water and came near being drowned .-

A Salt Lake In Africa. The French government has just sold to Mr. Chefneux the right to refine and except good effect. Keep in export salt from Lake Assal, one of the mind that Scott's Emulsion | most remarkable sheets of water in the is the best promoter of flesh and strength known to world. The lake is in the district of Obock, East Africa, only a few willes from the head of the bay of Tad. The gentleman who has purchase, the concession agrees to pay into the colonial

office the sum of \$10,000 a year, and if, during the 50 years that he is to have the exclusive right to export salt from Lake Assal, the annual product exceeds 50,000 tons he is to pay a tax of 20 cents for every ton in excess. The government will design to a part of the lake where the natives may secure all the salt they want without tax or hindrance. All along the edge of this little lake, which comprises only 16 square miles, is a bed of nearly pure salt about a foot in thick

The water of the lake is so surcharged with salt that it is impossible to sink it it. The bottom is apparently a bed of solid salt. The heavy waters have the bases of jagged and precipiton: moun tains which descend to the edge of the lake, making it almost impossible to travel around it. Mr. Chefneux will probably carry on his work by floating machinery on the lake and dredging in SENT FREE WONDERFUL CURES. the salt bed at its bottom, though on the west side of the lake an enormous quant tity of salt is in sight when the lake is at its lowest level.-New York Sun.

An English Note on Phillips Brooks. Those in England who were accu day of December, A. D., 1888, by J. B. West and Susie West, his wife, conveying the lands and premises hereinafter described to the undersigned in fee simple, and at the request of the Western Carolina bank, default having been made in the sympathize deeply with American Christians. in the payment of the money secured by tians who have suffered this great be said trust, and, the same being past due, reavenent. They will forget the foolis the undersigned will offer by public auction, at the court house, door, in the city of Asheville, County of Buncombe and State of North Carolina, on Saturday, the 18th day of March, A. D., 1893, for cash to the highest bidder, the following ness of his teaching, his scholarl adjoining the lands of E. West, A. M. into character, and his extraordical Gudger and others, on the waters of power of lifting up every subject he Turkey Creek and being composed of cussed into a higher region than the cussed into a higher region than that of theological discussion - the region i which conscience and the voice of Gos are clearly audible, in which the small interests of life seem smaller and the in Book No. 14 of Mortgages at page great ones greater, because both are seen boundless hope.—London Spectator.

A Well Traveled Letter. A Rockville man about nine months ago received a letter from his brother Pombay, India, asking him to send a good or bad.—London Spectator. United States \$5 gold piece, which be wanted to wear as a watch charm. He obtained the coin, inclosed it between kinds to B. Burnettt's shop on College two pieces of heavy cardboard, put it 11 letter and registered it. The letter started on its way, and Friday it re turned to the Rockville office. The envelope presented a remarkable appear ance and is a great curiosity, having traveled over 50,000 miles. The letter went to the dead letter office at Bombay. and the coin had disappeared, having probably worn its way out of the letter.

The letter went to various points in the east, as well as England and the continent, in search of the person to whom was addressed. Every stoppage is reg istered on the letter, which is covered with marks and writings in all colors. The letter was returned by Postmaster Randall to the man who sent it, and al though the coin is missing he considers the letter of more value than when h sent it .- Norwich Bulletin.

Reading the Thermometer. A bellboy at the St. Nicholas, who will ing World. one day male his mark as a natural wit The beautiful residence of Jesse R. Starnes, 211 Patton avenue, is now for rent. The house contains 14 large sunny rooms, with hot and cold water and all modern improvements; stable and carriage house; large and beautiful grounds. For further information apply to JESSE R. STARNES.

27 North Main street, or on premises, feb4dif morning in question came down to the office, and remarking to Clark that the weather must be very cold asked what the thermometer indicated. Calling up - AT WEAVER & MYERS' STORE the bellboy, Clark requested him to go out and see what the thermometer indicated, if he could read the same. Going out, he quickly returned, and when asked how cold it was quickly replied that it was "one inch below freezing." Clark fell over a chair, and the patron of the house had a fit.—Cincinnati Enquirer.

