THEN AND NOW...
SAD MEMORIES

Having cause to check through the files of this newspaper dated 1927, we were forcibly impressed by a headline telling of two carloads of poultry shipped out of Transylvania county within one week for which the neat sum of eight hundred dollars in cold cash was passed out.

WE NEED SOME OF THE HOLLYWOOD SPIRIT

The Hollywood Herald, published in the Sunshine State is just about the most enterprising newspaper that has come to our desk in a long time. Against the general belief that Florida is only for folk to visit in the winter time, this wide-awake newspaper, backed by citizens of the community which it serves burst forth last week with a vacation number woven around its claims that Hollywood, Florida, is THE place to spend a summer vacation.

CHECKING PROFITS TO OUTLAW WAR

Take away industrial profits during the time of war and the hue and cry will be of much smaller calibre for entering into conflict on more or less imaginary ill, is the opinion of Bernard M. Baruch, who was chairman of the War Industries Board under President Wilson.

PLEASANT GROVE

Mrs. Charles Roller and daughter Betty are visiting Mrs. Roller's sister Mrs. George Huggins in Hendersonville.

DOCTOR TOLD THIS LADY HOW TO SAFELY Reduce FAT

Mrs. Helen Greene Writes: "A physician advised my mother to take Kruschen Salts for overweight so I immediately started taking it myself. I weighed 192 and after taking three bottles I now weigh 165 and never felt so well. It's a tonic as well as a reducer."

DOCTOR TOLD THIS LADY HOW TO SAFELY Reduce FAT

There will be song practice at the home of Rev. C. E. Blythe Friday night. We hear lots of talk about good roads. There is no such thing as good roads in Pleasant Grove.

DOCTOR TOLD THIS LADY HOW TO SAFELY Reduce FAT

It is said of old that it rains on the just and the unjust. We are getting our rain now.

McNINCH APPOINTMENT REAL STEP FORWARD

This paper sees in the re-appointment of Frank R. McNinch as chairman of the federal power commission by President Roosevelt a start on the road to efficiency in government rather than party-itis.

It is true that Mr. McNinch was not a "cut and dried Democrat," he having bolted the party in 1928 when Al Smith was the party's nominee for the presidency, and for this act there were and still are, many party men who believe that McNinch should be given a "spanking" at the hands of his party.

President Roosevelt, however, who is doing as he sees best in such instances, evidently sees in McNinch a man who is fitted for this particular work and the president believes along with a great minority of others, that the government should have the best men available, regardless of the fact that they "scratch" the ticket once in a while.

Next hurdle—second primary election Saturday—if all get over that without damage we ought to feel better.

Now that bank deposits up to \$5,000 are insured by the federal government we have more room for hoping about that "rich uncle."

Have you tried being pleasant to our visitors? Wipe the frown off, smile, say "howdy-do" and see the difference.

Millions set aside for postoffices in the United States... Greenville, just over the mountain, getting half a million... Please, Mr. Farley, send us some of that cash, too.

Mr. and Mrs. W. M. Henry visited in Pickets county last week.

The well on the line of the Siniard and Devane lots seems to have become a "bone of contention." In the absence of T. L. Clarke in Asheville last week young Devane proceeded to fill it up with stones and earth, with the plea that two families could not use the same well and live in peace. At the trial before the magistrate, Devane was bound over to court and the trial will probably decide whether a man has the right to destroy a family necessity of which he owns only a half interest. It is a unique case and will be watched with considerable interest.

The latest war news up to the time of going to press is that the senate has notified McKinley he must call on Spain to evacuate or that body will declare war. He was given 24 hours on Monday in which to act, and failing congress would take the whole matter out of his hands and declare war at once. The indignant letters and telegrams against a policy of delay, sent by leading Republicans all over the country, have decided congress that something must be done at once.

The sudden and unexpected death of Thomas J. Neely, old and highly respected citizen of Brevard, occurred at his home Wednesday morning. Little more than a week from the time of his death, Mr. Neely did an unusually hard day's work unloading a car of lumber for the new cottage he was building in Brevard. He became overheated and procured a horse to ride home, not feeling able to walk. He did not hold out to reach home without assistance. A physician was summoned and the discovery was made that congestion of the lungs was the difficulty. All efforts were made to save his life but pneumonia developed and death resulted. Mr. Neely was 54 years old, and his family consisted of a son and two daughters, all of whom have made for themselves creditable homes and a respected citizenship. Mr. Neely was a member of the Masonic lodge and the Baptist church. The funeral was in charge of the Masons, Rev. I. T. Newton conducted the services.

Mrs. Elizabeth Landreth, venerable and well known lady of the Dunn's Creek section, died March 17, aged 81 years. Mrs. Landreth had been widowed since the war, and has brought up a family of boys in this county, all of whom have become excellent citizens.

At a called meeting of the board of aldermen for the Town of Brevard, the following action was taken: A charter election for mayor and aldermen for the Town of Brevard will be held on the first Monday in May, T. D. England and T. W. Hadden were appointed registers, and P. S. King and Des Young judges. The registration books will be open at the store of T. D. England next Saturday.

Is the naval war of the future to be carried on wholly under water? It sounds more like a suggestion of a Jules Verne novel than a practical proposition, and yet the achievements of the Holland submarine boat bring the question within the limits of reason and sober calculation. The torpedo boat is the terror of everything that floats. Battleship, monitor and cruiser alike are at its mercy if they fail to sink it in time. Yet how can they sink it if they cannot see it? And the Holland boat moves under the surface of the water beyond the reach of telescope or projectile. The experiments made thus far have been only preliminary and tentative, but their success has been enough to encourage the conviction that the submarine torpedo boat is a possibility of the near future. Just how the world's great navies would carry on a war complicated by the presence of this dangerous little invention is an interesting problem.
