SHOES!

We do not often reflect what a devoted friend we have in the shoe-how it protects the foot against thumps, bruises, wounds and cuts, from the burning sun and rains of summer, the frost and snow of winter; how, also, it protects our bodies from disease, and often saves our very life and limb in slippery places.

In selecting shoes, then, select them as you would a friend-with care, with attention, the use of experience and judgment-and if you do this you will find our store will suit your wants.

Spanish minister's attention was today called to the reports from Spain as to the sailing of the Spanish torpedo fleet for Havana and to the significance which as been attched in this country to this movement. The minister said the movement of the torpedo craft had been long contemplated, and even before he left Madrid the Queen Rgent had bid goodbye to the captain of the fleet. Their coming had no relation whatever, he declared, to recent conditions as they were wanted for work along the Cuban coast.

The minister has received no intimation as to the findings of the Spanish naval commission which is investigating the Maine disaster. He says this formalty and secrecy as the United States court of inquiry and that no intimation of its findings will be justified until the formal report is presented to the Spanish government. Polo added his belief, however, that there was no doubt the Spanish commission will report that the Maine explosion was due to an accident and said he was convinced that this also would be the conclusion reached by the people in this country when all the facts in the mater were made known.
