TUESDAY, JULY 18, 1893.

The latest revelations concerning the failure of the bank at Fostoria, Ohio, controlled by the late Secretary of the Treasury, show that the country did not change its financial manager any too soon. It seems that Mr. Foster overdraw his account some hundreds of thousands of dollars.

Raleigh isn't a very large town, and it would seem that the name of the correspondent who hinted in some thousands of papers throughout the country that there was cholera in Northampton county might be published, so that it could be put into the State album of fakirs along with Hyams. The next time it is learned in Raleigh that there is a disease in the suburbs somewhere that has not been named it will be well to hit on the top of the head with a club the man who proposes to telegraph the fact to the world.

CONSIDER THE MULE.

The evidence that all the persons stricken by lightning at the recent prohibition election in Broad River township, McDowell county, were "wets" and that no one of the "drys" was injured, seems to have been well established. The interest felt in reference to that singular occurrence continues to be discussed in the newspapers, and in McDowell county the people have not ceased to talk about it, lightly as well as seriously. That it is adding the prohibition cause is acknowledged by the "wets." If another election were held soon in that county scores of people who were anti-prohibitionists would, it is said, either stay at home or turn out and vote "dry."

While prohibitionists, part of the "religious element" and many of the "wets," believe, as one of the lightning-struck men expressed it, that the Almighty had something to do with it, another rather ingenious and scientific idea has been advanced by a gentleman who was on the ground when the lightning flash fell upon the crowd. He says the "wets" were supplied with fire water and were drinking it copiously, most of them having become drunk and disorderly. Hence, he believes, that the electric currents were drawn to those whose bodies were saturated with whiskey, while those free from liquor escaped.

Now let scientists test this theory by practical experiment. Of course prohibitionist Hill's mule that was killed by the same stroke must be taken into consideration.

IS SKILLED HELP LACKING?

The semi-annual report of new mill construction which the Boston Textile World presents in its July issue states that the growth of cotton manufacturing has been greater in the North than in the South, and that there is no indication that the latter States are gaining at the expense of the former. Considering the state of the money market in the last six months the greater conservatism of the South in business matters might account for the check in the growth of cotton manufacturing here.

The "wets" who are the cause of the trouble, are not only the cause of the trouble, but they are also the cause of the trouble.

The South has in great measure driven New England from the manufacture of brown goods, such as shirtings, shirts and cheap water power and raw material in the fields alongside the mills. I can see no insuperable obstacle in the way of the South being as successful in the manufacture of coarse yarns. It takes time and money to accomplish enduring works. New England will not yield her supremacy in manufacture of fine cotton goods without a heroic struggle, but skill and capital combined with the unrivalled natural advantages of the South will in due time transfer to her the supremacy of the cotton industry.

A visit to New England two years ago satisfied me of the secret of the success of the people of that section. Without natural advantages either of climate or products either of the soil or mine, New England's bank vaults are filled with money, her capital wealth is the greatest and her artisans and laborers are the best paid in the world. Necessity was the stimulus to her industry. The education of the head and the training of the eye and hand have enabled the people of New England to overcome the disadvantages of nature and to transform her barren soil into sites for workshops and factories, whose endless products find profitable sale in the markets of this and other lands. New England has the experience and skill and the regular channels of trade in which to dispose of her wares. I do not underrate those advantages, but they are not insurmountable.

Col. Walsh's remarks seem to point logically to the necessity of establishing manual training schools throughout the South.

IN ILLINOIS

Negroes Treated as Though They Were Chinese. CARLYLE, Ill., July 16.—At Sandoval, 13 miles east of Carlyle, owing to a scarcity of laborers, two strange negroes were employed by carpenters to help finish a house. Negroes are not allowed to live in that place, consequently a party of 75 waited upon the carpenters, threatening to lynch the negroes if they did not move at once. They finally promised, the men agreeing to leave town as soon as the building was finished.

Doctor John H. Williams has located his new offices in the front rooms over Rayson & Smith's drug store. In order to accommodate his consultation practice he gives morning and afternoon hours, i. e., 11 to 1 and 3 to 5.

A DENIAL.

The Western Hotel Did No Waste Water.