> England's Vital Statistics. The slow machinery of the English government has just turned out the report of vital statistics in 1891. It appears that the steady decline in the number of early marriages which began in 1874 still continues. In the latter year 84 in 1,000 bridegrooms and 227 in 1,000 brides were under 21. In 1891 only 59 men and 190 women in 1,000 married under age. The odd fact also appears that the proportion of Jews in the population of England has more than doubled in 20 matched by any other class in the pop

What Did They Hear?

A few years ago I was assistant janitor of a large insurance building near old watched the thickening ice, conscious as the janitor was out. He was disappointed because the steamer he worked on sailed the next day (Saturday), and he

natural thing to do, and pray he did, perhaps 15 or 20 minutes. All this time

At once we heard the front door above the distance the smoke of a steamer bat-thrown violently open, and it seemed as thing with the ice. Slowly she proceeded if a hundred people came rushing in on Although the steamer was some half mile devil is that?" I listened a moment and out toward the ship channel, the nervy keeperdetermined to abandon the station My God! We are lost! We are lost! to its impending fate and make the effort We were both pretty well frightened, to reach her. Getting upon the untried but we rushed up stairs and found everyto Scott's Emulsion of Cod | ice he proceeded toward her, waving his thing as quiet as the grave, not a soul in

The next morning when I looked in page but an account of a shipwreck, and it was the very same ship that the poor pantryman did not wish to sail on the he broke through the ice in eight feet of Saturday before. His name was among the lost. Now can any one explain what it was I heard that Sunday?—Cor. New York Recorder.

Teaching Horses a Lesson. Teaching a new horse to come out of his stall at the fire alarm signal and

Imagine a pair of new horses assigned to an engine. The surroundings are more or less terrible to them, but they are very gently and carefully handled and gradually lose their fear. Their tuition begins at once, and the driver is their teacher, assisted by the other men.

The ordinary signal is given, as if for a fire. The stall doors open, and the horses are led out, put in position, and in a few minutes led back. This process is perhaps a dozen times repeated. Great pains are taken that the animals shall

means frightened. The unusual spectacle of a harness suspended in air is apt to disturb them at first, but they are led slowly up to it and

After they have been led to their positions a few times they are allowed to come of their own accord when the signal strikes, though a man stands behind them to touch them up a little if they de not start promptly at the opening of the doors. Two weeks constitute the average period of instruction, but horses have been known to learn in one lesson. Others, however, are months in arriving at equal proficiency .- "Road, Track and

Nerve Jarring Jocularities. There is nothing in the world which produces the sense of mental nausea more completely, or is more certain to turn the intellectual stomach, than the use of certain jocularities of speech with which many people think fit to alorn their conversation. The people who seem to find it impossible to speak of an unmarried man except as "a gay bachelor," with whom the sea is always "the briny" or the "herring pond," and a horse "a fiery steed," who eternally talk about "Sunday-go-to-meeting" clothes, and who have such phrases as "no extra charge," "agitate the tintinnabulator," "the noxious weed," "the pipe of peace, "40 winks," and "braving the elements forever on their lips, are capable of producing a sense of disgust in those who care to see language kept bright and clean which is absolutely intolerable.

It is difficult to say whether these can phrases-that is, a perfectly proper de-595, to which I refer for a more definite description and to be sold in order to experience, of profound faith and of used consciously or unconsciously—that is, by people who believe them to be funny and intend that their heavers should con sider them funny, or by those who have merely caught them up and repeat they comployed on a steamship running out of like parrots and without any intention

> No Virtue In Whole Grain or Bran. Among the ancients the "toothless hag was a stock figure. Homer was bald Diogenes was bald. Ulysses was bald. How did they become so on bran or whole grained bread, such as was used in their times? The miller of this day is making no mistake in his work. No civilized nation, with a mixed diet, is in any danger from the use of white flour. The "sweet and pleasant flavor" of bread made out of old buhr flour or ruder meals was due to no wholesome, nutritious quality in the flours or meals used It was simply the dirt-that is, the nonfloury parts of the wheat berry in corporated in the product of rude milling that gave that flavor. The bread is more nourishing without it and more digesti ble without it. Modern milling is all right. The human intestines are not intended for mere bran conveyers. The bran should go to the bran bin, and from Man is not among those animals.-Mill-

