The State Fair opens next week, on the 17th, and convenes the balance of the week. Reduced rates will be offered over all the railroads.

The World's Fair will close the last day of this month, with more of the people's money than the cotton crop of the South will bring this season.

until Monday night, when they closed. Mr. Maxwell is State Evangelist, and is an easy and forcible preacher.

We regret to learn that Mr. Theophilus Bales an estimable farmer of this county, was caught in a cotton gin one day last week and cut three of his fingers right badly. Hope he will soon get over it.

It is said by those who have attended the World's Fair at Chicago, that the North Carolina exhibit compares with any of the States of the Union. Our State has the largest variety of woods and minerals of any other State.

Remember our town is as good a cotton market as can be found, farmers need not haul their cotton to Fayetteville, Raleigh and other points when they can come to Dunn in one day, sell their cotton, do their shopping and get back home and save a day.

We are necessitated to again call the attention of our delinquents that we need money, want the money and must have the money, or we can't send you the paper. Our bills are to pay, and if our subscribers fail to pay us, we disappoint some one else.

Tramps are getting very common in our town, often we see grown, strong, healthy looking men walk up and ask for something to eat, such men we think don't deserve any sympathy or help, for any man in the country can get some kind of work, and if he won't work he does not merit anything at the hands of the good people, and such men should not be fed and encouraged by people who have plenty.

On Friday night occurs the Great State Fair Marshall's Ball, which will be the society event of the year. Every night there will be fine theatricals in the theaters of the city.

The dates are October 17, 18, 19 and 20.

Patronize Home Industry.

Often we hear business men say to the farmers and working classes, you ought to patronize home merchants and home enterprises, yet those same business men do not do the very thing they say people ought to do. The home paper is published in your own town, the interest of the paper is for the bulding up of the town, the earnings of the employees and its Editor are spent with the home merchants. It never fails to call attention to every new industry. It tells the public, what kind of schools the town has, who your preachers are, when they preach, compliments the town, and always shows up its natural advantages and facilities over other towns, talks up for the merchants, gives free notices for all festivals, appointments for churches, Politicians and every thing of the kind, and every business man in the town gets benefit from the local Paper, directly or indirectly. Yet there are many of them who never subscribe or advertise in the paper, but will patronize some Northern Journal, because its larger and is way off from home. People have an art or instinct that leads them to believe they ought to send their money out of their own State, instead of trying to keep every cent at home they can. Just so long as our people keep such ideas as these, it will always be hard times with them. We have enough money if we would keep it at home and keep circulating it among our own people, and in our own business. We ought to buy from one another, patronize everything we can in the South and as near home as possible, then the money of the South would not all flow North and at certain seasons of the year we would not be so run for currency as we are now.

COTTON CROP REPORT.

Washington, October 10.—The October report of the Statistical Division of the Department of Agriculture makes cotton show a decline of 2.7 points from the September condition, which was 73.4 as against 70.7 for this month. The condition of cotton in the month of June was 85.6, declining to 82.7 in July and to 80.4 in August, losing from that time to the present 9.7 points. The retrogressive tendency has been persistent during the season. The reports from the most fertile parts of the cotton belt are far from hopeful. The Texas crop of 1892 and '93 was about 31 per cent. of the entire crop of the country, and the October report of this Department of 1892 showed the condition of 77 per cent.

as against 65 per cent. for 1893. The percentages of States are: Virginia 93, North Carolina 76, South Carolina 62, Georgia 76, Florida 84, Alabama 76, Mississippi 73, Louisiana 71, Texas 65, Arkansas 71, Tennessee 59.

The October condition in the States of Virginia and North Carolina is the same as September, while Texas has gained two points. The reports from the eight remaining States indicated declines in condition from one to ten points. The averages for September were: Virginia 93, North Carolina 76, South Carolina 63, Georgia 77, Florida 85, Alabama 78, Mississippi 78, Louisiana 81, Texas, 63, Arkansas 80, Tennessee 66.

The causes of the deteriorated condition are the same as those reported in the September report. The weather conditions have not been favorable; protracted and widely prevalent drought, excessive moisture in some places, and the various insect enemies of the plant have all contributed towards producing the low conditions reported. Weather conditions are favorable to successful picking in most parts.—Star.
