U.S. Royal Cords

BALLOON ~ BALLOON-TYPE ~ HIGH PRESSURE Built of Latex-treated Cords

TIRE building took a big step forward when the makers of United States Tires invented the Latex Process. The added strength and wearing quality given by Latex-treated cords is something that the user of Royal Cords can tell you about from his own experience. Royal Cords are the standard of value in cord tire equipment—even more certainly today than ever before. And this holds good whether you are considering a High-Pressure Tire, a Balloon-Type Tire to fit your present wheels and rims, or a Balloon Tire for a 20 or 21 inch wheel. Worth Living For

There is scarce any lot so low but there is something in it to satisfy the man whom it has befallen. Providence having so ordered things that in every man's cup, how bitter soever, there are some cordial drops—some good circumstances, which, if wisely extracted, are sufficient for the purpose he wants them—that is, to make him contented, and if not happy, at least resigned.—Sterne.
