Self-Reliance in Business. In his recent address before the New Hampshire State board of agriculture Mr. Edward Atkinson declared that the sturdy self-reliance which once formed the basis of the American character has been sapped and warped by the growing dependence of people on the help of the government instead of using their best efforts to work out their own deliverance and shape their own destiny.

Men with well-knit figures are seldom worsted in a fight.—Pittsburg Dispatch. A number of our readers have requested that we publish the Ocala (Alliance) demands in full. Here they are: 1. We demand the abolition of national banks.

About Accidents. The collection of large groups of facts about accidents, which has been made necessary by the development of accident insurance, has made a contribution to one department of social science that is by no means uninteresting.

It therefore often happens that a man is more likely to be a victim of an accident of a kind that he never thought of than of the kind against which he insures himself. 3. We condemn the silver bill recently passed by congress, and demand in lieu thereof the free and unlimited coinage of silver.

4. We demand the passage of laws prohibiting alien ownership of land, and that congress take prompt action to devise some plan to obtain all lands now owned by aliens and foreign syndicates; and that all lands now held by railroads and other corporations in excess of such as is actually used and needed by them be reclaimed by the government, and held for actual settlers only.

5. Believing in the doctrine of equal rights to all and special privileges to none, we demand— a. That our national legislation shall be so framed in the future as not to build up one industry at the expense of another.

6. We demand the most rigid, honest and just state and national governmental control and supervision of the means of public communication and transportation, and if this control and supervision does not remove the abuse now existing, we demand the government ownership of such means of communication and transportation.

7. We demand that the congress of the United States submit an amendment to the constitution providing for the election of United States Senators by direct vote of the people of each State.
