

For the Centennial... CHARADE.

Answer to Charade in No. 18, by M. M. Shields, "Vote for Street Sweeper for Legislature of Deeds."

My first is in wool but not in beef, My second is in wool but not in sheep, My third is in wool but not in frog, My fourth is in earth but not in soil, My fifth is in wool but not in hair, My sixth is in wool but not in shirt, My seventh is in wool but not in eye, My eighth is in wool but not in leg, My ninth is in wool but not in leg, My tenth is in wool but not in leg, My eleventh is in wool but not in leg, My twelfth is in wool but not in leg, My thirteenth is in wool but not in leg, My fourteenth is in wool but not in leg, My fifteenth is in wool but not in leg, My sixteenth is in wool but not in leg, My seventeenth is in wool but not in leg, My eighteenth is in wool but not in leg, My nineteenth is in wool but not in leg, My twentieth is in wool but not in leg.

Do Something.

On their way to the boat, the Captain improved the opportunity to impress his ventral companion with a due sense of the dangers of life, and of the necessity of a constant watch over himself, if he wished to escape the many temptations to which he would be exposed.

The shadow of an Ass.

In ancient Greece they had a proverb that ran thus: "To dispute on the shadow of an ass." This took rise from an anecdote which Demosthenes is said to have related to the Athenians to excite their attention during his defense of a criminal which was being but inattentively listened to.

Fish Propagation

Congress has just made an appropriation of \$20,000, to be immediately available, for continuing, under the direction of the United States Commissioner of Fish, the propagation and introduction of useful food-fishes into the waters of the United States.

A person who was recently called

to court for the purpose of proving the correctness of a surgeon's bill, was asked by the lawyer whether the doctor did not make several visits after the patient was out of danger? No, replied the witness, I considered the patient in danger so long as the doctor continued his visits.

Feeding Horses.

For a period of over thirty years, numerous horses have been under my control. I personally supervised the feeding. During this time no horse has died and I have had little sickness. A straw cutter, with a rawhide roller, has been in continual use till the present time. In the cutting of food for two teams, enough is saved in one year to pay for its purchase.

Sheep on the Exhausted Cotton Plantations of the South.

Capitalists in this country are extraordinarily ignorant of the extensive field now opened for speculation in real estate, or they would take advantage of the present opportunity to possess themselves of the old cotton plantations, and the great growth of cotton and wool, for they could make ten times more by wool than cotton, and get all the mutton as an extra profit.

"The volumes before us show a vast amount of diligence; but with Webster it is diligence in combination with fancifulness. With Worcester, in combination with good sense and judgment, WORCESTER is the soberer and safer book, and may be pronounced the best existing English Lexicon."—London Athenaeum.

"The best English writers and the most particular American writers use WORCESTER as their authority."—New York Herald.

"After our recent strike we made the change to WORCESTER as our authority in spelling, chiefly to bring ourselves into conformity with the accepted usage, as well as to gratify the desire of most of our staff, including such gentlemen as Mr. Bayard Taylor, Mr. George W. Swallow, and Mr. John R. C. Hassard."—New York Tribune.
