Secretary Root says the chief of engineers recommended the granting those mining monopolies at Cape Nom that Senator Turner of Washington denounced so bitterly in the senate. But as the secretary of the interior has control over all mines in Alaska, including the rich mineral sands at Cape Nome, it would be interesting what other "chief" besides the chief of engineers told Root to give away what he had no right to give away. .

A month ago the Republicans were saying that the people would approve of that Porto Rican tariff bill "when they understand it;" but the more they understand it the more they denounce it as robbery and jobbery.

ALL HUMBUG

The Chicago Times-Herald, a Republican paper, says that the resolution for international bimetallism in the Republican national platform was inserted only to deceive the voters.

The Republicans tell us it is done so as to furnish a basis for bank-note circulation. That is to say a national bank can buy \$25,000 worth of these new bonds, deposit them in the treaslend out. He gets 2 per cent, on his bonds and from 6 to 10 per cent. on his notes, according to his locality and his skill as a financier.
