## MARKET NEWS

### NEW YORK MARKET WAS DEPRESSED

NEW YORK, Sept. 2.—It was a brimful list of depressing influences with which the stock market had to contend today. When trading was resumed after the triple holiday there was an outpouring of New Haven following the news of today's week, which depressed the stock nearly 3 points to 90 1/2, a new low record. Another bear factor was the unexpectedly poor bank statement of Saturday. July reports of some railroad systems emphasized that July results had been disappointing.

Both Pennsylvania and New York Central reported increases in gross earnings but heavier operating expenses.

As the day advanced the market received a further setback from the government cotton report, disclosing a loss in condition larger than had been expected. Another move against the so-called anthracite trust by the government in the way of a suit against Reading depressed the coal market. American factors influenced the stock market less relatively little ground. Prices were bid up sharply at the outset, under the lead of the coppers, which were benefited by the advancing tendency of the metal market. London buying estimates at 20, 60 shares, helped up prices. Canadian Pacific was marked up four points and the Harriman's, Amalgamated, China, Utah Copper and various other stocks a point or so. The rise was utilized to distribute stocks, however, and a reaction quickly came.

Early gains were lost and as the day's unfavorable news developed the tone grew heavier.

New York Central was especially weak, falling back 3 points. The close found prices in most cases under Friday's last figures.

Bonds were irregular. Total sales par value, \$1,550,000. United States bonds were unchanged on call.

Total sales were 378,100 including: C. C. L. 200; C. & O. 2,000; Lehigh Valley 2,000; L. & N. 400; Reading 2,000; S. A. L. 100; do pfd 200; Northern Railway 1,300; do pfd 200; Tennessee Copper 1,700; United States Steel 29,500; United States Steel pfd 100.

### NEW YORK COTTON PRICES JUMP

NEW YORK, Sept. 2.—The government report making the condition of the coming cotton crop only 58.2 per cent compared with 74.1 last year and 67.2 two years ago, was followed by one of the most sensational advances that has ever occurred on a government report day during recent years. Private condition figures had prepared the trade for a bullish report, and the market had advanced very rapidly since the middle of last month but the official figures proved even less favorable than anticipated and inspired a general movement. The South was credited with selling on the advance, supposedly against the coming but both trade interests and speculators were heavy buyers, and while the offerings were heavy enough to cause slight reactions in the general tendency of the market was upward. Demand contracts sold at 12.34 in the last trading, practically the 13 cent level, and 211 points or \$10.55 per bale above the low record of August 14.

Closing prices were 3 or 4 points off from the best, but the final tone was firm at a net gain of 67 to 71 points, as compared with the closing figures of last Friday. Local statisticians said that on the basis of acreage the official statement that 100 per cent of this season of the year is equivalent to 252 pounds to the acre, today's figures pointed, mathematically, to a crop not over 13,500,000 bales and while these figures did not seem to be at all generally accepted, the action of the market certainly suggested a considerable scaling down of acreage reports, particularly a deterioration reports have continued to come in, and the bulls claim that cotton has lost ground since the government report was compiled. Liverpool made a firm showing over the local holidays, and the market here opened firm at an advance of 3 to 23 points. Prices sold 30 to 35 points net higher before the government report was issued and the market was extremely active during the entire day. According to New York's figures the commercial crop of 1913 is 14,100,000 bales, and the New Orleans exchange estimated the world's consumption at 14,900,000 bales, suggesting a big decrease in the world's mill stocks for the season.

Spot cotton quiet; middling uplands 13 1/2; up 13 1/2. No sales.

### NEW ORLEANS COTTON

NEW ORLEANS, Sept. 2.—The cotton market displayed marked strength today on heavy buying stimulated by continued crop damage in the western belt through heat and drought, the department of agriculture's report on condition on August 25 of 58.2 per cent, and the census bureau's report showing record breaking consumption of American cotton for the season just ended of 14,900,000 bales, as against a crop of less than 14,250,000 bales. Shorts bought covers fairly but the bulls of the cotton market were in a hurry to get their bulls talk was indulged in right to the condition of the crop in the West. The forecast held out no hope of any change in weather conditions.

On the opening the tone was weak and prices were 1 to 1 1/2 points up on good cables and a dry nap. Expectations of a bullish report on condition at 11 o'clock also caused a good volume of buying. Official reports indicated that next to no rain fell in the West over the holidays. The forecast was widened to 29 to 31 points. After the report the market stood 41 to 43 points up, at which level were heavy sellers to realize profits and the market fell off about 10 points. In the afternoon establishing new high levels for the season and finally landing 63 to 71 points over Friday's final figure. The close was steady at a net gain of 61 to 62 points.

The market was fairly active throughout the session but no great excitement attended the advance which was the widest the market has seen in many months.

### CHICAGO MARKETS.

CHICAGO, Sept. 2.—Wheat today showed strength owing largely to the fact that deliveries on September contracts proved smaller than many traders had expected and has caused no selling pressure in the pit. Unseasonably hot weather gave the corn market a lift. Oats sympathized with the corn in other grain. Although provisions opened generally lower on account of large runs of hogs yesterday and because of heavy deliveries of lard and ribs, the pressure met solid resistance.
