Let No More Bonds be Sold.

THE CITIZEN believes that it voices the sentiment of every thoughtful man in Asheville when it says, let no more of the \$640,000 improvement bonds be sold. The present sale is ample to improve Asheville's streets, sidewalks and sewerage, so that they will comport with the size and reputation of the city. and not another dollar of debt should be incurred until Asheville's growth and development has demonstrated both the necessity for and wisdom of such outlay.

Let the remainder of the bonds be retired by the board of aldermen, and strangers coming to Asheville will realize that they are men of sense and judgment, capable of seeing when they have enough, even of a good thing, and the property of the city will be much more valuable by reason of the low tax rate which this step would make possible,

A PLEASANT PLACE TO WINTER IN. Though the winter has been mild thus far, there is no certainty that it will continue so, and many of our readers are doubtless planning to spend a few months in the south. Asheville, in western North Carolina, is famed for beauty of situation and evenness of climate, and in Asneville, the most delightful place of residence for the traveller is certainly the Oakland Heights Sanatorium. ASHEVILLE TOBACCO WORKS,

Manufacturers of Piug, Pancy Smoking Tobacco and Cigarettes,

Asheville, N. C. January 15, 1892

The Asheville Tobacco Works, a corporation created under the laws of North Cartilina, was organized for the manufacture of ping and smoking tobacco three years ago, and has done a prosp rous business with an ever-increasing trade. The orders that come in for tobacco are carciuly looked over and goods are only shipped to those parties well rated and known to be solvent.

bacco are carefully looked over and goods are only suppose to most personal frown to be salvent.

The policy of the company is conservative. The directors meet once a month to audit accounts and transact all necessary business. Since the formation of this stock company it has obtained control of the only cigarette machine in America outside of the cigarette trust that is. The American Tobacco company.

The profit in machine made cigarettes is large, varying from about fifty to one hundred per cent. The business is practically cash, as cigarettes are sold for cash or so short time. The Asseville Tobacco Works can sell sell the cigarettes they make at a handsome profit of fers have come from responsible parties to take the whole output. The present capacity is

Two grades of cigarettes will be made—medium and best. The medium grade will be sold at about \$3.50 per thousand; the best at about \$5.00. Comparing the cost of making and the price per thousand; the best at about \$5.00. Comparing the cost of making and the price per thousand; the distriction and large profit is \$2.30 per thousand. For a legitimate, safe business, with quick returns and large profit is \$2.30 per thousand. For a legitimate, safe business, with quick returns and large profit he cigarette business. The desired production of the growth of fance which is desired by a large companies were begging for it. Propositions have already been made to our company to lease the machine on a royalty.

It is not necessary for an investor to speak of Asheville as a suitable place to manufacture eigarettes. It is eminently well situated, being in the finest section of North Carolina for the growth of fancy qualities of moking tobacco used in making cigarettes. The dryness of climate by day and coolness and moisture by sight are the chief causes which favor the production of fine smoking tobac o here, and make it equal in flavor and color to the best tobacco grown anywhere. As proof of this the tobaccos grown here have taken first premiums at State Fairs in Raleigh, North Carolina, and Fichmond, Virginia, also at the Vienna and Paris Expositions. The number of pounds of this cool handled on this market is rapidly increasing, for instance, in 1880 there were only about 600,000 pounds sold here, while in 1891 over 6,0.000 prunds were soll, and now every large manufacturer has his buyer on this market. The sales are vearly increasing and there is enough to bacco sold to run many large factories here instead of shipping it away to other factories. (A large factory in Asheville would min'ov a number of hands and benefit the town.)

Our cigarette factory is cituat d in the head of this fine tobacco region and paradise of the world for health and pleasure.

The factory is a large brick building four stor
