D. Heinitsch & Reagan.

All other goods sold in proportion and no over charges in prescriptions.

A MEETING OF CITIZENS

PRACTICALLY ONE SENTIMENT SHOWN BY ALL.

The United Industrial Company's Plant Must be Located Here If It Is Possible—Some Speeches and Resolutions—Card From Maxwell.

The talk of the street on Saturday was the all-around good thing for the city in the proposition of the United Industrial company of New York. Men keen in the channels of trade, lawyers, capitalists and the holders of real estate became dead in earnest when it was given out that the special committee from the city council had decided upon an unfavorable report. The question was as to the surest way to secure to the people an enterprise in plain sight, greatly needed and from every point of view desirable, it is what it seems to be. The public opinion crystallized in a meeting at the Asheville club in the afternoon, and there the ball was set in motion. Among the representative men of the city present were J. H. Lee, J. M. Campbell, J. C. Martin, W. A. Wilton, H. A. Guder, M. E. Carter, T. W. Patton, A. T. Davidson, W. B. Gwyn, C. S. Cooper, Nat. Atkinson, D. F. Herndon, R. K. Hill, J. M. Westall, E. B. Atkinson, D. B. Wade, J. P. Sawyer, A. Rankin, W. W. West, J. D. Murphy, S. B. Kepler, J. P. Kerr, John Child, R. B. Johnston and J. B. Bostie.

When the company had assumed the proposition of a liberal body, hostmaster Kerr nominated Col. A. T. Davidson as the presiding officer of the meeting. Colonel Davidson was unanimously chosen chairman and Mr. Lee, secretary. The latter, briefly stated the object of the meeting to be the definite investigation from a business standpoint of the propositions made by the representative of the United Industrial company of New York to the city authorities, looking to the reestablishment of important manufacturing industries near Asheville.

Mr. Maxwell Talks.

Mr. W. G. Maxwell, the representative of the above company, stated that his company had organized solely for the purpose of manufacturing knit goods, and that they believed the South to be the section of the country best suited for their industry. The company had abundance of capital and the strongest men, financially, were behind it. After a careful survey of the various points for an eligible location, Asheville had, for many reasons, been selected as the best adapted and the preliminary surveys made above the city on the Swannanoa river, near Long's station. They expect to make the place a manufacturing center and would need 1,500 horsepower to do it. The water power available was considered inferior to that at other places visited and the estimate of an engineer, Byron Holly, placed the cost of a dam at \$150,000. The expense of the electric equipment to such an amount for the power or the acceptance of offers made by other cities and their chances of growth. The danger of pollution of Asheville's water supply was thoroughly canvassed and the idea was suggested of a proposition to pump the city's water from the company's dam, do the city's lighting and thus use the surplus power but the lights were under contract and that part of the idea was abandoned.

Concluding Mr. Maxwell said: "If the city will extend the mains and allow the company to pump water at the present rates, with the deed of the present plant, except the pumps, we are ready to begin at once the erection of our dam. We will need a few miles of electric railway and that will follow. We do not propose to have company stores, and when our help has finished their day's work their time is their own. We are ready to go to work on the dam and the factory. Our help will be skilled labor; our pay rolls will be \$5,000 a day and our plant will cost a million dollars."

Mr. Maxwell added that he would be glad to answer any questions that might be suggested to the minds of any person present and Mr. Bostie inquired when the work would be commenced under the proposition?

Mr. Maxwell: "Immediately; the dam and the factory."

Chairman Davidson: "What is the distance from the present pumping station to the proposed dam?"

Mr. Maxwell: "About one and a half miles."

Chairman Davidson: "What steps have you taken toward securing the land necessary?"

Mr. Maxwell: "We have options five miles up. The dam will be 85 feet high and the backwater will extend five miles. This will give a pure body of water from which to pump."

W. W. West: "Does your proposition guarantee a constant supply of water free from pollution from the start?"

Mr. Maxwell: "The city should not disturb the present works until the dam is 20 feet high; then we will have a steady supply of pure water. We propose to build a storage reservoir further up the stream."

J. P. Kerr said that Asheville's opportunity had now come and that by every honorable effort this industry should be secured. If the company is able to do what they propose, Asheville ought to exert its very best endeavors to obtain the prize. Nine out of every ten business men in the city think we should help this company to make its wheels go round. We can't afford to let the thing go by. Other places will be glad to get it. Our climate is peculiarly adapted to the particular kind of manufacture contemplated. Here the wheels will move the entire year; and the skilled labor required will bring Atlanta and command good wages and they will be most valuable to the community and make good citizens.

To Investigate the Company.

The speaker then offered a motion "that a committee of three be appointed by the chair to investigate thoroughly and report fully to the people of Asheville, through the public press, as to the responsibility and reliability of the United Industrial company of New York."

