### SOUTHERN SPENDING MONEY.

To Double Track Main Line From Washington to Atlanta. Atlanta, Ga.—Greatly increased activity in the work of improving and double tracking the main line of the Southern Railway from Washington to Atlanta is presaged in the announcement by the company that a contract has just been closed with the Tennessee Coal and Iron Company for thirty thousand tons of 85-pound steel rails to be delivered from its Birmingham plant between June 1 and December 1, 1910, at the rate of 5,000 tons per month.

This contract calls for the expenditure of \$900,000 by the Southern Railway Company for rails alone and will provide the steel for the laying of 35 miles of track per month for the next six months. This work will furnish labor to an army of men and will also greatly stimulate other industries. An order for 5,000 kegs of spikes was recently given the Atlanta Steel Company and the purchase of a great amount of other material will be necessary for this work. In getting these orders to Birmingham and Atlanta plants the Southern is carrying out its policy of patronizing Southern industries.

This great order for steel will be used in the work of improving and double tracking the main stem between Washington and Atlanta. A large part will be used in replacing steel now in the track which will in turn be used to better the tracks of some of the secondary lines.

### MAN FINED \$16,000.

C.—George Dearman, a well known man in Spartanburg, was fined \$16,000 or fourteen years on the city chaingang, in police court, having been convicted on 166 counts of violating the whiskey ordinance. Dark Day in New Orleans. New Orleans.—Volcanic dust, blown from three craters in eruption in Mexico and Central America, mingled with clouds of unusual density, was responsible for "the darkest day" in New Orleans and chickens going to roost several hours ahead of time, according to Capt. Two Volcanoes Busy. Managua, Nicaragua.—The twin volcanoes of Alta Gracia and Madra, each 500 feet high, on the island of Ometepe, in Lake Nicaragua, are in eruption. The fear of an eruption is said to have much to do with the dispersing of the rebel army under Chanorro, the superstitious troops taking it as an omen and deserting. The inhabitants of the lake shores are in panic.

Earthquake Recorded. Washington.—An earthquake shock of six minutes' duration has been recorded by the seismograph at Georgetown university. The indications are that the disturbance was far distant from Washington.
