not to exceed ten lines, will be inserted free. All additional matter will be charged 5 cents per line. Payment for transient advertisements must be made in advance Regular yearly advertisements will be collected promptly at the end of each quarter. Advertisements for a

shorter period must be paid monthly. All Communications containing news or a discussion of local matcontaining objectional personalities, or withholds the name of the au-

thor will be published. We are not responsible for the views of our correspondents. Our views are expressed in the editotal columns.

THEO. HOBGOOD, Ed. & Proprietor. C. W. MALONE, Associate Editor. MUD SLINGING.

The practice of "mud slinging' in political campaigns was always disgusting to us. In Virginia it is car ried on to an unreasonable extent. We endorse the following editorial from the New Berne Journal:

"The vindictive manner in which the Richmond papers assail the two political parties in Virginia, filled. But special attention is called Great Invention, each in behalf of his own, is enough to the to disgust all good men with politcowards, murderers, repudiators, assassins, etc., are the epithets which these journals, whose mission | dress it would seem ought to be to enlighten the people, hurl at one another day after day. Is such a July43md. mode of political warfare conducive to the welfare of the country ? Has it not a tendency to drive the better class of citizens from politics into indifference-the most dangerous consequence that ever befell a Republican government.

We remember with pride and satisfaction that this sort of mud-slinging was not much indulged in by the press in North Carolina during sugar, coffee, &c. Although the attempt at it by a lew partians prospects for wheat crops have adwhose zeal for their side for the vanced prices on grain, flour and time being got the better of their hay, we have been very slow to acigest number of papers in the State that these products are costing our reiused to adopt such tactics, not- people too much on account of received the commendation of leadwithstanding the contest was a hard high freight rates and speculation. ing tobacco planters in all paris of

entitled to his opinion in politics, Prices on corn and flour we can't and because his ideas differ from give here as they are constantly A GREAT SUCCESS thhose of his neighbor about certain | changing, but will say that we are public measures, it is no reason that always on the either of them should become a traitor, thief, liar or a scoundrel."

ocratic member of the National offer committee from Illinois and the foremost lawyer of the West, has been in Saratoga for the last two weeks drinking the waters. In speaking of Cleveland and the Administration he said recently: "I am pretty well contented with the President upon the whole. It is right that he should be covservative and go ahead slowly. He has done a great deal to establish confidence throughout the country in the Democratic party which will stand us well in future campaigns. There were people throughout the country before the election who actually believe that Democratic success meant the assumption of the Confederate war debt, the re-enslavement of the negro and the entire surrender of the Government to the forces which conspired to de stroy it. Even these ignorant and prejudiced people have been made to see that Democratic success is a contribution to the further prosperity of the country, and that that party, can be trusted to even a greater degree than the Republia

would not willingly throw himself into the breach made by the loss of a Governor. If the person came near hitting him by accident he should be caught and put into some place where he will learn that Indiana cannot be deprived of a Governer by any such method. It is hard enough for the country to undergo a political campaign in Indiana when it has been conducted on strictly peaceful methods. If war or accident or assassination are to be added there is no telling what might hapen.

We are glad to see that Theo. W. Poole, Esq., State Senator from the second district, has been appointed inspector of public lands. The office is a responsible and lucrative one, and Mr. Poole deserved such substantial recognition at the hands of the government.-News and Observer.

To the Public. As the health of our partner, Capt.

J. M. Jones, makes it necessary 1) do business one place instead of wo, we will, on Monday the 17th of August, close one and remove the whole stock of goods to our store at the corner of Depot street and Patton Ave-The store has been recently en-

larged. We will keep a delivery wagon and fill orders promptly and carefully. MORGAN & JONES.

Tobacco Planters.

Thousands of Dollars, much Time, Labor and Expense, can be saved by All the Departments will be ably using HARDWICKE & WELLES'

ical campaigns. Frands, traitors, Commercial Department. The Heat Regulating Attachment,

MATTER OF DOUBT, BUT RE-DUCED TO A CERTAINTY.

This highly useful invention has

by those who have given it attention. And those who have tested it thoroughly say that no farmer should at tempt to cure his tobacco without it. Its use will prevent tobacco from being sponged, spotted or scalded, and will give it a uniform, bright, beautiful golden color, which will, of course, greatly enhance its market value. This

"HEAT REGULATOR"

is constructed upon scientific principles, and distributes the heat evenly in every part of the barn. To prove this fact conclusively, five thermometers may be hung up, one in each corner and one in the center of the barn, and they will register the same degree of heat.

The Invention consists of an extra Pipe filled full of small holes, and running around and on top of the old Flue, taking cold air from the right, left and center of the barn. The cold air being the heaviest falls to the bottom of the barn, and at once becomes heated and lighted, then rises to the top of the barn, taking a certain quantity of hot, dead, damp air as it arises, passing out through top of barn through ventilators, thus producing a constant circulation of hot, TO GET A GOOD JOB dry, fresh air, and a constant evaparation, and saving at least twenty-Orders are coming in so rapidly

that farmers are urged to make an early application for the number of

"Heat Regulators,"

they desire in order to get them, in paper published in the State. Teltime to be used in curing the present
