### ANNOUNCE LINE-UP FOR GAME TOMORROW

Marco Matthews, Local Boy, May Not Appear in Line-up—Hold Secret Drill

Throughout the season there has been uncertainty about the tackles. Sometimes the first two men have been Matthews and Hawfield. But recently Fordham and Melver have seemed to be Peizer's first choice. The field was dry enough for outdoor practice today. There was no scrimmage, however, only signal drill was held in secret.

I beseech you in the name of our Lord Jesus Christ that none of you do run so laxly in the way to heaven as to hinder either yourself or others.—John Bunyan. Get the pattern of your life from God, and then go about your work and be yourself.—Phillips Brooks.

# RADIO BROADCASTING NEWS

## RADIO BROADCASTS HAVE COME TO STAY

Public Has Realized Value of Quality Concerts, Stock Reports Being Broadcasted.

Broadcasting has become a public necessity, and is rapidly lining itself up with other utilities such as the telephone, telegraph, electric lights and moving pictures, and just as the activities were crude in their beginnings, but later refined, radio has been developing by leaps and bounds until now practically all worth while activities of general interest to the public have been made available.

In answer to an interviewer, if radio broadcasting would be discontinued, Mr. H. P. Davis, a Westinghouse official and originator of this service, says in a recent issue of "Radio Digest," consider the effect of discontinuing broadcasting at the four Westinghouse radiophone stations. The combined audience of these four stations is estimated at least a million every night in the week. It may be more. This estimate is based on an approximation of the number of radio receivers which have been sold in the territory covered by these stations.

What would be the result if all broadcasting stations should stop suddenly, with or without warning, entertaining and informing this vast audience? The effect upon this audience would be about the same as would occur if some one or more of the utilities already referred to were taken away such as the electric light, or the telephone—or even further the same as stopping the newspapers and the magazines, and the cutting off of amusements and communications. The effect—probably right now would not be so

## KIWANIS ENTERTAINERS IN PROGRAM FOR THE CITIZEN'S LARGE INVISIBLE AUDIENCE

Greensboro Kiwanis Club Band Gives Numbers.

James Hall Heard in Number Negro Songs—Broadcast News.

The Kiwanis Club Band of Greensboro, N. C., which is one of the outstanding features of the district convention of Kiwanians of the Carolina, now in session in this city, entertained The Asheville Citizen's large invisible audience with a number of pleasing selections last evening beginning at 7 o'clock.

With M. A. White, directing, the first number by the band was "Our Director," a march which penetrated the air strongly and clearly to the pleasure of all those "listening in."

This selection was followed by negro songs, "Big Feet and "Mammy," sung by James Hall, who is becoming well known by WFAJ audience as an artist of considerable talent.

"Flies," a novelty number by the visiting Kiwanian band, immediately followed Mr. Hall's solo, and vital as it will be later, as the service improves and grows, which it is bound to do.

If this should happen there would be a public clamor that would quickly bring some solution of a state or federal nature. Broadcasting will not stop, however, as there is enough commercial possibility and good will in this business to make it worth while for these companies that can benefit from it, to continue the service.

## Questions On Radio Answered Through Citizen's Station

Questions pertaining to radio will be answered for readers of The Asheville Citizen who when making inquiry enclose a self-addressed and stamped envelope. The citizen's station WFAJ is in charge of G. I. Stevens, radio construction engineer, who is spending a considerable portion of his time answering communications.

was one of the snappiest numbers that WFAJ's invisible audience has been favored with.

"Tenth Regiment," another selection by the Greensboro musicians, was followed by a selection on the Sonora phonograph, entitled "Pagliacci," composed by Leoncavallo and sung by Giuseppe Danze and recorded on a Brunswick record. Mr. Danze will sing at a concert to be given by the Saturday Music Club of Asheville at the Auditorium October 24, which will be given as preparatory to the Biennial of the Federated Music Clubs of America in Asheville next year.

A number of news items in reference to the State Fair, deaths, accidents and an attack on railway shops were broadcast.

The next program to be broadcast will be on Thursday evening beginning at 7 o'clock, Eastern standard time, 8:00 meters.

## Operators Licenses Follow Examinations

WINSTON-SALEM, Oct. 17.—L. C. Herron, assistant radio inspector of the United States radio board, with headquarters in Norfolk, Va., will be here November 8 to examine candidates for commercial and amateur radio operators licenses, which, it is said, are required of all operators of sets whether used for public or personal matters. A number of persons here are expected to take the examination.

CHENEY'S EXPECTORANT Instant Relief Whooping Cough Croup & Cold Bronchial Troubles USED SINCE 1872

## WASH THE KIDNEYS IF THEY BOTHER YOU

Take a Glass of Salts if Your Back Hurts or Bladder Bother.

Flush your kidneys with salts occasionally, says a noted authority, who tells us that too much meat and rich food may form uric acid, which almost paralyzes the kidneys in their efforts to expel it from the blood. They become sluggish and weaken; then you suffer with a dull misery in the kidney region, sharp pains in the back or neck headache, dizziness, your stomach sour, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine gets cloudy, full of sediment, the channels often get sore and irritated, obliging you to seek relief two or three times during the night.

To help neutralize these irritating acids, to cleanse the kidneys and flush off the body's urinous waste, get four ounces of Jad Salts from any pharmacy here; take a tablespoonful in a glass of water before breakfast for a few days, and your kidneys may then get fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate sluggish kidneys; also to neutralize the acids in urine so it no longer irritates, thus often ending bladder weakness. Jad Salts is inexpensive; cannot injure and makes a delightful effervescent lithia water drink.—Ad.

## VACUUM TUBE AIDS RADIO TELEPHONE

Uses to Which Radiophone May Be Put Are Without Number, and All Valuable.

The invention of the vacuum tube has made possible the use of the radio-telephone. The vacuum tube also made possible trans-continental wire telephony. Every time any one talks over a long distance telephone line to an individual in a distant city, they are talking through a number of vacuum tubes, of almost identical construction as the vacuum tube used in radio instruments.

Perhaps nothing has done more to popularize the use of radio than the radio telephone. The fact that conversations may be carried on without the knowledge of the radio-telephone, a host of people who would otherwise not be interested. The uses to which the radiophone may be put are without number. Besides forming a means of communication between friends, business may be transacted, the forest ranger may receive his instructions from headquarters, the airplane may be kept in touch with the earth, and so on, ad infinitum.

One of the most interesting uses to which the radiophone has been put, as far as the general public is concerned, is the broadcasting of news and music from radio telephone stations located at central points throughout the country. From these stations there is sent out, to all who will listen, baseball news, football scores, items of general interest, public addresses by prominent men, music such as band concerts, orchestras, pipe organ recitals, grand opera, and entertainments by the world's best talented artists—in short an entire program that appeals to the general public. To hear these "concerts" as they are called, it is only necessary to install a receiving set, tune in your radio telephone station and listen. It sounds simple and easy and one will find it so.

The programs broadcasted by the large radiophone stations are all of the best that can be considered, and are high class entertainments that will satisfy the most critical. If one does not like a particular number being sent out by a station, all that is necessary is to tune in another station and enjoy their program. The air is full of varied and highly entertaining programs every night.

Woe unto him that giveth his neighbor drink, to thee that addest the venom, and makest him drunken also, that thou mayest look on their nakedness! — Hab. 2:15.

TREASURY DEPARTMENT, Supervising Architect's Office, Washington, D. C., Oct. 15, 1922.—SEALED PROPOSALS will be opened in this office at 3 p. m., Nov. 3, 1922, for furnishing and installing lighting fixtures in the U. S. Veterans Hospital at Olean, N.