An Original Theory of Education Count de Lesseps has always had the ories on the education of children. Part of his success in the Suez canal was due to the help of Abbas Pasha, who had been a pupil of the count. Abbas was a very fat and luxury loving boy, but with more than ordinary intelligence. At th end of the first month of De Lesseps' direction of his education his tutor, with some pride, brought in the boy's reports "Do not bring me reports of lessons," Do Lesseps said, "but his weight. I desire you to weigh him at the beginning of every month. If he has gained in flesh, punish him and see that it does not hap pen again."—Chicago Tribune.

A Knife on Its Travels. A huge knife, said to be over 100 years old and resembling an ancient hay cutter, was presented to the postmaster at Bangor, Me., just after the election. It was labeled "Adlai's Ax." Across the blade in black letters were the words, "The melancholy days have come." This was a grim joke to play on a Republican postmaster, but he concluded to make the best of it. He tagged it and started it on a journey across the continent. last accounts it was at Marquette, Mich. years, without counting immigration.
This extraordinary fecundity is quite uneach messenger had added as the Democratic guillotine passed over his route.

The Limits of Human Hearing.

We can do a great deal to cultivate the ear, but we can do nothing to exsuccumbed to the ice last week, says he Trinity, New York. The head janitor's tend the range of sounds which the tymfamily lived in Greenville, N. J. He panum can receive. The ear may have went home every Saturday night. The great keenness of perception, may hear elevator man (my brother) and I took sounds extremely small, distant and turns in watching the building Sundays. | faint, and yet be always deaf to any from the shore. It is not easy to appre- The janitor had an old friend who was a noise, however loud, if it is lower or pantryman on one of the Old Dominion | higher in pitch than the tympanum is steamships. He called one Friday, but made for, Various experiments show that about the lowest, or what in a musical instrument would be called the deepest bass sound, consists of 124 unduthat vastfield of ice expanding its mighty told me there was a storm brewing and lations in the second, and the highest of rather more than 6,000. Human ears Sunday morning I got my breakfast, have not all the same compass. A party went out and got a paper and then went of young people, all with excellent heardown into the engine room in the base- ing, may go into the meadows, and some To pray in such a crisis was a most ment. He found that some people could not hear the cry of the bat, nor the chirping of sparrows, which is four octaves above F in the middle of the pianoforte. Not to be able to hear this last note he considers to be very rare. He believes the whole range of human hearing to be compressed between the deepest notes of the organ and the highest the paper what should I see on the first cries of the insects, including fully nine page but an account of a shipwreck, and octaves, the whole of which are distinctly audible to most cars.—New York Home Journal.

> Cultivating Color In Cats. Never have cats held so important position in the animal world as they do at the present time. In days gone by pussy's chief value consisted in her capabilities as a mouser, and so long as she accomplished her work satisfactorily that was all that was required of her.

range himself alongside the pole is not Nobody troubled as to the shortness of so difficult as might be supposed. her face, the size of her ears, or the length of her tail. Every one was perfeetly satisfied with her sober gray coat and four white feet. Her green eyes, too, we all took quite as a matter of course. But now a very different state of affairs exists. In many instances her propensity for mousing only composes one of her numberless characteristics, if indeed the most aristocratic specimens

deign to catch a mouse at all. The markings which are now produced in our cats are certainly wonderful. We have striped tabbies and spotted tabnot strike against anything, or be by any bies, the stripes and spots so clearly and regularly defined in the best cats that it seems difficult to believe that it is all nature. The colors, too, are most beautiful -the rich orange, delicate chinchilla, induced to smell of it and inspect it on dusty looking smoke, vivid red and last but not least blue-blue, or what the tan-

initiated would undoubtedly term slate. being one of the most fashionable shad among the pressies of the present day .-London Lady. Both Good. Many interesting stories have been told about that favorite son of the south,

