SIX COLD MONTHS AHEAD!

OCTOBER NOVEMBER DECEMBER JANUARY FEBRUARY MARCH

Have you been thinking of the bitter cold days that are swiftly coming—days that will cramp your family into a few drafty, damp, cold rooms—unless you install a

Favorite Base Burner

For Winter Comfort Burns Least Fuel

The Favorite will fill every nook and corner of your home with plenty of clean, fresh, healthful heat. Even in blizzard weather, the Favorite keeps upstairs and down evenly and luxuriously warm day and night. And it saves from \$10 to \$20 a winter on fuel bills alone.

Why pay the highest possible price for discomfort, drudgery and fuel waste of that inefficient, common heating stove that you used in your home last winter?

Why not get the full use and value of all the home space, by the comfortable warmth and ventilation of the Favorite—at half the cost you paid for heating one or two rooms last year?

There are many feet of flues on the Favorite—all set out from the stove and separated from each other. Every bit of heat from the fire must pass through them and be radiated into the rooms. None ever passes up the chimney.

This is but one of the many exclusive features of the Favorite that insure home comfort and fuel economy. Let us tell you about the others. It is not too early to plan to protect your family against the ills that result from badly heated homes.
