BROWN'S MILL.

ANOTHER OF EDENTON'S GROWING INDUSTRIES.

At this mill business seems to be on the move and in pace with other and like enterprises. It is located in the south-eastern part of the city, near Johnston's creek, a most desirable site for an enterprise of this kind. The lumber sawed by this mill is of an excellent grade.

Mr. W. H. Brown, its proprietor, came to Edenton only a few years since with but small means and established this mill, and the business he is now doing, shows plainly that by perseverance industry and economy, that he has cause to congratulate himself upon the enormous patronage he is receiving.

This mill cuts about 10000 feet of lumber per day, and gives employment to quite a large number of our laborers.

Mr. Brown has a planing department and a department for the manufacture of boxes, crates, &c., for the shipment of potatoes, peas, beans and fish, which pays well.

Another evidence that small industries, managed well, will succeed in Edenton.

HUNTING.

Mr. Editor:—While you are writing up Edenton and vicinity, its advantages and attractions, it might be well to speak of the various kind of game that abound in large quantities in the surrounding country. The many large farms near Edenton being frequented by numerous kinds of birds afford much pleasure during the winter season to the sportsmen. Partridge shooting is exceptionally fine which many of you by experience can attest. Those who are fond of the chase can find foxes anywhere ready to give them a long run. Hares can be found along any hedge, or under most any brush pile. Raccoons, opossums, wild cats and squirrels, are numerous. In some sections wild turkeys are quite plentiful.

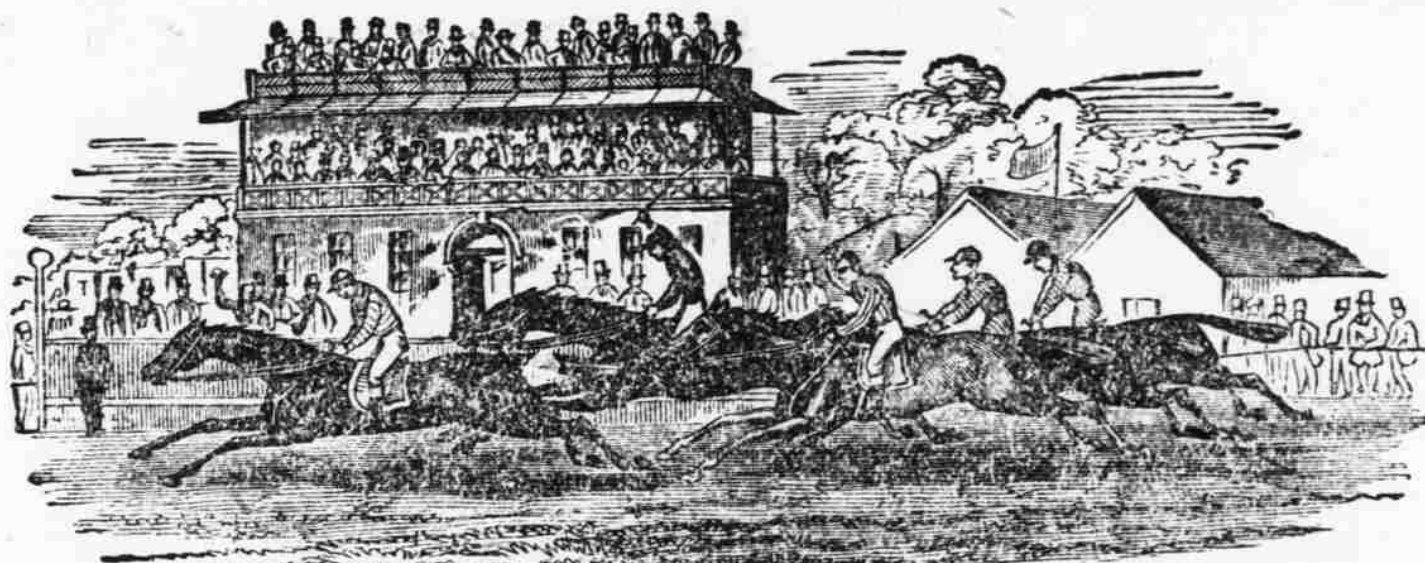

Deer hunting is creating right much attraction of late. Deers are becoming quite numerous in many sections of our country. Some of our best hunting grounds are within thirty miles ride of Edenton. It not unfrequently occurs that our sportsmen jump up three or four in a bunch. The writer of this article saw four large Bucks some time ago running together. Deer hunting seems to be the most exciting of all our gaming. It takes a fellow with strong nerves not to tremble in his knees when he hear the hounds coming in full tilt after a deer.

Bear can be found in the pocosens and deserts. They are not so eagerly sought after as the other varmints.

The main building is a two-story octagon and will accommodate thousands. Large and well constructed box stalls for trotting horses, and good accommodations for all other stock and poultry.

The half-mile track is perfectly level—has easy curves with a long, straight home stretch.

This Fair is intended to illustrate the occupations of the people, and to afford profitable instruction and social entertainment. To foster and advance the efforts of the laborer in every branch of life, in its prime purpose, and it embraces the work of the farmer, stock raiser, manufacturer, artisan and inventor as the common stock of a common brotherhood of workers.
