VOLUME—XIX

BREVARD, NORTH CAROLINA, FRIDAY, JUNE 19, 1914.

NUMBER—25

BREVARD INSTITUTE NOTES.

The Summer School is in its second week of the session. Thirty six are on the roll not counting those who dropped out after a day or two. Those who are planning to teach are doing regular institute work; others are taking vocational academic work as they prefer. There are instructors enough to give any course for which there is a reasonable demand. Quite a number of students are taking commercial branches and domestic art, and a class is being organized in expression.

Mrs. J. B. Clayton gave an expression recital in the Institute Chapel, Tuesday evening of this week. She is thoughtfully trained as an elocutionist and has a large selection of pieces which she gives. Her attractive personality and her intense love for her work enable her to inspire others with her enthusiasm. At the close of the recital refreshments were served by the lady teachers. The evening was very enjoyable to all who were present.

Mr. Blum and his assistants are rejoicing over the continuation of the excellent farming weather. They are operating Maj. Breese's orchard, farm, and garden, and are cultivating more land on the Institute property than before. The crops are all doing well. The garden is coming on nicely and is helping with the table. Cane is up and potatoes and corn are doing nicely.

The new building is taking on its finished form. Windows are being put in and the plaster is going on very rapidly. The roofers are working on the cornice, which adds a good deal to the looks of the building. A furniture drummer who has visited a number of schools this spring and summer stated that he had not seen so good a building in this part of the state. This seems to be the opinion of all those who have seen it.

A PHENOMENAL FEAT

Editor Sylvan Valley News:

Please publish for the benefit of the visitors that they can obtain the Brevard booklet at Mr. Doyle's store to send to inquiring friends. The writer wishes to congratulate the compilers of that booklet upon their phenomenal feat of getting out a handsome and attractive booklet of Brevard without showing any of the views around Brevard. Why not have Caesar's Head (of national repute), Dunns Rock, Seecoff, etc. "A land of waterfalls," and none of Brevard's waterfalls shown—Looking Glass, Maiden Hair, Conestee, Glen Cannon, etc.

This is written in a spirit of forgiveness, as they may not have known any better, but it is hoped that the fault will be corrected next time.

A SUBSCRIBER INTERESTED IN BREVARD.

FATHER'S DAY

The idea of a Father's Day celebration, which originated with Mrs. John Bruce Dodd of Spokane, Wash., has grown in favor until a number of cities have taken it up and will have Sunday observances of it on June 21st.

At the Presbyterian church next Sunday morning Rev. E. H. Norwood will give recognition of the occasion in his sermon. His text will be the two words, "My father," taken from II. Kings, v:13.

Mother's Day has been in vogue for some time, but the father has had to wait long for the appreciation due him. It is significant that the idea of Father's Day originated with a woman.

A SUGGESTION.

We do not think that the Democratic party of Transylvania county could select better standard bearers than J. M. Kilpatrick for sheriff and T. T. Loftis chairman of Board of County Commissioners. Competent, safe, sane, and progressive.

DEMOCRATIC VOTERS.

RECEPTION AT MANSE.

A very enjoyable affair was the reception given Monday afternoon and night at the "Manse" by Rev. and Mrs. E. H. Norwood to his congregation and their friends.

The delightful occasion was the anniversary of their marriage and of Mr. Norwood's pastorate and birthday.

The home was tastefully decorated in beautiful cut flowers and plants. The hostess was graciously assisted by Mrs. M. M. King and others who presided at the punch bowl, and a bevy of young ladies who served the delicious punch and cake.

A number of musical selections were rendered, among them piano solos by Miss Margret Blythe, Mrs. Edmond Woodbridge, and Miss Blair, violin and piano selections by Miss Blair and A. B. Riley; vocal solos sung by Miss Allie Cantrell, Miss Allie Bellie Cloud, and Miss Rosa Llyue.

Mr. and Mrs. Norwood were the recipients of several lovely pieces of cut glass as the anniversary was the crystal wedding.

At ten o'clock the guests departed after wishing the host and hostess many happy returns and expressing many thanks for a most delightful evening.

VISITOR.

