed the Roosevelt plea for concerted action for peace, went a step further last night in a speech calling for the fullest British-American action.

The Prime Minister hailed the United States' participation in the current Far East conference at Brussels as the "first and most valuable step towards fulfillment of the desire expressed by President Roosevelt at Chicago for concerted efforts by peace loving nations for the scanty of treaties and the settlement of difficulties by peaceful means."

Chinese Expecting Jap Drive Towards Nation's Capitol

Rush Troops Towards New Front as Japan Lands 40,000 Fresh Troops.

Confident of Future

Small Bands of Chinese In Shanghai Holding Off Nipponese Thrusts.

Shanghai, Nov. 10.—(AP)—Japanese reinforcements landed on the south and north shores of Hangchow Bay today for what may become a major drive towards Nanking, China's capital.

Chinese said the reinforcements would mark Hangchow as the first step in the Nanking drive, now that Shanghai is in Japanese hands, except for Nantao, native quarter in which small bodies of the Chinese army are located.

A few Chinese are also holding out on the Pootung, industrial center across the Whangpoo from Shanghai.

Japanese utilized airplanes and artillery bombardment in their effort to drive out the remaining Chinese.

Many bombs fell along the Nantao-Whangpoo water front within a few hundred yards of American and other foreign war vessels anchored in the river.

Chinese said thirty-four Japanese transports already had arrived off the Chekiang coast in the new Hangchow movement carrying approximately 40,000 soldiers. Capture of Hangchow would cut one of the two railroads now open between Shanghai and Nanking.

About one half of the troops landed in the Chaoou section on the north shore of the bay.

Chinese authorities declared the Japanese were confident the Chinese forces now being rushed to the Yuoa would be able to check the new Japanese reinforcements.

Shanghai harbor, off the French concession, today was the scene of a bitter machine gun battle between Japanese warcraft and Chinese troops on both banks of the Whangpoo.

At nightfall three Japanese ships joined in an announcement that Nantao would be bombed unless Chinese withdrew.

Merchant Marine Needs U.S. Help

Commission Reports Ships In Poor Condition; Ask Government Subsidy.

Washington, Nov. 10.—(AP)—The Maritime commission, reporting on a comprehensive study of American shipping, said today that, if private enterprise is not able to restore the nation's fast-aging merchant fleet, the government will have to do the job.

The commission outlined a tentative five-year program for subsidized construction of 65 vessels at an estimated cost of \$137,000,000 including more than \$50,000,000 in government subsidies.

This projected undertaking will require heavy investments of private capital, and the commission expressed doubt as to whether the money would be forthcoming.

Next to financing new construction, it said, the most serious problem is that of stabilizing strike-ridden maritime labor. Creation of a mediation board, similar to that created in 1934 to handle railway labor disputes, was recommended.

Establishment of a school at New York city to train 600 new seamen annually also was suggested.

Both of these proposals long considered, already have drawn expressions of opposition from one labor leader, Joe Cisera, president of the National Maritime union.

One Truck Did This to a Flyer

When a train meets a truck, it's not always the smaller vehicle that gets the worst of the deal, as is shown in this remarkable air-view. This crack Southland flyer hit a truck at a grade crossing in the village of Loveloy, Ga. The engine ended upside-down in an adjoining field and the passenger cars folded together like an accordion. Four persons died in the wreckage.

England Split Wide Open On MacDonald's Historical Work

London, Nov. 10.—(AP)—The fate of James Ramsay MacDonald, the son of a poor Scottish farmer, who lived to decline an earldom, divided Britain today in an appraisal of his life.

Again those who lauded the three-time prime minister as the savior of his country during the dark days of 1931, there were others who regarded him as a traitor to the Labor party which he built.

The 71-year-old prime minister and, first prime minister to visit the United States, died last night aboard a South American bound ship on quest of peace which he had failed to find in his unique stormy political career.

Death apparently was due to a heart attack following a long illness.

Federal Spending May Face FDR Plan to Balance Budget

Washington, Nov. 10.—(AP)—President Roosevelt's reiteration of his intent to balance next year's budget brought the prediction from usually informed observers today that suggestions to increase government spending will get nowhere.

President Roosevelt's budget statement was made at his press conference yesterday, after he was asked if current business conditions had upset his fiscal calculations.

Secretary Morgenthau may bare some of the administration's intentions in relation to present business conditions in a New York speech tonight. He has indicated the subject of "pump priming" might be an official answer to advocates of heavier Federal expenditures to offset any slowing up in the business pace.

Mr. Roosevelt may touch on business conditions in a radio speech next week urging the unemployed to register in next week's census.
