The shell, fired from high power guns, penetrated the armor almost as bullets fired from a Krag-Jorgensen rifle would penetrate green wood, the difference being that the armor plates split from the point of impact. It is said this was true of the Krupp armor, as well as

of the other armor tested. The argument of Mr. Tillman is, that with such a projectile in the possession of the government, the details of which sooner or later will become known to other governments, it would not be the part of wisdom for the Congress to enter into contracts to purchase the highpriced armor, unless it could be so improved as to resist projectiles of the kind

used at Indian Head. Feeling that more or less of the matter concerning the tests recently made by the government would be used in the debate upon the armor question, Mr. Tillman suggested that it would be desirable to consider the subject in secret. The Senate agreed with him and tomorrow the armor plate matter will be discussed behind closed doors.

One of the men, John Davidson, who persisted in entering the mines against the protests of the union men, was assaulted and badly beaten. Several others were beaten and seriously injured. Only about fifty miners succeeded in entering the mines. Longconding is reported to be in possession of a howling mob. Sheriff Martin and deputies have gone to the scene. Arthur Taylor and Baldwin S.
