TO FARMERS.

The subscriber having been engaged for some time in making Wheat Thrashers, which experience has shown are adapted to thrashing Peas, Flax, &c., while the same horse power by which the machine is operated, affords a very convenient facility in getting out corn, wishes to make known more extensively than he has hitherto done, that he is preparing to furnish Thrashers by next thrashing season, if application be made early, at Port Landing, north of Alligator River, Tyrrell county, N. C., where large Schooners can lay at anchor within one hundred yards of my house; or I would deliver them at E. City or Plymouth.

My largest size Thrasher has two hoppers, and gives two feeders active employment to keep it supplied when thrashing Wheat. Properly attended, these Thrashers will thrash a good article of grain, thrash 300 to 400 bushels per day. Price \$55.

I make Thrashers of a smaller size for \$35. They are extensively used by the planters of Hyde, and are deemed almost indispensable in the absence of the larger size. If as much power is required as will thrash one acre of wheat per day, 175 to 200 bushels per day. To persons intending to operate these Thrashers on the upper floor instead of basement, a small deduction in price will be made, as I intend to furnish flywheels to purchasers, that may wish to thrash on the lower floor of common barns. I will also give to purchasers a description of an improved and cheap plan of horse power to be applied, if they wish to have 175 to 200 bushels per day. To persons intending to operate these Thrashers on the upper floor instead of basement, a small deduction in price will be made, as I intend to furnish flywheels to purchasers, that may wish to thrash on the lower floor of common barns. I will also give to purchasers a description of an improved and cheap plan of horse power to be applied, if they wish to have 175 to 200 bushels per day. To persons intending to operate these Thrashers on the upper floor instead of basement, a small deduction in price will be made, as I intend to furnish flywheels to purchasers, that may wish to thrash on the lower floor of common barns.

As to other grains not above mentioned—such as Rice, Oats, Barley, Rye, &c., it has not yet been ascertained the number of bushels per day, my machines will thrash, and to say what I think it seems incredible to one not acquainted with my improved plan. These Thrashers are altered to suit the size of any grain simply by turning tabs—they can be set so close that Wheat badly shrunken with rust can be taken out clean, and then so open that a bean can pass and not be broken. It is an important improvement having been recently made to the different uses of the Thrashers, and myself avail of this opportunity to thank my friends for the liberal patronage they have given me, and would respectfully call the attention of grain growers to the article I propose to sell. All orders shall be promptly and faithfully attended to.

I give below only four certificates out of about sixty that I have from men that have bought Thrashers of me. The one horse power Thrasher mentioned by Mr. Alexander I shall not make any more of, as the 2 horse and 4 horse power seem mostly wanted; and a large horse, if the gear works well, can turn with ease the 2 horse power Thrasher, an important improvement having been recently made in regard to castings and preventing fire.

W. R. PALMER.

N. B.—In my first publication I stated I should not make any more of the one horse power Thrasher, named by Mr. Alexander. I have altered my determination in that respect, and will furnish them.—Any person wishing to know any thing in regard to thrashing Peas, can call on Lewis Midgely, of Stumpy Point, Tyrrell county, N. C., where it is convenient for vessels passing the narrow to call. W. R. P.

Tyrrell County. This is to certify that I bought of Wm. R. Palmer a wheat thrasher of one horse power some three years past, which has proved to be good and will thrash one hundred bushels per day.

Oct. 27, 1848. JOSEPH ALEXANDER.

STATE OF NORTH CAROLINA.

Tyrrell County. This is to certify I bought of Wm. R. Palmer a wheat thrasher of his own make, and have thrashed one crop of eight hundred bushels averaging from one hundred and twenty-five to one hundred and fifty bushels per day, and by attention will thrash the straw perfectly clean. I also thrashed my flax seed with his machine and I find a great saving in getting off seed, and in time.

Hyde County. I would say to the public that one of William R. Palmer's machines was used in thrashing my wheat the past summer, and that it thrashed the straw so thoroughly as to leave scarcely a single grain to be found in the thrashed straw.

Properly attended, I think the machine would with a good article of grain, thrash 175 or 200 bushels per day. RICHARD L. WYNNE.

STATE OF NORTH CAROLINA.

Hyde County. This is to certify that I have seen several of Mr. William R. Palmer's machines at work, and I believe those machines to be the most desirable of any or all others in this section of country. I have lived 7 years on Judge Dancel's plantation, and experienced the advantages to be derived from the use of Mr. Palmer's improved plan of Thrashers.

NOTICE.

THE PATENT NETTING LOOM, invented by Mr. John McMullen, of Baltimore, Md. is now in full and successful operation, and is producing a most beautiful article of Netting, suitable for fishing nets, seines, fly-nets for horses, &c., which can be supplied to dealers or consumers of the article, at a price far below that of a similar article produced by hand, and in every respect decidedly superior. Uniformity in the meshes, perfect knots, and almost entire freedom from knots in the twine, adds very much to the beauty and perfection of the work of this machine.

Fishermen, dealers in seines and seine twine, and manufacturers of fly-nets, &c., are respectfully invited to call and examine specimens of this article, at No. 74 Bowly's wharf, Baltimore, Md. Jan. 20—4m. WM. E. HOOPER.
