REV. DR. TALMAGE. THE BROOKLYN DIVINE'S SUN-DAY SERMON. Subject: "The Generations."

Text : "One generation passeth away, and another generation cometh."-Ecclesiastes

According to the longevity of people in their particular century has a generation been called 100 years, or fifty years, or thirty years. By common consent in our nineteenth century a generation is fixed at twenty-five

The largest procession that ever moved is the procession of years, and the greatest army that ever marched is the army of generations. In each generation there are about nine full regiments of days. These 9125 days in each generation march with wonderful precision. They never break ranks. They never ground arms. They never pitch tents. They never halt. They are never off on furch. They came out of the eternity past, and they move on toward the eternity inture. They cross rivers without any bridge or boats.

The 600 immortals of the Crimea dashing into them cause no confusion. They move as rapidly at midnight as at midnoon. Their haversacks are full of good bread and bitter aloes, clusters of richest vintage and bottles of agonizing tears. With a regular tread that no order of "double quick" can hasten or obstacle can slacken, their tramp is on and on and on and on while mountains crumble and pyramids die, "One generation passeth,

and another generation cometh." This is my twenty-fifth anniversary sermon-1869 and 1894. It is twenty-flve years since I assumed the Brooklyn pastorate. A whole generation has passed. Three generations we have known-that which preceded our own, that which is now at the front, and the one coming on. We are at the heels of our predecessors, and our successors are at our heels. What a generation it was that

preceded us! We who are now in the front regiment are the only ones competent to tell the new generation just now coming in sight who our predecessors were. Biography can-not tell it. Autobiography cannot tell ft. Biographies are generally written by special friends of the departed—perhaps by wife or son or daughter—and they only tell the good things. The biographyse of one of the 0 set things. The biographers of one of the first Presidents of the United States make no record of the President's account books, now in the archives at the Capitol, which I have seen, telling how much he lost or gained daily at the gaming table. The blographers of one of the early Secretaries of the United States never described the scene that day witnessed when the Secretary was carried dead drunk from the State apartments to his own home. Autobiography is written by the man himself, and no one would record for future times his own weaknesses and moral deficits. Those who keep diaries put down only things that read well. No man or woman that ever lived would dare to make full record of all the thoughts and words of a lifetime. We who saw and heard much of the generation marching just ahead of us are far more able than any book to describe accurately to our successors who our predecessors were. Very much like oursolves, thank you. Human nature in them very much like human nature in us. At our ime of life they were very much like we now are. At the time they were in their teens they were very much like you are in your leens, and at the time they were in their twenties they were very much like you are in your twenties. Human nature got an awful twist under a fruit tree in Eden, and • though the grace of God does much to strighten things every new generation has the same twist, and the same work of straightening out has to be done over again. A mother in the country districts, expecting the neighbors at her table on some gala night, had with her own hands arranged everything in taste, and as she was about to urn from it to receive her guests saw her little child by accident upset a pitcher all over the white cloth and soil everything, and the mother lifted her hand to slap the child, but she suddenly remembered the time when a little child herself, in her father's house, where they had always before been used to candles, on the purchase of a lamp, which was a matter of rarity and pride, she took it n her hands and dropped it, crashing into deces, and looking up in her father's face. specting chastisement, heard only the words, "It is a sad loss, but never mind; you did not mean to do it." History repeats itself. Generations wonderfully alike. Among that generation that is past, as in our own, and as it will be in the generation following us, those who succeeded became the target, shot at by those who did not succeed. In those times, as in ours, a man's bitterest enemies were those whom he had befriended and helped. Hates, jealousies and revenges were just as lively in 1869 as in 1894. Hypocrisy sniffled and looked solemn then as now. There was just as much avarice among the apple bartels as now among the cotton bales and among the wheelbarrows as among the locomotives. The tallow candles saw the same sins that are now found under the electric lights. Homespun was just as proud as is the modern fashion plate. Twenty-five years-yea, twenty-flye conturies have not changed human nature a particle.

But this sermon is not a dirge. It is an any better than does the Atlantic. I want to anthem. While this world is appropriate as a temporary stay, as an eternel residence it would be a dead failure. It would be a see the wondrous architecture of India, and the Delhi and Cawnpore where Christ was crucified in the massacre of His modern disdreadful sentence if our race were doomed ciples, and the disabled Juggernaut unto remain here a thousand winters and a wheeled by Christianity, and to see if the Taj which the Emperor Sha Jehan built in thousand summers. God keeps us here just honor of his empress really means any more long enough to give us an appetite for heaven. Had we been born in celestial than the plain slab we put above our dear realms we would not be able to appreciate departed. I want to see the fields where the bliss. It needs a good many rough blasts Havelock and Sir Colin Campbell won the day against the sepoys. I want to see the world from all sides. How much of it is in in this world to qualify us to properly esti-mate the superb climate of that good land darkness, how much of it is in light, what where it is never too cold or too hot, too the Biblo means by the "ends of the earth." loudy or too glaring. Heaven will be more and get myself ready to appreciate the exto us than to those supernal beings who were never tempted or sick or bereaved or tried tent of the present to be made to Christ as spoken of in the Psalms, "Ask of me, and I shall give thee the heathen for thine inheri-tance and the uttermost parts of the earth or disappointed. So you may well take my text out of the minor key and set it to some tune in the major key, "One generation passeth away, and another generation for thy possession," and so I shall be ready to celebrate in heaven the victories of Christ Nothing can rob us of the satisfaction that in more rapturous song than I could have uncounted thousands of the generation just past were converted, comforted and harrendered had I never seen the heathen abominations before they were conquered. And so I hope to come back refreshed, reested for heaven by this church, whether enforced ard better equipped, and to do in ten years more effectual work than I have n the present building or the three precedng buildings in which they worshiped. > Deliverance of Tourists Trapped in a Cave.

A diver at 10.30 o'clock a, to, succeeded in reaching the party of tourists who had been imprisoned in the stalastite cavern at Souralch, Austria, for seven days and nights owing to a sudden rise in the water and the fact that the passage into the cave became blocked with timber and houiders.

All the entombed tourists were rescued. Six of them succeeded in emerging from the cave without any assistance, but the seventh was so weak that he had to be assisted.

The news that the tourists who had been a long imprisoned were still alive enused rejoleing among the crowds of people who gathered about the cavern to watch the work of the engineers who had been tolling day

and night to rescue them. The engineers had a very difficult task in making an opening into the cavern. The entrance was blocked by timber and buge boulders heneath a mass of smaller flood debris. It was found necessary to use dynamite. After a number of blasts Fischer, the diver, who had shown great bravery throughout the work of rescue, descended to the mouth of the cave.
