## THE PIEDMONT WAGON CO.

Are now manufacturing the classes of wagons as here-with illustrated. We claim that these wagons are as substantial in quality and will render as good service as any farm or road wagons manufactured elsewhere. Our experience for several years past has enabled us to successfully compete with all other manufacturers. We are to day finding sale for as many as we are able to produce, though we have greatly enlarged our capacity for work. We have the best of improved machinery, have workmen thoroughly trained who have been in the business for years, are situated in the heart of the best Timber section of the State, and can say without fear of successful contradiction, that no wagon makers use better Timbers than we do. We do NOT use cheap, low grade Irons, but are careful to have the best in that line that we can get.

We do NOT use low grade mineral paints, but mainly the best of Red Lead and as good and substantial paints other colors.

Our Iron Axles we buy from the most reliable manufacturers. We are also furnishing the Steel Axles when wanted.

We call SPECIAL attention to our TUBULAR (HOLLOW) AXLES. See Nos. 16, 21, 26, 27 and 28. These wagons have extraordinary carrying capacity, and have given the best of satisfaction wherever sold.

STEEL SKEINS are now rapidly taking the place of Cast Iron Skeins. We furnish either of these in any of the sizes illustrated. Our STEEL SKEINS are manufactured expressly for us and are of undoubted quality in every respect. In CAST SKEINS we are particular to have them of such weight that they will bear in safety any reasonable load over good roads.

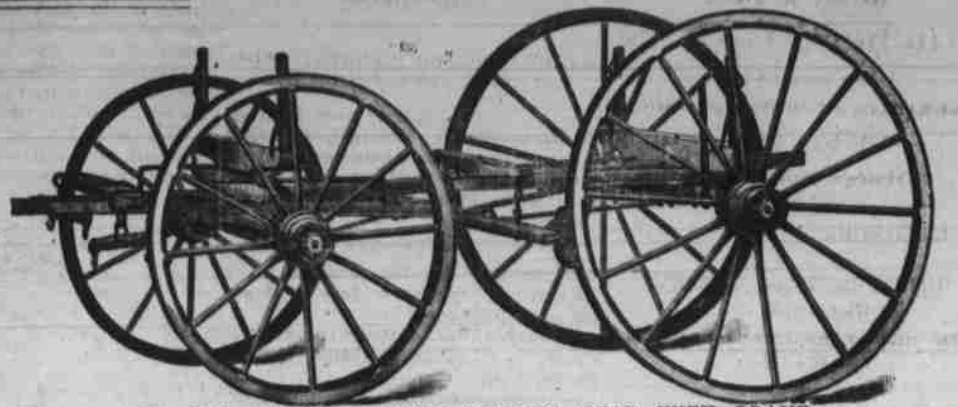

We manufacture the best Rail Road carts made in the South. See Nos. 12 and 13.

We solicit orders for WHEEL-BARROWS for the garden and farm, or more handsomely ornamented for use on the Lawn.

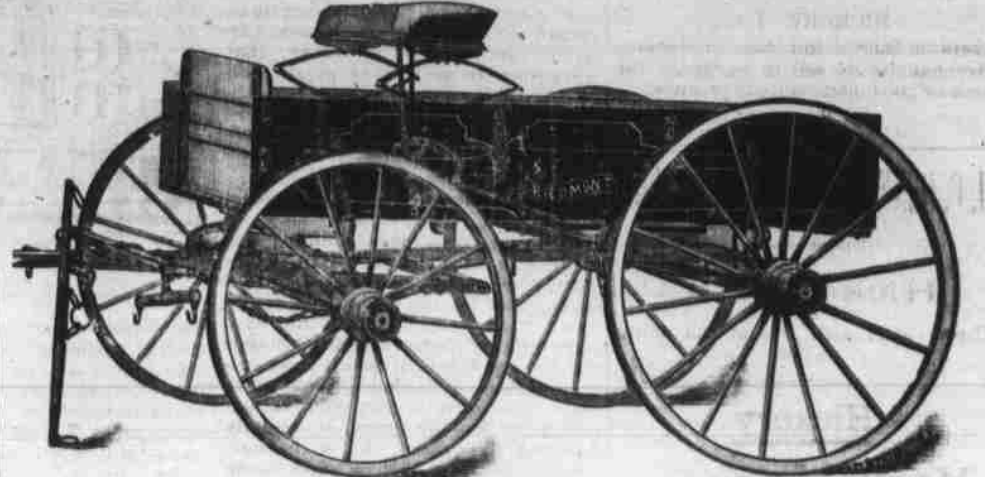

We beg that Farmers, and others who use wagons, will find our Agents in their trading town, and look into the merits of our wagon, or else write US for information and prices.

We think we deserve, and we hope to receive, a larger increase of orders from the Southern trade.

Very Respectfully,  
PIEDMONT WAGON CO.

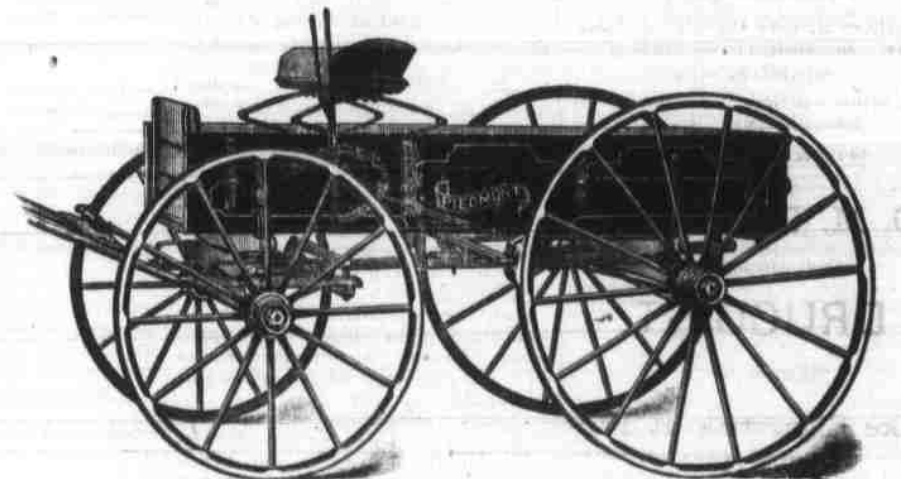

3x9" CAST THIMBLE SKEIN RUNNING GEAR WITH BRAKE.
