

FRENCH BROAD DAM WILL BE DISCUSSED

Meeting To Be Held At Brevard High School On Friday Evening

With interest in the proposed water storage project on the French Broad river high and the project being discussed on every hand announcement is made by Professor S. P. Verner, who has been deeply interested in the matter since its inception, and who has made a study of the proposition from all angles, that a meeting will be held at Brevard high school auditorium on Friday evening of this week at eight o'clock at which time a thorough discussion of the TVA program will be held.

Professor Verner, who recently had a conference with Dr. A. E. Morgan, head of the Tennessee Valley Authority, as well as several other people of Western Carolina who are interested in the French Broad valley end of the program, will be on hand to go into the matter.

Engineers of the TVA have announced that a minute survey of those portions of Buncombe, Henderson and Transylvania counties which will be flooded if the project is carried out, will be started within a week.

Tentative inspection of highway systems in Transylvania and Henderson counties made by TVA engineers in the district highway office at Asheville last week showed that considerable highway relocation would be necessary in Henderson and Transylvania counties if the dam is built. The state highway department is expected to assist the TVA engineers in their survey of the proposed lake site.

Horace Jeffress of the Mills River section and Professor Verner met with a number of people at Connettee school house last Friday night.

BODY OF BURRELL IS FOUND BY BROTHER

Brevard Physicians Say Man Was Dead Before He Fell Into Water Pool

The body of Lonnie Burrell, reported to have been drowned in the Tuckaseegee river last Sunday had no life in it when it went into the water, according to opinion of Dr. G. B. Lynch and Dr. E. S. English, who examined the body at the Moore & Osborne funeral home here Monday night.

The body was found Sunday afternoon in 15 feet of water by a brother of the deceased, with the dead man's walking stick lying near the edge of the water. A coroner's jury attributed the man's death to accidentally falling into the water.

Burrell was employed by the E. H. Jennings estate as a patrolman, and the body was brought to Brevard for burial preparation before being carried to Burrell's home in South Carolina. At the request of Mr. Jennings W. E. Breese had the body examined, with result that doctors Lynch and English pronounced the man dead before he heaved the deep pool of water in which he was found.

Bruises of severe nature were found on the man's forehead and upon the nose and one upon the hand. It is not known what steps, if any, the Jackson county officials will take, inasmuch as the coroner's jury has already declared the man met his death by accidentally falling into the water.