Henry W. Grady. One that was heard a few evenings ago at an assemblage largely made up of Presbyterian clergymen shows that his colored coachman. who has not appeared prominently before the American public, was well worthy to be in the service of such a master. The Rev. Dr. Henry M. Field was the relator of the incident. Dr. Field was visiting Atlanta and of course met Mr. Grady. Mr. Grady placed his carriage at Dr. Field's disposal, and after driving about the city, on being left at the coachman with a big silver dollar.

to Dr. Field that his coachman had told him of the tip, and at the same time had said that a certain Baptist clergyman, whom he had driven about the city a few days before as Mr. Grady's guest had at the end of the ride rewarded him with his blessing, saying that he could give no other reward. Mr. Grady asked which he preferred, the dollar or the blessing, and the coachman, scratching his head, replied that both were good and that he thought he preferred them mixed. "And there are many others of us, I think," concluded Dr. Field, "who prefer them mixed."-New York Times. The Life of a Ship.

An interesting discussion has been started on the subject of the life of the ships. It appears that this is very much a question of where the ship is built. It is found that vessels constructed in the United States last, on an average, 18 years only. French ships average 20

Dutch, 22: German, 25: British, 26; Italian, 27, and Norwegian, 30 years. The average death rate of the world's ship ping is about 4 per cent and the birth rate 5 per cent. It has become the practice to construct certain parts of a ves sel of iron instead of steel, such as tank tops and decks exposed to the weather, but it is now found to be a better plan to keep the material the same throughout as far as possible, and the steel should be the same thickness as theiron. -Chicago Dispatch. How Trees Are Like Human Beings.

Nature has many peculiar laws governing the organism of trees. One i that every individual twig, spray, all the foliage, every fiber, takes precisely its own thickness of wood from the parent stem. This same law is manifested there to the animals that can digest it, in the proportions of the human organism. The length of the arms from finger tip to finger tip (arms extended) is the precise measurement of the length of the legs of a human being, and other measurements are the same in proportion .-Boston Transcript.

Almost Goaded to Desperation. It was during a very tedious ride on a southern railway, and the passengers, tired, dirty and thirsty, all berated th company, with the exception of one single passenger. His fellow passengers commented on this and asked him why he didn't denounce the company too. "It would be hardly fair," he replied, "as I am traveling on a free pass, but if

they don't do better pretty soon blame me if I don't go out and buy a ticket and join you."-London Tit-Bits. Scientific journals in England speak approvingly of a new method of manufacturing caustic soda, chlorine and other chemical products directly from sea water with the aid of electricity. There

material in the process. No man can write his signature twice exactly alike, and it is declared by some experts that if two signatures are precisely alike one is certain to be a forgery.

is an immense saving of time, labor and

A student in a western college pro poses to deliver a lecture on commence ment day on "The Relation of the Wheelbarrow to American Elections."

"The strangest accident that ever fell within my observation," said Harold Chapman to a friend in the Lindell, "occurred at my home in Medicine Lodge, Kan. One day in May, 1889, I was driven into the house by a thunder shower. The rain moderated in a few minutes, however, and I took a chair and sat out on the porch. My youngest boy was playing with a tin cup, catching water from the rain pipe and pour-ing it along a rut in the floor. The water ran along this rut out onto the cistern platform. While he was stooping to fill the cup from the rain pipe a flash of lightning came, seemingly attracted by the iron cistern pump. The current leaped from the pump to the current of water that ran along the porch and flashed along its course to the end.

"As providence, accident, ill luck or something else would have it our Thomas cat had come out from the kitchen and was standing close to the wet gutter made by pouring of the water. The cat received the full benefit of the flash, and lay scorched and dead in an instant. Now I saw that flash distinctly, and saw it travel from the iron pump along that gutter to the cat. If my boy had been there the result would have been the same. If he had not, why I suppose it would have been attracted toward one of us and serious results might have followed. I slightly imagine that I owe my life to that cat's ill fate. I am much obliged to the cat."-St. Louis Globe-Democrat.

The Endowment of Daughters.