EDITOR THE CITIZEN: My attention has been called to an article appearing in your paper of the 17th, signed by Mayor Patton—in which that gentleman states that he has either "been reliably informed" or knows by personal investigation that water is being wasted at the Western Hotel.

I beg leave to most emphatically deny the said statement. To my certain knowledge no water has been wasted at this house. To the contrary, the hotel has been placed at great inconvenience by the failure of his honor the Mayor or his scientific assistants to supply sufficient quantity of water to meet the needs of the house, and the management has many times been compelled to hire water carried from outside places to meet its requirements.

Whether this is attributable to a want of sufficient pressure to bring the water to the second floor or not, while the water is being used below, or attributable simply to the cutting off of the water by the city for reasons of their own, we do not know. We do know however, that Mayor Patton will do quite well to investigate more closely a subject of this character before publishing his accusations, and make himself a little better informed as to the reliability of his informants before making his threats or proposing changes.

We pay for a sufficient quantity of water to meet our needs and propose to use such an amount of it, and invite his investigation. Mrs. J. J. Barrette, Proprietress Western Hotel.

They Did Not Waste Water.

EDITOR THE CITIZEN:—We noticed in yesterday's Citizen an article from Mayor Patton, which reads thus: "Here are some of the people who by carelessness cause great waste of water and render meters indispensable: County court house, Cowan & Co., or Bakery on North court square, etc."

We emphatically say that the statement as made by Mayor Patton is not true concerning us.

We would ask Mayor Patton with justice to ourselves, that before he makes another untrue statement concerning anyone, that he would either come himself or send some reliable person and see that our statement is correct.

We are respectfully, P. L. Cowan & Co., J. M. Wood, American Bakery.

FINE CROPS IN CLAY.

First Wet, Then Dry—Visitors College—Lumber.

HAYESVILLE, Clay Co., N. C., July 17.—Crops of all kinds except fruit are the best known years. The continued rains have abated and we now have dry weather which it is feared, will injure the crops if it continues much longer. Messrs. Dalton & Co. are now manufacturing furniture here.

Hayesville has a well organized literary society and the surrounding country as well as the town manifests a great deal of interest in it.

The firm of Cherry & Scroggs have dissolved. The sign now reads J. P. Cherry & Son.

Col. G. H. Baizler has taken charge of the postoffice.

Dr. Jno. W. Duncan and his accomplished daughter, Miss Georgia, of Atlanta are enjoying our pure atmosphere and water. We think a more desirable place than Hayesville could not be found for a summer resort.

The Hayesville Male and Female college will soon be revived, with W. H. Phillips as the head master. This school has accomplished a great deal in the past.

The Cherokee Lumber company are at work at several points cutting and floating lumber, which, it is hoped, will be a great financial aid to our county.

FROM GRAHAM COUNTY.

A Fine Batch of News—Teachers Wanted.

JOHNSON, Graham county N. C., July 14.—Crops in Graham county are fine. Corn looks better than it has for 10 years but we are needing rain. Oats and rye are fine, the harvest is about over. Corn is about land by.

The building lumber company has a few men at work. It is thought they will start up with a full force in a short time. Back Street, where a variety of crops, the third day of March by Serene Gunter, is still alive, but can't last long in his present condition.

Henry Millsaps, who was cut by Ed. Grant, is improving fast. Doctor Maxwell thinks he will be all right in a short time. Millsaps has had the best of attention from Dr. Wilson and Allen Holden.

We want some good school teachers in Graham. A teacher holding a first or second grade can get a good school at once by writing to C. Millsaps, this town.

The mountain range is good, and there are more good beef cattle in Graham than for years past. Beef buyers could do well here.

TAKE HEART. If you're a suffering woman. The chronic weakness, painful disorders, and delicate derangements that come to woman only have a positive remedy in Dr. Brown's Favorite Prescription. If you'll faithfully use it, every disturbance and irregularity can be permanently cured. It's a legitimate medicine for woman, carefully adapted to her delicate organization. It builds up and invigorates the entire system, regulates and promotes all the proper functions, and restores health and strength. "Favorite Prescription" is the only remedy for woman's ills that's guaranteed. If it fails to benefit or cure, you have your money back.

