

TO OPEN NEXT SEPTEMBER

THE NORMAL AND COLLEGIATE INSTITUTE.

The Work Proposed to be Done by the Institution in Victoria, Presided Over by Rev. Thomas Lawrence, D. D.

Asheville bids fair to become as celebrated as an educational center for its matchless climate and unrivaled scenery. It has one of the best systems of graded schools in the state; a female college liberally patronized and doing excellent work; Mr. Vanderbilt's generosity is about to add another imposing building for the purpose of public instruction; and in the beautiful borough of Victoria, just beyond the city, the grand structure which is to be occupied on the 15th of September by the Asheville Normal and Collegiate Institute, is approaching completion.

The site upon which the institute stands for beauty and healthfulness cannot be surpassed. In the appointments of the building and appliances for comfort and health of the pupils nothing has been spared to make them as complete as possible. The purest of water will be furnished in abundance from springs on the premises, the plant for the supply of which cost along several miles of the city. The lighting will be by gas, heating with hot water, and hot and cold water baths. The ample site of some fifty-five acres will furnish abundant opportunity for outdoor exercise, and a well-fitted gymnasium will be fitted up within doors.

The whole plant is the beneficent gift of a few friends of liberal Christian education for young women, the most generous of whom reside here. Four independent courses of study are offered to the student: 1. A seminary course for all who wish to pursue the several branches in language, literature, science, music and art, ordinarily taught in the very best seminaries.

2. The normal, for the thorough training of teachers under instruction who have been trained in the best normal schools of New York and Pennsylvania. This will extend through three years, during the last of which the student will spend one hour each day teaching a class in the model school under the eye of an experienced teacher who will privately criticize the work done in the school room.

3. A commercial course, including stenography, typewriting and book-keeping. This department will be presided over by a regular graduate from a well known business college, and the pupil will have every facility for finishing herself for counting room or the reporter's desk.

4. The department of domestic science, of which there will be two departments: a, scientific cooking, embracing full instruction in all kinds of cooking, plain and fancy styles of the production and manufacture of foods. The cooking class room will be entirely apart from the kitchen and has been furnished with all the necessary appliances; b, Sewing—embracing full instruction in all kinds of sewing, hand and machine, cutting and fitting of garments, dress making, study of colors and millinery. The teachers at the head of these two sections of the department of domestic science are graduates from the famous Pratt Institute, Brooklyn, N. Y., and the other instructors, fourteen in all, are from the best institutions of the country, chosen with special reference to Christian character, experience and ability as teachers. Besides these a thoroughly organized preparatory department has been provided for all such as are not prepared to advance to enter the higher classes, under the care of a teacher of ripe experience.

Particular attention will be given to the systematic study of the Bible, but without sectarian bias. The school will be conducted to some extent after the model of the famous Mt. Holyoke Seminary, planted by the sainted Mary Lyons, and the pupil will be expected to share in the domestic work of the household, as an essential and practical part of their education.

The terms are placed at the lowest practical figures, that the great advantage offered may be within the reach of the greatest number, especially those who are anxious to become teachers. The whole plant is a magnificent gift to this part of this State, and marks a new era in its educational history, and it is one that a generous Christian public should be quick to appreciate and gratefully acknowledge. The charge to the pupil of \$100 a year for boarders will cover, it is estimated, about the first cost of board. Day scholars in all departments will pay but \$25 per year.

Dr. Thos. Lawrence, who will have the management of the school with his estimable wife, is an experienced educator, and supported, as he will be, by a numerous and able corps of teachers. THE CITIZEN cannot err in predicting for this institution a useful and prosperous future.

The institute is in no way an enlargement of the Peace Home Industrial school, but a continuation of the Oakland institute, upon a greatly enlarged plan.

ROBBERED WHILE ASLEEP.

Julius Garren Relieved of \$44 Last Evening.

Julius Garren, who lives near Richmond Hill, fell asleep on Water street early last evening. While he was in this condition he was "touched," \$44 in cash being taken from his pocket.

Garren discovered his loss soon after and called Patrolman Noland to work up the case. Noland did this quickly with the result that about 9 o'clock he arrested Pink Earwood, white. On Earwood's person, distributed in his pockets and shoes, about \$28 of the missing money was found.

Earwood had a hearing before Recorder Miller this morning, and in default of bond in the sum of \$200 was sent up to await the next term of the criminal court.

IMPORTANT NOTICE.

Democrats Will Vote for Candidates in the Primaries.

T. C. Starnes, chairman of the township Democratic committee, gives notice as follows to all democrats who participate in the township primaries on Saturday, August 27:

"Each voter in the primary will vote for the man of his choice for each of the county offices, as well as for the delegation to be sent to the county convention. This is done that the desire of each precinct may be known as far as possible."

IT WILL BE A GREAT SIGHT

THAT BASEBALL GAME NEXT TUESDAY.

Men Prominent in Asheville Are Going to Cross Bats for the Benefit of the Monument to the Confederate Dead.

The baseball game for the benefit of the Confederate Soldiers' monument took definite shape this morning and it promises to be the richest thing of the season. The following will be on the teams. Each one has consented to play and all are enthusiastic about the game:

- W. H. Penland, D. L. Reynolds, J. S. Adams, P. Stickleather, H. A. Gidger, M. Westall, J. P. Kerr, H. C. Fagge, W. F. Randolph, Col. A. H. Baird, Geo. S. Powell, Dr. W. D. Hilliard, A. M. Field, J. C. Martin, J. E. Dickerson, E. P. McKissick, J. S. Grant, Dr. Brown, E. H. Cobb, W. A. Blatter, E. D. Carter, W. B. Williamson, Chas. D. Blanton, T. R. Ransom, F. A. Hull, W. W. West.

Henry Redwood, esp., will manage the business and umpire. The game will be played according to this year's rules with the single exception that the ball is to be pitched to the batter and not thrown.

Next Tuesday afternoon at 3:30 sharp sharp at the race track have been selected as the time and place, and E. G. Carrier has donated the use of the grounds.

The price of admission will be 25 cents and every cent taken in from whatever source is to be turned over to Mrs. H. A. Gidger, the lady manager of the monument fund for this district.

It may be necessary to add, for the benefit of the strangers in the city, that the gentlemen who will work at the ball are not professionals, probably have not handled a bat for many months, and may forget the direction they must run in order to reach first. Consequently and therefore, there is a great big clunk of fun in store for all who go out.

KING'S WINDSOR ASBESTOS CEMENT

FOR PLASTERING

In its mixed form is superior to all other plaster, because, being mixed by machinery, the only thing left to the judgment of the man at the mortar bed is the right quantity of water. It makes walls and ceilings more elastic than any other material known for plastering. The Asbestos used renders the material a great protection against fire, and deadens sound. The extreme density of the Cement renders it vermin and germ proof. It will not chip or pit. It is free from acid. It dries out from three to five weeks quicker than lime or hair mortar. No action takes place after setting, which is a matter of two or three hours only. Frost or water will not injure the work after it is once set. Experience has shown that ceilings well soaked from any cause will dry out as strong as ever. Falling ceilings are unknown, and the plastering will last as long as the building itself. It can be finished in any way of which ordinary plastering is capable. Walls and ceilings made from this material are second to none; and, considering the advantages named, the excess of cost above lime and hair is a small matter. The best and most convenient article known for small jobs and patching.