The propriety of endowing daughters appears to be now seriously discussed in different parts of the country. This arises partly out of a growing sense of justice, which the philosophers say, is the last sentiment to be developed in the case of women, and partly out of the commercial exigencies which in the last twenty years have left stranded so many women with no means of livelihood. The endowment of daughters would accomplish several ends. It would enable them to marry the men of their choice, it would support them if they do not marry, and in case of commercial disaster would furnish at least temporary provision for the family. The matter has progressed until the methods of endownents in different countries are under advisement.

According to Sir Henry Maine it was the passing of the Roman dowry into France after the conquest of Gaul that has made of France the richest and most prosperous of nations. It is unlikely, however, desirable as it might be, that the frugality and self denial the humblest Frenchman practices to lay aside his daughter's dowry will appeal to a nation accustomed to easy living and as impatient for swift results as this .- New York Evening Sun.

Editors may find some consolation in the fact that they have inspired feelings of envy in the breasts of a young Japanese boy. A recent issue of an East In dian paper contained the following note "A schoolboy in Loerabaya was asked to describe an editor of a paper. He did so in this way: 'An editor is the luckiest man in the world. He can go to a circus every afternoon and every evening without paying a cent. He can go also to the court houses, the places of execution and the races.

"He has free tickets to all theaters, re ceives presents at his office, and gets hi ears boxed too. He goes also to Prigen Malang or Lawang (places of amuse-ment). He does not do this often, how Mr. Grady's office, Dr. Field rewarded ever. In one paper he can deny everything that was said in the previous one, Later in the day Mr. Grady remarked and he does so, as a rule. When other people are already in bed, the editor is still up. He stays up late to see what When I grow big I shall become an editor. Then I can stay up

A Sermon Exchange. The latest enterprise which we hear announced in the young and enterpris ing west is the "Sermon exchange, Chicago. According to popular belief the practice of clergymen has been to write sermons until they had filled a barrel. Then the barrel would be turned upside down and the sermons all preached over again. Where a minister remained in a church a great many years the congregation would after awhile be gin to know when the barrel was turned Some sermons were looked forward to with much interest and others with more or less dismay. The Sermon exchange is to do away with all of this. It is no longer necessary to preach a sermon over a second time. The preacher can take an old sermon and tie twenty-five cents to it. This he sends to the exchange and receives one written by some one else by return mail, or if he has no sermon to send he can get one for fifty cents. - Bal timore Sun

Long Island Indians. There was a time when many of the Shinnecocks shared in the occupations of the white people and acquitted them selves with great credit. I allude to the whaling period in Southampton history The Shinnecock at sea, whether purblood or half breed, made an exact sailor The discipline of the forecastle was good for him, at least so long as he was affoat Many of them got to be mates, and one became a captain. This distinguished sailor man was not a pure bred Indian but was part negro, and probably had a small though potential quantity of white blood. This was Captain Lee, and any one down toward Southampton or Sag Harbor can tell of his giant stature and immense strength. This Captain Lee was the son of a still more famous man, Parson Lee.-John G. Speed in Harper's Weekly. Just Cause.

"Wodjer black Joey's heye fur arter he'd denied as he'd said them things about yer?" "Denied it? Not 'im! Why I ses to 'im, 'Joerge ses you've bin corling me a blackleg.' And he up and ses, I re-pudiate the statement.' And then I blacks 'is eye. I might ha' stood the cove's sayin of it once—but w'en he goes an re-pudiates it!"-

-London Public Opinion.

Economic entomology is that branch of the science which, looking beyond the mere collection and classification of insects, has to do with the control of those which injuriously affect agricultural products.

The college endowments of Massachu setts are said to amount to \$10,650,000; the value of college buildings and grounds foots up \$5,013,000, and the val

TRUSTEE'S SALE

Of the entire plant, fixtures, apparatus, franchise and other property of the People's Light, Heat and Power Company, of Asheville, North Carolina.