Hon. H. A. Guder heartily endorsed the views expressed by Mr. Kerr, and thought that if investigation proved the company to be all right, the situation should be taken advantage of.

J. D. Murphy then asked Mr. Maxwell

(Continued on fourth page.)

RAILWAY NEWS.

The R. & D. Reduces Wages—First Sleeper in.

It is very much to be regretted that the railroad business of the country is so much depressed that the Richmond and Danville system, as well as other railroads in the South, has been forced to reduce salaries. The Richmond and Danville were among the last, but have just notified the trainmen that their pay will be reduced 10 per cent., to be put back to the old figure as soon as business will justify it. The Richmond and Danville have been liberal in their pay to their men. It is hoped the stagnation of business will soon be over. The business of the Richmond and Danville system has fallen off over \$150,000 per month, so the officials state. On account of slack business the Richmond and Danville was not able to pay their tolls until the 28th instead of the 15th inst., as usual. The officials were cut 20 per cent. on Sept. 1st, but this was not sufficient.

The first sleeper on the New York and Asheville express came on to Asheville this afternoon. These cars will be handsome buffet cars and will hereafter be kept on to try and encourage travel to Asheville.

A SIGNIFICANT MOVE.

Going Out of Bleeding Kansas Into Maryland.

BALTIMORE, Md., Oct. 2.—Sixteen German families, tired of Kansas, arrived in Baltimore last week bound for the eastern shore, in search of pleasanter homes. They came from the country around Brainerd, in Butler county, Kan. The tract on which they will locate is the old Henry estate, and consists of about 1,500 acres. The land is to be divided into 20, 40 and 80 acre farms, and sold to settlers at \$12 an acre, and they will have 10 years in which to pay it.

The land will be cleared and each family will build its log house this fall and winter. In the meantime the colonists will live in two of the three houses on the place and in the three large barns.

The colonists form the advance guard of a large body of fellow countrymen, now in Kansas and in Russia. Within a month a party of about twenty families, accompanied by Rev. Henry Sizer, their pastor, will come in from Kansas in a party of 100 families, expected shortly afterward from Germany.

NOT SO SPECULATIVE.

A Grading Showing of New Enterprises in the South.

CHARLESTON, S. C., Oct. 2.—The report of the industrial development of the South for the third quarter of 1893, ending September 30th, as compiled by the Tradesman, shows a considerable falling off in the number of new enterprises reported as compared with the same period of 1891 and 1892. The Tradesman says that a careful examination of the report, however, shows that the decrease is not largely in enterprises of a somewhat speculative nature. The establishment of industries for the utilization and development of the natural resources of the South shows a most gratifying average when the financial condition of the country for the past three months is taken into consideration.

PATRICK DOLAN.

Death of the Man Widely Known as West Virginia's Cattle King.

PARKERSBURG, W. Va., Oct. 2.—Patrick Dolan, widely known as West Virginia's cattle king, a farmer whose landed possessions was so great that their limits could not be seen with the naked eye from the top of the highest mountain peak in his vicinity, and who for years has not known the number of cattle in his herd, died at his residence near Wolf Summit Friday, of a complication of diseases, at an advanced age.

He emigrated from Ireland fifty years ago, began life as a railroad laborer, and died possessed of the first dollar he ever earned in this country.

VANCE AGAINST THEM BOTH.

The Senator Will Vote Against Simmons.

WASHINGTON, D. C., Sept. 30.—Senator Vance, while saying he cannot make any charges against Collector Simmons, declares his purpose to vote against his confirmation, but says this purpose is not irrevocable. This statement is on the authority of gentlemen who have seen him about the matter. My informants also say that Senator Vance declares it to be his settled purpose not to consent to the consideration of Mr. Simmons' confirmation until after the Senate shall have acted upon the confirmation of Mr. Ellis.—Charlotte Observer.

L. & N. STOCK.

Directors Increase It \$5,000,000, Making It \$60,000,000.

NEW YORK, Oct. 2.—At a meeting of the Board of Directors of the Louisville & Nashville railroad company the following resolution was adopted: "That in view of divers negotiations that are pending it is recommended to the stockholders to increase the capital stock of this company to the extent of \$5,000,000, making the amount of capital stock \$60,000,000."

To Lasso Niagara's Powers.

PHILADELPHIA, Oct. 2.—Three of the immense turbine water wheels which were built in this city, at a cost of \$200,000 each, for the purpose of utilizing the stupendous power of Niagara Falls for industrial purposes, will shortly be placed in position. Each wheel is expected to develop 5,000 horse-power.

Wholesale Forgeries.

NEW YORK, Oct. 2.—Oscar Adler has been arrested for wholesale forgeries amounting as far as ascertained to \$20,000. His victim was a member of the big dry goods firm of Bloomingdale brothers.

With The Jury Now.

