I did not have an appetite, and my head and back hurt all the time. And then I took typhoid fever! After I got up, I was so weak and nervous I could hardly walk around. I saw ZIRON advertised in the papers, and thought I would try it. When I had taken it, I feit better than in a good while. My appetite came back, and my back and head felt a great deal better. It certainly did wonders for me. I am getting along just fine. I have told my friends about it, and they say it is the best medicine they have ever taken.

Certainly ZIRON Iron Tonic has helped me."

If you haven't been down sick, take ZIRON to help make your system strong enough to throw off any possible germ attacks. If you have had some weakening illness, take ZIRON to help gain the

WAR DEPARTMENT TO DISCONTINUE SERVICE AND INFORMATION BRANCH

The service and information branch of the war department will be discontinued on June 20. This is the governmental agency created in March 1819, to help men of the home-coming army and navy re-establish themselves in civil life upon demobilization. Originally organized by Colonel Arthur Woods, of New York, as the office of the assistant to the secretary of war, it was taken over in September list by Major General William G. Haan, assistant chief of staff.

Secretary Baker's first idea was to give ex-service men assistance in obtaining employment. The whole country was covered, and a force of officers traveled continually, linking up the various agencies interested in employment work, and lending all the assistance possible from the war department. As the demand for this decreased, the service and information branch turned its attention more to the other problems of veterans, particularly the disabled.

To dete 1.457.842 men have registered for employment at the government and welfare agencies all over the United States, Of these 1.053,544 have been placed at work.
