A matter has been brought to the at-

The city owns a road-working machine,

bought four years ago, costing about

\$400. This machine is the best of its

kind and at the time it was bought

Mr. B. P. Chatfield, of Aiken, S. C. was in Asheville at the time and bought a similar machine, which he took to Aiken, where he has since made miles of road on his farm and streets in the town of Aiken. He pronounces it a perfect success and a saving of thousands of dollars in making roads and streets and

keeping them in order. Asheville's street, will soon be in excelent condition to work with this machine after the freeze and thaw and after they have dried out somewhat. It is needless to say that with the holes, gullies, ridges and ruts that will be left in the streets there will be no comfort or pleasure in driving over them, and no ordinary force of hands will be able to work any show at all on them.

This road machine, however, with

from four to six horses, and advance plows if necessary, can be so operated that it will level all ridges, fill the holes end turn the dirt to the center, ing the street up, as it should be leaving a furrow for drainage on each side it could be used on all of the streets except those heavily macadamized.
