Two weeks ago the English syndicate place, No. 20 South Main that controls many of the largest breweries in Chicago started to cut on the price of beer, with the intention of freezng out a number of the smaller concerns and buying them up. But the other orewers saw the Englishers and went hem one better with the result that thirsty Chicagoans bought their supply at the rate of \$2 a barrel. As time wen on the syndicate began to realize that they had bitten off a chaw just a trifle too large for convenient mastication and they wanted to hedge badly. They made the necessary advances and now an agreement has been reached by which the amber fluid goes back to its old price. The English syndicate is fast learning the ways of brother Jonathan's people but it is costing them lots of money to learn the

The American Fibre Association, of New York, it says, with a capital of \$50,000,000, has been organized to take up everything new and utilize every thing old that might be available in the ever before-patronage in- fibre line. The company is perfecting creasing, public confidence plans which in scope and importance are in keeping with its enormous capitalization. The Judge Publishing Co's, fibro business, on which it has been working several years, has been absorbed by the Pibre Association. The latter is also largely interested in the production of fibre from 'cat-tails," ramie and cotton

which will come with the paper industry. This great enterprise, it concludes which is backed by some of the leading inanciers of the country, will prove ource of enormous wealth to the South In addition to utilizing 300,000 tons of otton seed hulls annually for paper nanufacture, this company will develop all branches of the fibre business.
