For the first time in a hundred years a genuinely effective method of removing unsightly hairy growthis has been discov-ered. The new phelactine process does not merely take off the hair-ends; it ac-tually removes the roots? It does this instantly and harmlessly. It does not act anything like the depliatory, elec-trical, or other methods. Phelactine is non-odorous, non-poisonous, non-irritat-ing. Get a stick of it from your drug-gist, follow the simple instructions, and have the satisfaction of seeing the roots themselves removed at last. If not per-fectly satisfied the purchase price will be returned to you.