WANTS DAMAGES

An unusual case was instituted in the Buncombe county Superior court yesterday with the filing of the complaint in the action of E. C. Ehard against the Southern railway company, in which the plaintiff seeks damages in the sum of \$500 on the allegation that his feet were frost bitten by reason of the failure of the railroad company to have its cars properly heated. The plaintiff contends that he was employed as a railway mail clerk on the line between Asheville and Toxaway, and the complaint contains the allegation that his feet got so cold that they were frost bitten last February. In the complaint it is alleged that it is the duty of the company to keep its cars warm and the plaintiff claims that it failed to do so. Allegation is made that the mail clerk's feet caused him much physical suffering and mental anguish and the physical and mental suffering incident to having cold feet was such as is claimed that the plaintiff should receive damages from the company.

The complaint was filed by McGill and Bennet, attorneys for the plaintiff.—Asheville Citizen.

PENROSE BETTERMENT

The Betterment society at Penrose has, in the course of its history, done much good work. This week, responding to an appeal from the president, Mrs. L. F. Lyday, a number of the members and other citizens met at the school house and put things in order there for the coming school year. Scrubbing floors and washing blackboards were some of the good things done. Later the society will have charge of shielding the windows with strong wire, a wise provision in any public school.

At noon all hands stopped work to enjoy a beautiful basket dinner, and after this recess fell to work again. Besides tidying up the school rooms, the workers did much to clean up and beautify the cemetery grounds.

Superintendent Henderson went down from Brevard, and besides lending his official inspiration to the workers lent his muscle to the work.

The Betterment society at Penrose is to be congratulated on their enterprise and public spirit. With such an asset their school should have a successful year.

Can't Keep It Secret.

The splendid work of Chamberlain's Tablets is daily becoming more widely known. No such grand remedy for stomach and liver troubles has ever been known. For sale by S. M. Macfie. adv

GRADED SCHOOL TEACHERS

Thursday morning the committee of the Brevard graded school met to consider applications and elected the following teachers:

J. B. Bridges, principal; Miss Verna Goode, seventh and eighth grades; Miss Doris Edwards, fifth and sixth grades; Miss Frances McIntosh, third and fourth grades; Miss Georgia Bell, second grade; Miss Irene Montgomery, first grade; Miss Allie Cantrell, substitute.

Mr. Bridges, Miss Goode, Miss Edwards and Miss McIntosh have signified their acceptance.

BETTER BE VACCINATED.

We quote for your information and warning a brief, interesting statement from the bulletin issued by the Chicago department of health. It interests the whole of the United States.

Read it through carefully:

On or about December 19, last an unvaccinated man came to Chicago, sick with smallpox. When first taken sick he was visiting in Fort Worth, Texas. From there he moved to Kansas City, where he went about unrestricted for several days, then coming to this city—the nature of his illness still undetermined.

In Chicago he visited a barber shop on Sixty-third Street, and as the attending barber was not vaccinated, he gave his disease to the man who shaved him.

He also gave it to his four-year-old child.

Just around the corner from where this man lived there was a family of four young men, all four unvaccinated. It is probable that the sick man met one of these young men in his travels about the neighborhood. At any rate, one of the young men was taken sick and was treated for chicken-pox, until his three brothers also fell victims to a similar disease.—Then smallpox was suspected and the department of health was advised.

Notless many persons have been exposed to these cases, the trail leading from Fort Worth, Texas, to Kansas City and Chicago. Fortunately, most persons exposed had been vaccinated at some previous time, and for those so protected no ill results are expected.

Only those not vaccinated need worry about smallpox.

At the present time we have seven persons victims of smallpox in the Isolation Hospital, not one of whom have ever been vaccinated.

Don't it look as though vaccination is a simple precaution that every one should adopt?

How about yourself?

Those that are vaccinated do not get smallpox.

The North American Indians died of smallpox as rapidly as they did of whiskey—not vaccinated and had not been made immune either to whiskey or smallpox.

When smallpox strikes an Indian village the victims all die. If there happens to be a white man or a half-breed vaccinated, he does not die. Bear that in mind.

The little city of Niagara Falls—inspired by a number of ignoramuses, including some so-called doctors—decided that vaccination was foolish, and decided also not to be vaccinated. They managed to get control of the little local government and to stamp out the belief in vaccination—for a few minutes.

Presently that little community found itself with more cases of smallpox than the whole city of New York with 5,000,000 inhabitants.

It is one thing to theorize, and quite another to have the smallpox. Have yourself vaccinated, have the children vaccinated.

Do not listen to idiots, no matter how well meaning, but listen to the facts, which show that a disease which used to kill hundreds of thousands in a year is now practically stamped out, so that in a city of 5,000,000 you may not find two cases of smallpox where formerly you would have found perhaps 50,000 in a year—and a death in almost every case.—Arthur Brisbane.

FINANCIAL REPORT