Which is the best to try, if you have Catarrh—a medicine that claims to have cured others, or a medicine that is backed by money to cure you? The proprietors of Dr. Brown's Catarrh Remedy agree to cure your Catarrh, perfectly and permanently, or they'll pay you \$500 in cash.

SCHEDULE.

Many Persons are broken down from overwork or household cares. Brown's Iron Bitters rebuilds the system, stimulates, moves excess of bile, and cures malaria. Get the genuine.

ONCE AN IMMIGRANT.

Valuable Testimony On An Important Question.

Patrick Walsh in Chattanooga Tradesman. The Governors of several Southern States met in Richmond a few months ago to discuss subjects of capital and immigration. They whered and they resolved that the South was the best country in the United States and promised the best field for investment and development. But that is the end of the convention. The Governors had a good social time and nothing is expected to come of the meeting.

A great deal can be said on immigration. There are people in every Southern city and State who do not want foreigners at all, and there are others who honestly believe that the South would be better off without them. I heard Gen. Toombs remark that there was no more land in Georgia than our children and grandchildren needed. But this is an overstrained view on the subject. Georgia and other Southern States would be greatly benefited by the influx of honest and industrious immigrants, no matter whether they come from Europe or the North.

We have no room in this country for Anarchists, Socialists and Communists, or for criminals or other wicked and undesirable persons. But it is to fly in the face of the great benefits resulting from immigration and deny its utility, as exemplified in the West to raise a hue and cry against the honest and industrious people of Europe who seek homes in this country. I shall never forget that I was once an immigrant and that there are thousands as good as I am in the land that I left 40 years ago, who are just as anxious as I was to come to the land of the West to seek an honest livelihood and enjoy the blessings of liberty.

As melody is to the ear and color to the eye, so in fine soda water is the flavor of the grape to the taste. Only finest syrups at Pelham's.

Royal Baking Powder. Absolutely Pure. A cream of tartar baking powder. Highest of all in leavening strength—Largest United States Government Food Report. ROYAL BAKING POWDER CO., 106 Wall St., New York.

West for the Summer.

Many of our readers will go to the World's Fair this Summer. While in the West, why not visit some of its leading resorts—see the Yellowstone, the Yosemite, the Grand Canon of the Colorado, Hot Springs, S. D., Helena, Mont., or take a trip to Alaska, the Great Salt Lake, or go to Banff, visit the resorts of Lake Minnetonka, Minn., Excelsior Springs, Mo., Colorado Springs, Pike's Peak and Manitou, the California mountain summer resorts, picturesque Mackinac and the various Michigan resorts, or the Lake resorts of Wisconsin? We will gladly send you full printed information in regard to these resorts or any others, with the ways of reaching them via any point, and help you to lay out any tour or route you may think or taking. Write, asking for what you want. By special arrangement with the Recreation Department of The Christian Union, New York, Address

THE DAILY CITIZEN, Asheville, N. C.

GLENN SPRINGS WATER

IS A SURE RELIEF TO SUFFERERS.

What Hon. T. D. Johnston says about it: "About four years ago I commenced the use of the Glenn Springs water, to rid my system of the malaria from which I had been suffering for some time. The water has entirely relieved me and I cheerfully state that I believe it to be as good water as can be found for all ordinary diseases of the liver and kidneys. For a general tonic and renovator of the system I believe it has no equal. Very truly yours, "T. D. JOHNSTON."

From John P. Arthur, Esq., Attorney at Law: "I don't know the constituents of the Glenn Springs water, if I did I would make some for myself. Neither do I know how it acts; if I did I would act so myself. It is a well made water and it acts well. I can only say that its effects on me and my forefathers has been more beneficial than any other water we ever used, and I am glad it has been put in the reach of as poor a man as I am. JOHN P. ARTHUR, May 23, 1893."

What C. T. Rawls writes Pelham's Pharmacy, Asheville, N. C.: "Gentlemen—I have used Glenn Springs water and consider it as compared with other mineral waters, the best I know of. Everyone in South Carolina knows about 'Old Glen Springs.' In fact it has been most favorably known there for a century. Yours truly, "C. T. RAWLS."

SOLE AGENTS, Asheville, N. C.
