FAILURES that are caused by people buying more than they can or will pay for are deplorable.

JUDGE CARTER may and may not be of the stuff they make great judges of; time proved yesterday when he sentenced Dougherty to twenty years in the penitentiary-the full extent of the law under the agreement reached by Solicitor Carter and the prisoner's counsel. Bun-combe county needs such a judge and of having nurreered Mr. and Mrs. Dixon such decisions. Human life has been held too cheap here.

WE BELIEVE there is some reason for expecting the election of Gov. Campbell. of Ohio. It appears that Mr. McKinley was stronger when he began his canvass than he has been any day since, while Campbell has grown steadily in layor with the people. Moreover he is a man of undoubted resource in political organizing, and probably knows at this moment where his chief weakness lies for southern stock breeders to assemble and how to correct that weakness, in mass at the exposition. A large au Money may beat him, but we believe that ber of stock raisers from all parts of the control of the c with a free ballot and a fair count he is

#### An Alliance Monopoly.

A Salina, Kansas, telegram says that possible cost. "it is almost certain now that the Kansas farmers' alliance will become a part of the National union company of New A Letter to Mr. and Mrs. Elliott York, capital stock \$20,000,000, organized to monopolize everything in sight." perhaps true telegram goes on to say

"The National union company is an outgrowth of the Ocala convention. The scheme was sprung then and approved by President Polk. Three months later a eting of capitalists was held in New York city and the company was formed and \$3,000,000 of the capital stock was subscribed. It is probable that the work of appointing agents will begin immediately and the first stores will be establisted January 1, next."

From this we learn that the alliance is in league with capitalists! Next we know some of those borrid "Wall street sharks" will be admitted.

#### The Wizard's Latest.

It was a very ordinary looking man who spoke. He was in a shoddy ulster of the vintage of about '88 and he had on his head a Panama hat that was young when Panama was, and not later. But the world listens when he speaks, What he said last was:

"It will displace it," continued the in ventor in an off-hand way, "if economy, as well as speed and safety, is a factor of locomotion, not because it will make easily a speed of a hundred miles an hour while steam strains itself to make sixty. but because it will get one horse power out of from one to two pounds of cheap coal, while out of six pounds of dearcoal a locomotive engine can only get that same one horse power. It will displace it because it will be cheaper." "When will it displace it?"

and Milwaukee at the World's Fair."

to railway cars so that locomotives will Solicitor Carter.-Ep. Citizix | in a few years be dispensed with. Mr. Edison continued:

"I cannot go into details, for fear of from the stationary engine to a central rail between the tracks, thence through the mechanism attached to the bottom of the cars or motor. A freight train, of course, would need a motor because of the cars or motor because of the cars of the c the number of cars, although a single passenger car could be run carrying its own motor beneath it—thence to the wheels, and thence back by the side rails

of expense. For not only is this borse young girl needs its strengthening help power produced at much less expense, at that critical period when she is bloshorse power in a stationary engine and and mother find in it invigoration and six pounds of dear coal in a locomotive, but the depreciation of rolling stock and their existence. And ladies well adroad bed is much less. Every exertion of vanced in years universally acknowledge steam power is in the nature of an explo-sion, and when you take into considera-this favorite and standard remedy. tion the fact that four or five hundred engines are on a road like the Pennsylvania at one time, each exercising a dif-ferent degree of this explosive power the depreciation is a great factor. But with electricity it is always the smooth, ro-tary motion, imparted in the same way by the same man at the stationary are by the same man at the stationary en-

The Adjective Stringer of the "Mirror" on Deck.

From the Wilson Mirror. On Sunday evening in Wilmington we took tea in one of the lovliest homes we ever saw, and met some of the sweetest and most exquisite ladies that ever gave a charm to earth and glory light to existence. We found a heaven of deliexistence. We found a heaven of deli-cious enjoyment in the entracing witch-eries of their conquering attractiveness and enslaving charms, and when we left we brought away with us a train of memories as rosente and as beautiful as those grand and exquisite colorings which mark the pathway of the sun to his crimson chamber of rest. They gave life's current as sweet a tune, as song e's current as sweet a tune, as song birds strain in rosy June; and since we left we sit and sigh, and dream of heaven they brought so nigh.

#### The Truth.

EDITOR THE CITIZEN: Allow me space to thank you for publishing the truth in the case of Robert Dougherty on trul for the murder of W.A. Torrence.

The Monatain Home-Lournal says the ury rendered a verdict of "not guilty. Their reporter or myself have it wrong, for one of the jury tells me it was not all lowed to come before the jury after the evidence was taken.

In the name of justice and loyalty to our fellowmen, why not speak the truth write the truth and act it? Other con ments are not necessary. Ashevillian, Oct. 27, 1891.

As a matter of fact, the jury did render a verdict of not guilty of murder, but "It will begin to do it between Chicago that he, Dougherty, was guitty of lelomous slaving in the manner and form charged Of course it was Edison who talked in the indictment. There was nothing and he was explaining that he had in- else for the jury to do under the agree vented a new application of electricity ment between the prisoner's counsel and
