dlings. Some feeders argue that a Discovered the colts barking trees sow will do better at farrowing if she in the pasture one day. Had a roll of be thin in flesh. This is true if she fine mesh wire chicken fence on hand, has been fed on corn, but if fed as recwhich I cut up and put around each ommended above, she will do much tree. It did the business, and it will better by her pigs if in good flesh. A stay there. By the way, why can't few roots and an occasional feed of we have fine screen wire galvanized clover hay are very healthful and will for permanent guards for fruit trees? e enjoyed by the sow. Care should Would it not overcome the destructive work of the apple tree borer by preventing the insect from depositing its weeks after, as the pigs cannot dispose eggs in the trunk of the tree, as well as afford protection from rabbits and mice. - American Agriculturist.

## DISEASES OF THE FORE LEGS.

The feet and legs of horses are nttracting more attention among breeders than formerly, as all breeds have good and bad feet and legs. A scientific writer in Europe says: "That there are more diseases of the fore than of the hind legs of the horse is only what would be expected from his conformation, his mode of progression and the nature of his work. The fore legs and feet are the first to suffer injury, for they are the most severely taxed both at ease and at work."

MUTFON AND WOOL. A few years ago farmers kept sheep for wool alone, the carcass of the animal did not enter into consideration as a thing of value. Then came the sudden demand for good mutton and first class lamb. The fleece sank in the opinion of the breeders as the meat rose. The talk is to-day entirely of the "mutton sheep," and few farm- first about with burlaps, then with ers realize that the famous English breeds aim to produce both wool and mutton of the best quality and in the thickest part of the roots. In the large quantities. While mutton is the pot were first put broken pieces of first consideration, it is by no means crock and charcoal to the depth of

# Massage for Black Eyes.

Those who make a business of obliterating evidence of fistic encounters in the shape of black eyes by painting the damaged optics no longer enjoy a monopoly of such business. This I was told by a pugilistic acquaintance whose experience entitles him to be regarded as an authority on

"Massage treatment of the region affected," he said "will beat paint and raw beefsteak all hollow. But it should be applied immediately after the injury is received in order to prove thoroughly efficacious. It does not require an expert to do it. All that is necessary is to move the fingers

rapidly and firmly over the bruised surface, and to keep it up until the last vestige of discoloration has disappeared. The explanation is easy. Where the blow has been received the blood becomes congested. It is the clots of blood showing through the

transparent skin that produces the black effect. The pressure of the fingers gradually loosens the clotted blood, which passes off into the general current of circulation, and tresh and properly colored blood takes its place."

However, as a rule, the professional "pug" does not bother himself about accelerating the disappearance of a black eye. It is a sign which proclaims the fact that its proprietor has recently filled an engagement, and as such he is an object of envy to his

less fortunate brethren. It is the man about town, whose overindulgence occasionally causes him to forget that discretion is the better part of valor. who is apt to profit most by the knowledge that massage, promptly applied, will remove the signs of mourning from an eye that has been in violent contact with some other fellow's fist, and thus obviate the necessity of

Family Frozen to Death.

The echoes of the blizzard of February 6. 7 and 8 are just now being heard from the far outlying districts in Missouri. From Buford Mountains, eight miles southwest of Irondale, Mo., comes news of a woodchopper named John C. Warner, his wife and three children found frozen to death.

Twenty-two Persons Frozen to Death.

There is yet no abatement of the cold weather throughout Austria. Twenty-two persons have been frozen to death in Galicia, and several cases of death from exposure to the cold are reported from other regions.

Brazillan Revolutionists Active Again. A dispatch from Montevideo says that advices received there from the Brazilian frontier are to the effect that the Brazilian revolutionists are active, and are massing well armed and well mounted bodies of men in the State of Rio Grande do Sul. The revolutionists are under the command of Admiral de Gama, who took such a prominent part in the naval operations before Rio de Janeiro.

Most Unique Strike on Record.

All the eigarmakers in Marti City, Fla. went out on a strike because Teacher C. W Washburn refused to admit colored children to the free schools.

The two children hastened to her assistence. and they, too, fell through. Lillian, instead of trying to get out herself, bravely grasped the rough edges of the ice and held on until the children climbed to her shoulders and thence on the ice. Then she sank to her death

Killed by Her Hatpin.

Carrie Pelsgrove, a pretty girl of seveneen, residing near New Castle, Ey., went skating with her sweetheart and a party of gay young friends on a pond near her home. Some of the youngsters began a race, and Miss Pelsgrove, becoming entangled in the crowd, fell, driving a hatpin into her brain. The pin broke off, leaving part of it in her

water.

skull. The girl died before she could be taken home.

past few weeks.

Starving in Oklahoma.

An appeal for aid has been issued by settlers in the Cherokee Strip. Hundreds of families are absolutely starving, eating prairie dogs and horses. The suffering is inparalleled. Cattle have been dying in iroves, as a result of the unprecedented "northers" which have visited Indian and Oklahoma Territories and Texas within the

## A Smallpox Serum.

Experiments with a smallpox serum are being conducted by Health Commissioner Homan at the Quarantine Hospital, St. Louis, Mo.

ECAUSE inferior and cheaper made baking preparations are bought at wholesale at a price so much lower than ROYAL, some grocers are urging consumers to use them in place of the ROYAL at the same retail price.

If you desire to try any or the pretended substitutes for ROYAL BAKING POWDER bear in mind that they are all made from cheaper and inferior ingredients, and are not so great in leavening strength nor of equal money value. Pay the price of the ROYAL BAKING POWDER for the ROYAL only.

It is still more important, however, that ROYAL BAKING POWDER is purer and more wholesome, and makes better, finer, and more healthful food than any other baking powder or preparation.

ROYAL BAKING POWDER CO., 106 WALL ST., NEW-YORK.
