MANUFACTURED ICE.

For the information of the public and to correct erroneous ideas on the subject of artificial ice, we give the following facts in regard to the manufacture of ice: Our manner of making is to distill the water by condensing in, thus making it absolutely pure. Then passed over charcoal to completely deodorize any remaining traces of impurities, after which cans filled with it are in brine chilled below the freezing point, and remains until it is frozen as clear as done. It is most as solid as glass. This is human use. It lasts one year. It is natural ice and has all the qualities of the high priced table ice. First Domestic. Second Domestic. All: Fin married.

THE SALT SECTION

OF THE MILLS BILL, UNDER CONSIDERATION

In The House of Representatives Yesterday.

By Telegraph to the SUN.

WASHINGTON, D. C., June 8.—HOUSE.—The tariff bill was taken up in committee of the whole, the salt paragraph being under consideration. A dreary debate followed, not always confined to the salt paragraph, but wandering off to prunes, plums and grain sacks. Finally a vote was taken on the motion made by Burrows, to strike out the paragraph, and it was rejected.

An amendment, offered by Grosvenor, of Ohio, to exclude bulk salt from the free list, admitting only dairy and table salt, met with a similar fate. This concluded the consideration of the salt paragraph.

Bayne, of Penn., offered an amendment to insert rice, cleaned and uncleaned, in the free list. Rejected.

The four lines relating to flax were read, and Brown, of Ind., moved to strike them out of the free list. Pending the debate, the committee rose.

On motion of Davidson, of Ala., a bill was passed authorizing the Birmingham, Selma & Northern Railroad Co. to construct a bridge across Tombigbee river, Alabama.

The House then, at 5 o'clock, took recess until 8 o'clock; the evening session to be for consideration of private pension bills.

A WATERY GRAVE.

T. H. Garrett, of Baltimore, Md., Drowned.

By Telegraph to the SUN.

BALTIMORE, Md., June 8.—T. Harrison Garrett, brother of Robert Garrett, and manager of the banking firm of Robert Garrett and Sons, of this city, was drowned last night in the Patapsco river. His yacht, the *Glean*, in which he and a party of friends were coming to Baltimore from Annapolis, was run down off Seven Foot Knoll, by the steamer *Japan* and sunk, being struck amidship and almost cut in two. According to account all hands on the *Glean* were rescued except Mr. Garrett, who was seen by a passenger on the *Japan* to fall overboard.

All hands on the *Glean* excepting Garrett were saved. Some of them climbed on board the *Japan* and the remainder took to boats and were taken on the steamer, after an extended search for Garrett. Garrett was in the act of attempting to climb up the anchor chains of the steamer when the vessels drew apart and he went overboard along with one of the boats of his yacht and some wreckage, and was not seen again. Presumably he was stnmed by falling among the wreckage. The yacht sunk where she lay.

General Sheridan's Mother Critically Ill.

By Telegraph to the SUN.

CHICAGO, ILL., June 8.—A dispatch from Somerset, Ohio, says: Mrs. John Sheridan, mother of P. S. Sheridan, who has been ill for some time, had another relapse yesterday afternoon and is in a critical condition; the doctors fear she cannot live. The serious illness of her son, Phil, has never yet been made known to her for fear of serious results. Constant communication, both by telegraph and telephone, is kept up with General Sheridan's house in Washington, D. C.

YOUNG DEMOCRATS.

Enthusiastic Demonstration Last Night in Raleigh.

By Telegraph to the SUN.

RALEIGH, N. C., June 8.—There was a great demonstration here to-night in honor of the democratic nominees, State and National, under the auspices of the Young Men's Democratic Club, which paraded the streets, the members wearing white hats and carrying canes and red bandanas. Bonfires were blazing everywhere and houses on the line of march were illuminated. The enthusiasm was great. Addresses were made by several distinguished men, among them being Hon. D. G. Fowle, democratic nominee for Governor.

A Shortage of \$35,000.

By Telegraph to the SUN.

CENTRAL CITY, NEB., June 8.—The committee appointed by the county commissioners to examine the books of Treasurer W. S. Webster, has reported a shortage of \$35,000 in his accounts. Webster's deputy, Otto Foster, was also found to be short \$10,000. Webster has property worth \$20,000, which it is said he will turn over to the county.

Resigned from the Ministry.

By Cable to the SUN.