By virtue of the powers vested in the undersigned, J E Rankin, as trustee, by the power of sale and other provisions of the deed in trust executed by the People's Light, Heat and Power Company of Asheville, North Carolina, to me as trustee, which is dated February 15, 1891, and which is registered in the office of the Register of Deeds of Romombe county, North Carolina, in book 24 of mortgages, at prage 495, to which reference is kerely made for full particulars thereof, the purpose of which said deed in trust exact was to secure the payment of the 34 bonds of \$5.00 each and the interest and coupons atlanted which have therein described; and which present a fale above referred to authoritys and dicate the undersigned trustee, if default shall be usade in the powment of any of said beards or coupons of in terest, as they respectively become due, as therein stated, and such default shall continue for six (6) months, upon the written request, signed by a majority of the bodiers of said bonds and coupons, to declare each and all of said 34 bonds, together with all interest the accreting and all outpons representing such intrest to be due and payable and to execute s/id power of sale;

And such fainalt baying been made and having continued for six months and more prior to this date, and such written request having been made, I now declare all said 34 bonds and coupons now outstanding to be due and payable, and to execute s/id power of sale;

And such fainalt baying been made and having continued for six months and more prior to this date, and such written request having been made, I now declare all said to execute s/id power of sale;

And such fainalt having been made and having continued for six months and more prior to this date, and such written request having been made, I now declare all said to execute s/id power of sale;

The said property is situated in the city

he 20th day of Maren, w. E., took,
Pelock norm.
The said property is situated in the city of
isheville aforesaid, being, the entire steam
and electric plant, real estate, buildings and
ranchise and contracts for city lighting of
the said People's Light, Heat and Power
company and further particularly described
as follows:

franchise and contracts for city lighting of the said People's Light, Heat and Power Commany and further particularly described as follows:

First—All the rights, powers and privileges which the said The Feople's Light, Heat and Power Commany has by virtue of or under the contract made by the City of Asheville with L. N. Cox in reference to lighting said city, which said contract bears lided among the records of the clerk of said city and to which reference is hereby made for further and fuller particulars thereof.

Second—The following described real estate, situated and being in the State of North Carolina, in the county of Buncombe and in the said city of Asheville, being a part of the Lyman land, and more particularly bounded and described as follows:

Beginning at a stake on the northeastern margin of Fiverside street, the northwestern corner of the lot belonging to the Baltimore United Oil company, and runs thence with said margin of said street N. 34° 02′ W. 66 2.3 feet to a stake; thence N. 66° 28′ E. about 108 feet to the line of the right of way of the W. N. C. R. R. Co.; thence with the line of said right of way 66 2.3 feet to a stake; thence with the line of the right of way of the W. N. C. R. R. Co.; thence with the line of the particular of the line of the right of way of the W. N. C. R. R. Co.; thence with the line of the said lot south 65° 41′ W. about 108 feet to the beginning, being a part of the land allotted to A. B. Lyman in the partition of the Lyman land.

Third—All the buildings situated on said land and all boilers and engines thereon and all connections with said boilers and engines and all connections with said boilers and engines and all engines and all spurtenances thereun belonging or in anywise appertaining; and further, one National alternating dynamo of one thousand light capacity, two Western electric arc dynamos of fifty light capacity each, to gether with all rights, privileges, franchises, actions, and causes of action, demands caims, works and property of any and every kind

Carolina.

The terms of said sale are as follows:
Five thousand dollars (\$5,000) cash, the balance of purchase money in Equal Instail ments, maturing at thirty, sixty and ninety days from date of said sale, bearing interest from date of said sale at the rate of eight percentum per annum; deferred payments to be secured by deed in trust upon property sold executed according to the laws of North Carolina and in the usual form for such in atruments, containing the usual power of sale.

sale.

WORLD'S FAIR.

ue of scientific apparatus makes another \$1,020,000.

The frog, owing to its peculiar structure, cannot breathe with the mouth open, and if it were forcibly kept open the animal would die of suffocation.

If you are going to the World's Fair, write the Daily Citizen, Asheville, N. C., for illustrated printed matter describing the Fair, and time-tables and pamphlets issued by the steamer lines or railroads you would use from your home to Chicago. No charge is nade. This offer is made special arrangement with the Recreation Department the Christian Union.
