

NEW YORK COTTON IS OFF TOWARD THE CLOSE

Final Quotations Barely Steady at Net Advance of 4 to 12 Points.

NEW YORK, Oct. 4.—For a time today the cotton market showed a decidedly firmer tone but rallied to a little more southern selling around 2.18 for December contracts and were partly lost in the later trading with that delivery closing at 20.94. The general market closed barely steady at a net advance of 4 to 12 points.

There was also buying on claims that spot cotton was being offered less freely in the southwest and that the volume of hedge selling was falling off. The advance seemed to bring in rather more southern commission house buying and the market showed considerable strength during the middle of the day with January selling up to 21.02 and with the near-month positions showing net advances of 10 to 25 points. The southern selling there seemed to be a little more active and last prices were several points off from the best under trading.

Cotton closed barely steady.