BERLIN, June 8.—The *Post* and *National Zeitung* both state that Herr Von Puttkamer has resigned from the ministry.

New York Stock Market.

By Telegraph to the SUN.

NEW YORK, June 8.—There was but a dull movement in prices in the stock market to-day, fluctuations being very narrow. An unfavorable rumor regarding Missouri Pacific was circulated, without effect however, but Denver & Rio Grande was forced off 2 3/4 per cent, on the uneasy feeling in London over the rumor of the passage by that company of a dividend on its preferred stock. First prices were 1/2 to 3/4 lower than last night. These were supplanted by a further fractional loss, but animation soon ceased and some covering was done by traders, toward the close; which was dull and firm generally, at small fractions below first prices. Reading and St. Paul are the only stocks which showed any animation; sales aggregated 96,000.

New York Cotton Market.

By Cable to the SUN.

NEW YORK, June 8.—Hubbard, Price & Co., in their report on cotton to-day, say: With Liverpool opening quotations are 1-16 higher. Our market has been without much animation but has been pretty steady all day, slowly but steadily advancing 6 points, and the closing was well maintained, at best figures reached. The official closing of Liverpool with the morning's advance partially lost seemed to have no influence on ours. A certain demand here has been waiting to absorb the floating supply, and anxious and nervous shorts were eager buyers. The week's receipts at interior towns point to 4,100 bales. Stocks will show a loss of 10,000 bales.

The Cotton Crop in Egypt.

By Cable to the SUN.

CARLO, June 8.—In upper Egypt the cotton crop is forward and in excellent condition. In some Provinces, however, it is backward but healthy. The season is cold—water is abundant. The Sultan has dismissed Member Pacha, the President of the Council, the Minister of Foreign Affairs, and the Minister of Justice, and has summoned Riaz Pacha to form a cabinet.

Paper Mill Burned.

By Telegraph to the SUN.

MILWAUKEE, Wis., June 8.—A special from Appleton, Wis., says: The Atlas Paper Mill, owned by a stock company, controlled by the Kimberly Clarke Co., was totally burned this morning. The fire is supposed to have started in the vicinity of the boiler. Loss \$150,000. Insurance from \$50,000 to \$60,000 in Mutual companies.

U. S. Bonds.

By Telegraph to the SUN.

WASHINGTON, D. C., June 8.—Bond offerings to-day aggregated \$386,500. Accepted—\$10,000 registered 4s at \$127, and \$40,500 registered 4 1/2s at \$107.

A remarkable freak of nature, a mare known as the "Oregon Beauty," was recently on exhibition in Louisville. Her color is a sorrel, and that of the mane, tail and forelock a creamy tint. The mane is ten feet in length, the forelock four feet, while the tail sweeps the ground. Although the mare is eight years of age, the mane and tail are of only four years' growth, having grown an average of two feet a year during that time.

The Tennessee Midland railroad is now open for business from Memphis to Jackson, a distance of eighty five miles, and work is being pushed on the line eastward between Jackson and the Tennessee river. This road is to enter Virginia at some point west of Bristol, and connect with the projected Virginia Western railway, which will traverse a country rich in minerals and timber and tap the Chesapeake and Ohio road somewhere near Clifton Forge. The Tennessee Midland will yet have to make a stretch of some three hundred miles before it strikes the Virginia line.

A new plan of irrigation has just been inaugurated on the Pawnee River, south of Larned, Kansas. A large wheel is placed in the edge of the water, which resembles somewhat a double windmill. The wheel is so constructed and connected that it is kept constantly turning by the current. To the rim of the wheel is attached eight large troughs, each holding eight gallons of water. As the wheel turns these troughs dip up water, carry it to the highest point of the wheel and there empties it into the irrigation ditch. Through ditches and laterals it is then carried to the adjacent land. By this means the river by its own force is constantly turning a stream of water on the surrounding country.

Beats the Egg Problem.

Now here is a nice little problem that some of our exchanges think beats Donnelly's cipher. Try it and you will be greatly surprised, if not thoroughly convinced: "Put down in figures the year in which you were born; to this add 4; then add your age at your next birthday, provided it comes before January 1, otherwise your age at last birthday; multiply result by 1000; from this deduct 677,423; substitute for the figures corresponding letters of the alphabet, as A for 1, B for 2, C for 3, D for 4, etc. The result will give the name by which you are popularly known."
