eaunot be too severely consured for the manner in which the hotel was conducted on the night of the fire. In the first place there was no watchman in the building only a colored bell boy, who had brought up a cot from the basement to sleep on while not needed to answer bell on these days. We are the importers for calls. The first alarm, I learn, was given by the head waiter who slept in the quarters some distance away. Most of the passage lights in the hotel were extinguished before I retired. There was no alarm of fire given on the second floor of the new building, neither on the third floor of the new building, I know this to be a fact because I left the office at 11 o'clock. The only disturbance that caused suspicion on my part of there being danger of fire (about 25 minutes later) was the removal of Dr posite mine. This caused me to get up and see what the matter was. When got up and went out I gave the alarm o ire, which must have aroused many

When Dr. von Ruck came along th assage, to take his wife out, he and hose with him, should have given the If you have tried it you alarm of fire to the occupants of the rooms on this floor. It should have been the duty of Dr. you Ruck to carry a sufficient force with him, not only to know what it is; if you have take out his own wife, but to have taken out a lady from Florida, an invalid, who had not been out of her room for a week But that helpless lady was left to get out the best way she could, which was ble to test, we are satisfied to jump from the second floor to the

Instead of Dr. von Ruck's having his employes engaged in saving baggage of the occupants of the hotel and a wakening guests, they were busy with saving the stores, thereby causing great loss to the visitors, which could have been obviated if he bad cared to do so.

There was a colored watchman on duty and he had passed the elevator on the first floor not more than fliteen minntes before the alarm of fire was given.

The man had not gone askep on a cot, and in fact he had carried water to room 22 only a few minutes before the alarm of fire was given. In doing so he had to pass to pass the elevator twice. Mr. Hawkins tells a deliberate falsehood and Hawkins tells a deliberate talschood and proves it by his own statement when he says that his suspicion of fire was aroused when I removed my wife from her room, because he states afterward that as he went out he saw meendeavor to put out the fire. The truth, however, is, that I was of the rioting miners came to a sudden Miller chemical fire engines of which there were two close at hand; and I discharged Umbrellas re-covered while the contents of them and another which one of the servants brought to me into
