The city of New York has been excited for the past week over one of the most brutal and fiendish murders known in the the catalogue of crimes. Parts peet in which they will appear of the body of a man was found floating in the river. The legs, arms and head were severed from the body and hid in different places. The head has not yet been found. The portions of the body found have been identified as the remains of a man named Guldensuppe who lived with a woman named Nack. The police have arrested the woman and the circumstances tend to show that she is the perpetrator of the crime.
