DR. COOK TELLS HIS STORY OF SUCCESS IN SEARCH FOR POLE

Finds New Continent on Which Rests Nothermost Rocks of the World

LUCKY DISCOVERY OF DOGS AND SUPPLIES

Esquimaux Had Stored up Provisions For The Winter Bear Hunt

(By Associated Press)

PARIS, Sept. 2.—The Paris edition of the New York Herald this morning published a signed statement from Dr. Frederick A. Cook, which it dated "Hans-Egede, Esquimaux, Westestad" on his experiences in the Arctic regions.

"After a prolonged fight with famine and frost," says Dr. Cook, "we have at last succeeded in reaching the North Pole. A new highway, with an interesting strip of animated nature has been explored and her game haunts hunted, which will delight sportsmen and extend the Eskimo horizon."

"Land has been discovered on which rest the earth's northernmost rocks. A triangle of 30,000 square miles has been cut out of the terrestrial unknown. The expedition was the outcome of a summer cruise in the Arctic seas on the schooner *Bear*, which arrived at the limits of navigation in Smith sound late in August, 1907. Here conditions were found to launch a venture to the Pole. J. R. Bradley liberally supplied from his vessel suitable provisions for local use. My own equipment for emergencies served well for every purpose of Arctic travel."

Many Esquimaux had gathered on the shores of Ammassak for the winter bear hunt. Immense quantities of meat had been collected and about the camp were plenty of strong dogs. This combination was lucky for there was good material for equipment. All that was required was conveniently arranged for at every point only seven hundred miles from the Barrow center. A house and workshop were built of packing boxes by willing hands and this northernmost tribe of 250 people set themselves to the problem of devising a suitable outfit. Before the end of the long winter night we were ready for the entire prose and plans had matinnes to force for Dr. Cook and taking supplies to Commander Peary. The expedition

AMERICAN FLAG FLOATS FROM TOP OF NORTH POLE

Dr. Frederick Cook After Two Years Succeeds in Quest And Cables News Before Going on Shipboard In Polar Regions.

(By Associated Press)

NEW YORK, Sept. 1.—Successful Well Address Copenhagen. Fred. Full of meaning, if successful, were interpreted to indicate that he had reached the North Pole, the wire coming cable message, exasperating in its brevity, was received in New York today from Dr. Frederick A. Cook, the American explorer, whom the last cable advised today credit with having accomplished what no man ever did.

The message was sent to the scientific society not to me or his associates interested in his expedition, but received my formal indication of Dr. Cook's success. Arthur M. Huntington, president of the American Geographical Society is out of the city as Rear Admiral W. S. Schley, president of the Arctic Club. The effects of the explorers' club could not be found.

Today's message from Dr. Cook to his wife was dated at Lerkwæk, Scoresby Islands, the first available point of transmission in the regular steamship course between Greenland ports and Copenhagen, whence he rebounded. Because of its brevity the assumption is that the message was sent primarily to assure his wife of his safety and not to apprise the world of his discovery.

Planned Route Well.

At a meeting of the Explorers' club of New York, in October, 1907, a letter from Dr. Cook dated at Elulus, August 26, gave this information:

"I find that I have a good opportunity now for the pole and therefore I will stay here for a year. I hope to get to the Explorers' club in September, 1908, with the report of the Pole. I plan to cross Ellsworth land and reach the Polar Sea by Nansen's straight. I hope you can induce some of the members of the club to come and meet me at Cape York before the Pole with the flag."

About the same time Herbert L. Bridgman of Brooklyn received this letter from Cook, similarly dated:

"I have hit upon a new route to the North Pole and I will stay to try it. By way of Buchanan Bay, Ellsworth land, and northward through Nanuq Strait over the Polar Sea. It seems to me a very good route. There are natives and dogs for the task. So here we go for the pole. Mr. Bradley will tell you the rest. Kind regards to all."
