AMBURICA'S RESTORIAN.

The sad aumouncement is made that A \$300,000 summer hotel is to be but at Cumberland Gap, on the Tenness writing his history of the United tates, he was slow, studious, painstak- to a southern Republican. He was in no hurry to finish that hich he might hope to be immortal. Pall of the Roman Empire. That work sular service. acterized. Prescott and Motley with Bancroft and Gibbon are among the very few who have come to the writing of history as a solemn duty. The elegant his-tory of tume was more the fruit of idle-ness or eisure than of deliberate purpose, nade possible by prodigious facility in extensive desultory reading.

The United States are happy in having its record committed to the hands of such a one as George Bancroft, a man more New York, a State which has gone Dem Clothing, Hats, Shoes, etc. studious, more patient, more impartial than Hume, and with style quite as elegant; as full of research and ripe scholarhip as Gibbon. Bancroft himself is fortunate in having for his subject what historian; the revelations of a new world, novel to the people of the old world as if a new planet had been submitted to their of men, the immensity of forests un-or to his family, upon promises of a most dreamed of by the denizens of long inhab-magnificent tomb. She got the Grant ited countries, the magnificent bays and inland waters, the numerous and majestic rivers, the fertile soil, the varied products, all pointing unerringly to the sent of future empire; and then as time rolls on the conflicts with and conquests over the savage, the fall of the forest, the growth of population, and, at length, the foundation of the destined empire, and that empire the historian had seen public opinion there is a slow process, grow and expand before his eyes; he had participated in the measures that had changes. But there is a growing demoted its growth. No wonder, filled with a sense of the wonderful fruition, he ure of local government which will yet made his history worthy of himself and

A DANGEROUS MEASURE.

One of the issues before the next Conreas will be the assumption by the United tates government of control over Cononal elections. Indeed, Senator man submitted a bill to that effect to the last Congress but too late for conideration. Col. Dudley has been down South working up facts to strengthen the case. The election laws of all the Southern States are being codified by Republican leaders and one of the propositions is to so gerrymander Southern territory as to create twenty-five safe Republican districts. The scheme, it is said, would involve the appointment of half a nillion registers, judges and clerks. In an interview upon the subject Judge Reagan, of Texas, after severely conder the measure as dangerous to the whole country, says, "It is undoubtedly within the power of Congress to regulate Connal elections. That clause in the Constitution, however, provoked a hot controversy at the time it was adopted. and by reference to the early debates you'll see that some of the wisest men of that day opposed it. The convention of the State of New York, which ratified and adopted the Constitution of the United States proposed a number of amendments to the instrument, and among them the following: among them the following:

The Congress shall not make or alter any regulation in any State respecting the holding of an election for Senators or Representatives in Congress unless the Legislature of such State shall neglect or refuse to make laws or regulations, or from any circumstance is incapable of making the same, and then only until the Legislature shall make provision in the

"That," continued Judge Reagan, "exressed the common sense of that day, nd explains the real meaning of the clause. The carrying out of the Dudley-Sherman program means the most disnieting and vindictive of sectional aims

THE PROPERTY WEST SERVICES. GRANTS.

It was reported sometime ago that 30,000 white farm laborers of the State of Illinois were ready to come to North Carolina to take the place of the negroes who have left and are leaving for the Southwest. The fact seems to be attracting considerably more attention among our neighbors than at home. A of Southern papers have congratulated North Carolina on the op-portunity presented for "settling the race problem." Among them are the Orleans Times-Democrat and the ton News-Courier, both edited in States where the negroes have majorities. It is an undoubted fact that here is a very strong tendency among armers of the Northwest to move South, and we could not possibly get a better class of immigrants. We have heard little from the matter beyond the mere announcement that they could be induced

Andrew Nagle, a farmer, living in Haw kinsville, Ga., tried to borrow money from his neighbors lask week, but failed. He then retired to his orchard and prayed for help. During the night he dreamed about overhauling some old plunder left in the barn left by his deceased father. Next morning he was so impressed by his dream that he made the examination and in turning over an old crock a piece of money dropped out. In the crock he found \$200 in twenty dollar gold pieces and fifty silver dollars. He is now engaged in overhauling the entire planta-

[Statesville Landmark.] After twenty-five years of disaster the Democracy gained the presidency in 1884 and after holding it four years sustained another old-time crushing defeat last fall. Its funeral had been preached re-gularly every four years during the twenty-five, and last fall the orations is only repeating itself. The Democratic party has a vital spark which is inextin-guishable. It has lived longer than any other party ever lived. "Age cannot wither it" nor defeat dismay it. It will be alive and doing well when the youngest of us are dead. It is the party of the people. And that's the reason why.
