gence's Speech on the Negro Question

Washington, Jan. 30.-After the regular routine morning business was completed, the Senate today listened to speeches by Senators Vance and Hamp-Senator Butler's negro emigra-

tion bill. Mr. Vance's speech took a humorous turn, aud was frequently applauded by the er generation.

and children.

joritv. Since the war whenever the negro had rule, his course had and the victims Democrats.

begun to prosper only when the representative of the county in the Gencontrol of affairs had been taken eral Assembly. He is a Democrat and from his hands.

of the popular vote north of forty-first senatorial district and was Mason & Dixon's line, to the exclusion of the negroes from sembly by Capt. M. C. Toms, of Hendertheatres and other places there. | son. He said it was to be hoped that one black man would be chosen to represent that section in Congress some day, and that the intelligent black man might theUnited States somewhere else than in Hayti or Liberia. (laugh-

Mr. Vance said notwithstand ing the threats of Mr. Ingalls, he believed that the people of the North would rush to the rescue of their southern brethren if that uprising of the negro should occur; but the South would not need their help. If that uprising should come, it would bring the solution of this race difficul-

Mr. Vance said that he did not claim that the negro was incapable of civilization, only that he could not keep pace with the progress of the white race. His solution for the race problem was "hands off." If the north would cease to interfere there was no danger that the negro would be driven to the wall. Every speech in the Senate denunciatory of the southern people, only postponed the coming of that day of harmony between the white and the bill of the Senator from South Carolina for assisting the removal of the negro from the south, reached the case. Few States under its provisions, and those probably would be the best. There was plenty of room and western states. If, said he, the negro is a good thing, let us divide him. (Laughter.)-United Press Dispatch.

HOLOCAUST IN WASHINGTON.

Mrs. Secretary Tracy, Miss Tracy and a Servant the Victims.

A terrible calamity occurred in Washington City on the morning of February R. L. Allen and R. E. Ellis. 3. The house of Secretary Tracy of the Navy caught on fire and in spite of the heroic efforts of the firemen Mrs. Tracy and a daughter received such injuries that death resulted. Mrs. Tracy was found by the firemen in her bed in a state of suffocation. She was carried out, but every effort to restore her to consciousness failed and she died within a few minutes of hemorrhage. Miss Tracy's body when found was already himself was found in a state of suffocation and removed from the house. He was restored after hours of exertion and

family made narrow escapes. Another account of Mrs. Tracy's death is that she received her fatal injuries by dropping from a window in the effort to estate; G. D. S. Allen & Son and McInescape from the flames.

Williams. charred beyond recognition as was also dealers in general merchandise; Moody the body of a servant. Secretary Tracy & Reinhardt, hardware; C. S. White, stoves and tinware: C. F. Ray and F. Poindexter, furniture; J. R. Justice. will recover. Other members of the books, toys, etc; Jno. M. Davis, watches respondents to direct their matter to the jewelry, etc.; W. O. Muller & Co., wine and liquor store; W. W. Stringfield, real tosh & Co., drugs and medicines; Mrs.

M. E. Chastain, millinery etc., are the leading houses in their respective lines in the town. The Courier, a live Demis the official organ of the county. Waynesville needs a first-class hotel, however, and her citizens should stir themselves in the matter.

The Berry Case.

The case of John Berry for killing George Bell, which resulted in a mistrial at the last term of the Criminal Court, is now on trial. An application for change of venue in this case was refused and a special venire of 200 ordered.

Solicitor Carter. We wish to commend the action of Solicitor Carter of the Criminal Court in consenting to submissions of manslaughter in both the Fore and the McElrath cases. Many a guilty man escapes by the action of solicitors insisting on that which is not justified by facts; in other words, insisting on prosecution for murder when the case only involves manslaughter. Jurys will convict frequently for manslaughter, when the insistence of the prosecution for mur der brings about either acquittal or mistrial; the jury not believing the prisoner to be guilty of murder, yet, owing to argument and charge, are embarrassed, are led to believe the prisoner must be hung, which they believe ought not to be, or be acquitted, which they equally believe he ought not to be. If solicitors would draw the distinction in their prosecutions between murder and manslaughter, we believe there will be more convictions, and punishments of those who take law in their hands and slay their fellow men.

We believe in hanging, yet we believe that proper discrimination should b made, and an honest solicitor is called on to make it.

STATE NEWS AND GOSSIP.

An effort is being made to put an iron furnace in Murphy.

The Murphy Bulletin says grading on the W. N. C. R. R. is getting on the home stretch. The last ten miles of solid earth has been removed.

