THE DAILY CITIZEN.

FACTS AND COMMENTS.

A CITIZEN reporter made inquiry yesterday into the taking of the census. According to what was told him more than 60 per cent. of those interviewed had not been seen by the enumerator. This is a large number. It hardly seems probable but it is a fact. Of all the people seen by the reporter yesterday, not more than 40 per cent had been seen by the enumerators. To be sure a large number of these names have been handed in by other people but it cannot be that all have. There must be a large number of names which will not appear on the list at all unless extra precaution is taken.

Only a few days more remain and if you have not been seen by the enumerator it behooves you to see to it at once that you are not overlooked. If you cannot see him personally drop a postal to him or Mr. Morris of THE CITIZEN. If to the latter you will be sure of being seen for THE CITIZEN is especially interested in seeing that Asheville makes the showing it should when all the returns are in.

Do not put this off. It is of the utmost importance that your name should appear on the list. See that it does.

It is a fact patent to every one taking the slightest cognizance of passing events, that the South is to-day beyond all comparison the most active and progressive section of the United States. A few years ago, without knowing the wonderful possibilities lying all about them, the youths of the South were boarding every outgoing train for the West, bent upon casting their fortunes and future with that great section of energy and push. Such is not now the case. In every Southern State hope has taken the place of despondency, and in very many sections of North Carolina, Tennessee and Virginia, particularly, that condition of affairs expressed by the modern word "boom," is causing the eyes of the nation to turn towards this territory. And it is a matter of no small pride that we see Asheville taking her place in the forefront of the march of progress and development. Sitting as she does upon the elevated plateau between the Blue Ridge and the Smokies, her unrivalled health advantages are supplemented by resources in minerals, lumber, water power and topographical beauty possessed by no other section of the South. And her people are fast realizing the rich heritage which nature has bestowed upon them. Her boys no longer seek the West, but instead, in concert with the enterprise, pluck and energy of our population drawn from the North and South, and East and West, and even Europe, they are fast making of this Queen City of the Mountains a place which will soon be the wonder of the whole country. Mr. Vanderbilt, with the world to select from, has chosen Asheville as his home, and he was late in finding what others had enjoyed for years. The future of Asheville is no longer a matter of speculation and doubt, but a fact well assured. No wonder then that gentlemen of means from every point of the compass are flocking here for the purpose of securing homes while they may be had cheap, and selected from such a large area of natural building sites. All are welcome. There is no disposition to hold this vast domain for those already here, but our people will be glad to have all come and enjoy with them this natural sanitarium of the United States.

### Rutherford College Not Endowed

Prof. J. N. Ingram writes as follows to the Charlotte News from Rutherford college: "The report published in the State press recently that Rutherford college had received an endowment of \$50,000 is a mistake. This beneficent institution has not yet been endowed. Dr. Abernethy has given at least \$50,000 in tuition to the poor young students of the State, and an endowment would greatly enhance the usefulness of the college. The attention of Mr. Carr, Mr. Duke and Mr. Vanderbilt and other friends of education in the State and elsewhere are called to this fact."

### To-Day's Sale of Lots.

### With Marked Money.

John Tyler, alias John Prater, was sent to jail this morning for larceny. He has been working for Taylor, Bonis & Brothers, sweeping out the store, and for some time the firm has missed money from the cash drawer. Detective Deaver was put on the case and marked money was put into the drawer. It was found on Prater's person and Esquire Summey bound him over to court in \$200 bond, and in default of the latter he was sent to jail.

### ANTIMIGRAINE.

—THE—

### NEVER FAILING CURE FOR HEADACHE.

TRADE MARK REGISTERED.

ABSOLUTELY SAFE, PERFECTLY SURE AND ALWAYS SPEEDY.

Cures Every Variety of Headache AND NOTHING ELSE.

ANTIMIGRAINE Has earned for itself the enviable reputation of being the finest, most effective and reliable article in the market for the speedy relief and cure of every variety of that common trouble, HEADACHE. The immense favor which has greeted it from all quarters, proves its true merits and acceptability to the public. It is something which almost everyone needs, and those who have once tried it, will never be without.

For its curative powers it does not depend upon the subtle influences of such poisonous drugs as ANTIPIRYNE, MORPHINE, CHLORAL AND COCAINE. Since it does not contain an atom of either of these. It is absolutely free from injurious chemicals, and can be taken by young and old without fear or serious results. It is not a Cathartic, does not disarrange the stomach, and contains no noxious or sickening ingredients.

The peculiar advantages of Antimigraine consist in its being thoroughly reliable as a cure for any kind of headache—without respect to cause—leaving no unpleasant or annoying after-effects, as in the case of other so-called "harmless" remedies. These qualities make it the most popular and saleable article in the market, wherever known.

DIRECTIONS FOR USE.

The dose for an adult is two teaspoonfuls in a wine glass of water. Dose for children in proportion, according to age. In either case the dose can be repeated every thirty minutes until a cure is effected. One dose will always drive away an attack of headache, if taken when first feeling the preliminary symptoms; but if the attack is well on, and suffering is intense, the second or third dose may be required. Usually a greater number of doses is required to effect the first cure than is needed for any succeeding time after that, showing that the medicine is accumulative in its effects, tending toward an eventual permanent cure.
