# **Fine Groceries**

UR Advertising Man, at his dinner table, often hears of the "Mark Down Prices" frequently displayed by grocers near his home. The level-headed Miss who does the family marketing, is now and then tempted to try from the bright-labeled and boastfully praised goods that are selling "at fifty cents on the dollar." The low cost would seem to mean bankruptcy all along the line to Grocers, Wholesalers, Canners, and Producers. That should be a matter of regret rather than joy to the consumer, for unless labor has a due reward the average eater will surely feel the pinch upon himself in turn.

Our Advertising Man's family finds that "Cheap" goods on the table, almost without exception, prove a delusion and a snare. The low price they cost is about thrown away. His family is sick of the whole miserable business, and their general verdict is, "Go to & Co's where you get the best every time." There you pay for something that is worth having when you get it, and it is a comfort to trade with them. That is why we will do all our trade there in future.

The immortal Lincoln well said, "You may fool all the people some of the time, and some of the people all of the time; but you can't fool all the American people all the time," and our Advertising Man says the consumers of this Country are finding that out. The better dealers draw the better trade, because they supply