Charlotte has secured the location there of the Lutheran Seminary with a subscription of \$25,000. She will now turn her attention to the Baptist College which Raleigh is trying to get and Durham, but not having yet raised enough

A special from Reidsville to the Atlanta Constitution dated January 28, savs: As was well known, there was more at stake in the trial of Mrs. Cora Morris, charged with causing the death of her husband by chloroform, just closed, than the mere conviction or acquittal of the prisoner. There is the large estate of Mr. Morris, bequeathed in his will to his wife, and a ten thousand dollar insurance policy on his life, also payable to Mrs. Morris. The acquittal of the prisoner, of course, throws all this into her hands, whereas if she had been convicted the will of her husband would have been null and void. This is the home of Mrs. Morris, and it is located in this thriving town where is located most of the property mentioned in the will of Mr. Morris. It is learned to-night that there will be yet more lawsuits over the matter, and there is more unrest in store for pretty Mrs ries, but many families take boarders Morris. The relatives of the dead man will contest his vill on the charge of the infidelity of Mrs. Morris and overpersuasion on her part in inducing her husshand to make its provisions in her favor. The Mutual Benefit Life Insurance Company, of Newark, N. J., announce that they will fight the case until judg

ment day before they will pay over the ten thousand dollar policy.

The Compound Microscope.

In Germany and Holland learned men are preparing to celebrate the invention ocratic weekly, published by Bean & of the compound microscope, which oc-Rogers, enjoys a liberal patronage and curred in 1590, at the beautiful Dutch city of Middelburg. The idea of the instrument was originated by a firm of spectacle makers of Middelburg, Han-Zansz, or Jansen, as it is often given, and his son, Zacharias Zansz. It is not known whether it was the father or the son who first thought of using double lens, but probably it was the son. He made microscopes for several years of such excellence that they were not materially improved upon until the present

> Every drop of water can be a microscope. This we often perceive when by chance a drop has exactly under it some small object with which we are acquainted. It is magnified by the liquid

lens, as it would be by one of crystal. The most ancient civilizations possessed the art of producing convex glasses with magnifying power, for they have been found in the ruins of their cities. Such glasses had, and still have. many important uses, but it was the combination of two lenses which began the development of that marvelous instrument of modern times, the compound microscope.

Why should men celebrate the three hundreth anniversary of such an inven-

The complete answer to this question would fill an encyclopedia in many large volumes. Take, for example, the art of healing, which has made more real progress during the last century than it had made before from the beginning of time. It is indebted for this advance chiefly to the use of the microscope, which has revealed essential facts as to the nature and causes of disease, and thus suggested both the means of avoiding and of cur-

Botany, zoology, geology, chemistry, all are greatly indebted to this instrument, and the debt is increasing every hour. A pall of darkness would fall over the future of science if the microscope were stricken out of existence.-Montreal Star.

Compressed Air as a Motive Power.

The use of compressed air as a motive power for tramways in France is extending. The system adopted is that invented by M. Mekarski, the director of the Nantes tramways, which have been opened since 1879. Two years ago the system was successfully applied on the tramways at Nogent, in the neighborhood of Paris, and more recently on those of Berne and Limoges. This year the tramways of Lyons. The inventor asserts that his system is far more economical than horse traction-the cost of coal per day of a machine equal to eight or ten horse power being only four shilsimple and does not require a skilled mechanic to control it.

The British consul at Nantes, in a recent report, states that "the tramways of that town, which are worked by the system of M. Mekarski, alluded to above. continue to give satisfaction. The cars are comfortable and run smoothly, with little noise. They do not interfere with the general traffic in the streets, and their immunity from accidents is remarkable. The average speed is about eight 'miles per hour; but it can be easily increased or moderated, and in case of need ar almost instantaneous stoppage effected. -Once a Week.

The "Grippe" in St. Petersburg.

A correspondent of The British Medical Journal thus describes the "grippe" as it manifests itself in Petersburg: "It is frequently spoken of in the lay papers as influenza, but the typical symptoms of this disease are far more frequently absent than present, and the only features in common are the rapid course, the extremely rapid spread, and the frontal headache, the great running of the nose and eyes being absent in all the cases that I have ever seen. The two most prominent symptoms in the present epidemic are those of high temperature and great frontal headache, accompanied in many cases by pains in the eyeballs, and for sale. in all by foul tongue and breath, constipation and general malaise.

The onset is rapid, the temperature running up at once to 39 degs., 40 degs. C. or even higher. The pulse in those cases I have seen is not raised proportionately with the temperature. In some cases there are added the symptoms of catarrh of the nose and frontal sinuses, in others there are sore throat and catarrh of the deeper air passages, and in many there are vague rheumatic pains longed to six or eight days, or even long- Boots, Hats, many of them bought for er, and convalescence is rapid."

Artificial Ice.

the manufacture of ammonia on a large scale for use in refrigerating machines. Every large consumer of ice needs such a machine to fall back on when no ice crop is made, even if it is not desired to use artificial ice regularly. The freezing machine has many advantages over the ice box. There are no slops: no heavy lifting has to be done: the cold storage store. room is always kept at an even temperature just below freezing point: the cake are of uniform thickness, and their weight is always known; and, in fact, the refrigerating business is revolutionized by the artificial process. Moreover, the ice is just as clear, pure and free from bacteria as natural ice. During the next season the process will be the mainstay of large consumers of ice in St. Louis, and may be extensively resorted to for sale to small consumers, as natural ice will necessarily be very dear.-Interview in St. Louis Globe-Democrat.

The hydrocarbon process of treating iron so that it will not corrode is sei' cost less than one-half of that of g izing, while the durability, was .. conditions, is considerate