NEW YORK, Oct. 2.—[Special.]—In the case of Ellison, the society man, charged with assault on Broker Henriques, the defense closed this morning, and the case goes to the jury this afternoon.

THE END MAY BE NEAR

RENEWED TALK OF COMPROMISE LEGISLATION.

The Silver Men Always Ready to Speak—The House Will Discuss the Federal Elections Bill—Non-Partisan.

WASHINGTON, Oct. 2.—The ninth week of the present session of Congress began today. The result of the work so far accomplished cannot be said to be encouraging to persons who had hoped for a speedy adjustment of the great financial question which caused the issue of the call for the session.

The present outlook is towards a continuation of the debate which has been in progress for the last five weeks in the Senate. The renewed talk of compromise legislation, however, gives the impression in some quarters that the end may be near. The list of speakers has not been completed for this week, and it may be assumed that when it is, the names of few repeal senators will appear upon it and the debate will be left almost altogether to the silver men. Three of these, Teller, George and Morgan, are entitled to the floor at any time to conclude speeches which they have begun but not finished.

The week's business in the House will be confined, so far as can be stated, to a continuation of the debate on the election bill, under the order which will exhaust itself on the 10th inst. The debate as far as it has progressed has failed to develop any of that intensity of partisan feeling so freely predicted of it. In fact, it has been rather tame and uninteresting, and on one or two days last week an early adjournment was necessitated, because there was no one ready to proceed with the argument. An improvement in this respect is anticipated this week.

THAT MINTOSH AFFAIR.

Even the Mother Exonerated Deputy Sheriff Arrington.

POSTER CREEK, Madison county, N. C., Sept. 29.—Deputy Sheriff Arrington with a posse surrounded the cabin of Neal McIntosh late last night to arrest him for making a felonious attack five weeks ago on William Allen, who had been put in his place as driver of a lumber team on the Marshall road. Allen had five teeth mashed in with a rock.

McIntosh is a desperate man and resisted arrest with an axe. His wife laid an infant on a bed to help keep McIntosh from doing any harm with the axe. Arrington then fired a small 32 caliber pistol, but his man was on the move and the shot missed him and struck the infant, entering the abdomen and ranging upwards.

Awaiting the arrival of Dr. Engish hopes are entertained that the wound is not fatal. Even the mother exonerated the officer from blame. McIntosh was secured. He was a brother of Joe McIntosh who was in the Asheville jail last winter.

BRUNSWICK IS BETTER.

Only Eight New Cases—Cold Weather the Great Specific.

BRUNSWICK, Ga., Oct. 2.—[Special.]—There are eight new cases of yellow fever this morning. The epidemic is rapidly losing its hold under the influence of the colder weather, and in a few weeks there will be no sign of fever left. Guards at the near-by towns have been increased, owing to the appearance of one or two cases outside the limits of Brunswick. There are two new cases on St. Simon's island.

JUSTP, Ga., Oct. 2.—Surgeon Murray of the Marine hospital service with local physicians held an autopsy upon C. J. Warren. He was a brother of Joe McIntosh who was in the Asheville jail last winter. The physicians pronounced it a genuine case of yellow fever.

GAINING A LITTLE.

In Seven Years The Supreme Court May Have Caught Up.

WASHINGTON, Oct. 2.—The October term of the Supreme court of the United States will begin a week from today, the 9th inst. The court will open with a docket that in itself demonstrates the advantages of the new court of appeals. While the docket for the October term in 1892 at the opening contained 1,183 cases there are but 1,025 awaiting the court's attention at this time. If the rate of progression is maintained, the court will be confronted with nothing but current cases seven years hence.

The Van Alen Case Again.

NEW YORK, Oct. 2.—Horace White this morning publishes a letter to the press of the country reiterating the statement that Richard Watson Gilder wanted to raise a fund to return the \$50,000 to Van Alen, which he contributed to the Democratic campaign fund.

France-Siam Dispute Settled.

BANGKOK, Oct. 2.—A final settlement of the Dispute between France and Siam was arrived at today by the acceptance on the part of the Siamese government of the drafts of a new treaty presented by France to the Siamese government.

James T. Alley Dead.

NEW ORLEANS, La., Oct. 2.—Col. Jas. T. Alley, for the past fifteen years manager of the Western Union Telegraph company in this city, and a prominent member of the Army of Tennessee association of Confederate veterans, died last evening aged fifty-five years.

Ran Into an Open Switch.

SPRINGFIELD, O., Oct. 2.—[Special.]—A passenger train on the Frisco road ran into an open switch today. The engineer and fireman were instantly killed and many passengers were injured.

Daniels Still Climbing.

WASHINGTON, Oct. 2.—Secretary Hoke Smith has appointed Josephus Daniels of North Carolina, chief clerk of the Interior Department.

The British Battleship Nelson was run into at Portsmouth Friday by a dredger just as she was leaving on a trial trip after having been repaired.
