Of Philadelphia College of Pharmacy,

The Old Year has drawn to a close, and with the beginning of the New Year we wish to thank the public for their patronage and recognition of our efforts to do our full duty. We are fully conscious that it is to them that we owe the inexpected success of the past year, in which our business has been more than doubled, and we can only regard it as a new evidence that our business maxims have confidence in us and attract those pulous care and honesty are paramount n importance. If these are virtues in all ordinary business transactions, they become sacred duties in Pharmacy, and without them no one can be a true Pharmacist. The health, maybe the life, or those dealing with the Apothecary depends upon them. We consider it our most sacred duty to shun adulterations and spoiled as well as inferior drugs. They constitute an evil from which Pharmacy suffers no less than the public. The evil is not a new one, inaugurated in late years; it has existed as long as there were men whose cupidity was stronger than their sense of justice, and it will doubtless continue as long as there may be men with conceptions of business so vague that they expect to purchase gold for the money value of dross. There are no other moral principles required for transacting a Pharmaceutical business than are necessary for any other business. Unwavering integrity that remains uninduenced by the visions of gold along the road of questionable or deceitful practices is the only foundation for success that is worthy the name; it is so in

all possible safeguards. These are the principles which we have ndeavored to live up to, and to which we trust our increasing success is due. We hope our former pations will show the same kindness toward us in the future that they have in the past, knowing that no action of ours will ever make them regret a continuance of their favors. Yours truly, J. S. GRANT, Ph. G., Pharmacist,
