Donald Gillis Discusses Promotion of Library Work Through Proper Publicity.

A well attended and thoroughly interesting meeting of library directors and librarians of the Asheville district of the North Carolina Library Association, and several visitors, was held in the Battery Park Hotel yesterday, 23 persons being present. An agreeable social feature was a luncheon served at 1 o'clock.

Donald Gillis, chairman of the Asheville Library Board, discussed the promotion of library work through publicity, suggesting some practical methods of interesting readers. Miss Phyllis A. Dickey, a librarian of considerable note who is temporarily in Asheville, discussed features of library work.

District Chairman D. V. Blayney, director of the Y. M. C. A. and library at Canton, presided and by helpful suggestions stimulated interest in the discussions on the subjects presented. The round-table talk in which a representative of each library made report of progress, was effectively led by Miss Mary B. Palmer, the talented secretary of the North Carolina Library Commission, who makes at intervals tours of the State to promote library service and extend the scope of the commission's traveling libraries. Don't burn coal yet— use Kerosene

James J. Storrow, Fuel Administrator of Massachusetts during the War and special coal consignee during the present coal shortage, has issued a timely warning against drawing on the meagre coal stocks until absolutely necessary. Mr. Storrow makes the following suggestions, among others:

"Don't burn a pound of coal this month or in October."

"Cook and heat water for your household with a kerosene stove or gas stove. Buy a portable kerosene heater. It is handy. It is cheap. It can be moved easily from room to room. It will save coal and money. It will perhaps keep you out of the coal line next winter."

"Cooking by kerosene stove is cheaper than coal. It is more comfortable during these warm days."

"Kerosene can be bought anywhere. Kerosene stoves and heaters can be bought today at any hardware or probably any house furnishing store or general country store in the state."

The coal shortage is already causing much inconvenience. How much actual suffering and hardship it will cause next winter no one can say. Certainly, the expedient thing to do is to save every bit of coal you now have by cooking and heating with other fuels. Tens of thousands of families are already conserving coal by burning Aladdin Security Oil—the perfect kerosene. If you need a cookstove or heater look at the improved Perfection line.
