THE coal men are asking for a higher tariff on bituminous coal so that the Canadian article can not be sent into fact that the wages of Canadian coal miners are higher than the average of those in the same industry in this country, and also in the face of the other fact that under the present tariff we export more coal into Canada than Canada sends to us.

SENATOR BUTLER'S paper, the Cacasian, says"the Democrats evidently think they are something or small something. It might be a matter of conjecture as to what the Democrats see, but as to what they smell no one should have any doubt as long as the present legislature is in a ssion in Raleigh. And Senator Butler is as much, or more, responsible for the gang as any other jone man in the State of North Carolina.

THE New York Sug is the only paper that openly champions the cause of the trusts. It says: "The virulent warfare against the trusts is merely a new phase of the old struggle against machinery. Investions which disturbed the order of things by enabling one man to do the work of ten, and made the invertor rich, were fought with bitterness, and even violence, as inhuman enemies of human labor. The trust, a device for industrial economy so effective as to partake of the nature of a mechanical invention, has aroused the antagonism that once sought to bar the progress of machinery; and from the nature of man's intelligence, the trust may be counted upon to withstand, like its prototype the efforts for its destruction."

A number of valuable statements Corn we must have. Don't wait for were made, the most important, perhaps being those of Mr. Kuox (Rep.) of Mas sachusetts, in charge of the Lill, who said that" the country was upon a gold basis; that it would doubtless continue an international bimetallic conference. and that there was sufficient statesman ship in the Republican party to provide for the largest possible use of silver, and that it would not be through the unlim ited coinage of that metal."

Heretofore post-mortem examination has been necessary in order to understand the mysterious make-up of some people, If Mr. Edison's the United States, and this in face of the expectations are realized, bowever, the same result can be reached by an ante mortem diagnosis, and the secret of the human "prison house" disclosed before breath leaves the body. To be brief, the wizard has just uncovered a new chemical common in his laboratory at Liewellyn park that promise to revolutionize surgery and even the broader domain of science. Indeed, to state the anet facts, Mr. E lison has succeeded in manufacturing a number which offer greater possibilities in con-nection with the fluoroscope. Several of them in particular hold physicians may sooner or later see the exact position and condition of the in ternal organs of their patients.
