Calomel May Hurt Your Liver

Every time you take this powerful drug you are in danger. Take Dodson's Liver Tone instead. Calomel is made from mercury, and while mercury has many valuable uses, it is a dangerous thing to swallow. If calomel stays in the system very long it salivates. Even when it works naturally, its after-effects are often bad.

J. A. Mitchener will sell you Dodson's Liver Tone, which is positively guaranteed to take the place of calomel. Liver Tone stimulates the liver just enough to start it working, and does not make you sicker than ever—as calomel often does. You feel good after taking Dodson's and it won't force you to stop eating or working after taking it. It is as beneficial for children as for adults.

Try a large bottle for fifty cents under the guarantee that your money will be given back cheerfully if you're not satisfied, advt.
